**Task 8 – Final Inventory Report & Map Indexing of Lands Subject to Acquisition**

Dear Ms. Cyr,

We are pleased to present the culmination of our authorized investigation and records search of water rights appurtenant to lands currently subject to acquisition by United States Navy for the benefit of Naval Air Station Fallon (NAS Fallon). This letter summarizes the approach and methodologies used to accomplish a detailed and thorough search of public databases of Nevada water rights appurtenant to the subject lands. The findings from this research effort are presented in written form and supplemented by a detailed abstract of all identified water rights including location of each Point of Diversion (POD) and Place of Use (POU) as well as the Manner of Use (MOU), application status (e.g. application, permit, certificate, claims of vested rights and abrogated rights), and hydrographic basin. Finally, the report includes specific recommendations for actions necessary to protect and preserve the identified water rights.

**EXECUTIVE SUMMARY**

This deliverable includes a Final Inventory Report & Map Indexing of water rights lying within or appurtenant to the proposed acquisition area. The attached inventory document includes information and data derived from several public sources.

- Acquisition documents provided by NAS Fallon
- Documents on file with the NDWR
- Documents on file with the Truckee-Carson Irrigation District
- GIS mapping of the respective points of diversions and places of use of each identified permit/application

In preparing this report, significant correspondence, reports, recorded documents, and maps, as provided by representatives of the Navy, were identified and critically evaluated. A thorough records search was also conducted to identify active water rights on file with Nevada Division of Water Resources (NDWR)—including applications and supporting maps on file with that office. For each identified water right, all available documents and supporting maps were retrieved and reviewed. Finally, selected historical documents not found in the provided records but identified in its reference material were acquired from the

offices of the Churchill County Recorder and Assessor and were reviewed for these same purposes.

In support of this research efforts, available geographic information systems (GIS) data were utilized to help define, compare, and map critical data sets that included existing and proposed land boundaries by section, Township, and Range. Two GIS map packages were furnished from Naval Facilities Engineering Command (NAVAC) South West Cadastral upon commencement of this effort. These included GIS georeferenced shape file layers for the Existing and Proposed Land Categories. Through the term of this research, no boundary updates or modification were provided.

These georeferenced GIS land category layers were used to identify related GIS data available through NDWR including POD and POU water right data. The POD locations were provided in a tabular format with attribute extract information, which included a latitude and longitude reference. These were plotted as point features in GIS. Please note that not all identified rights have the POU defined by a NDWR polygon. We have confirmed with personnel at NDWR that it is not their typical practice to create POU polygons for rights with certain Manner of Uses (MOUs) including: Stockwater, Recreation, or Wildlife purposes. Furthermore, several applications for vested rights were submitted without maps defining their place of use. As a result, the place of use of those claims are also not reflected within the GIS data.

In addition to the DWR POD/POU and Basin GIS Data, and the NAVAC Land Category GIS Data, the Public Land Survey System (PLSS) layers were provided in the NAVAC map packages. These data included the Township and Range blocks as well as the first division sectional break down for the defined land areas.

County Assessor parcel information, to the extent it was available, was separately researched and obtained from the counties of Churchill, Pershing, Lyon, Nye, and Mineral. In the attached mapping, this Assessor data is presented for comparison to the POD and POU for each water right.

Upon receipt of final comments to this report, this GIS data will be uploaded and presented in the Navy Data Model V4.0 file format.

A detailed summary of each permit and a supporting map is provided in the attached Index. Copies of each identified permit, certificate, and available supporting map on file at NDWR along with a summary sheet of each are provided in the appendices of this letter report. The following paragraphs provide specific findings and recommendations related to each identified application or permit, all of which are owned by private landowners or third-parties that seek to utilize what are generally public lands within the proposed acquisition area.

**GENERAL RECOMMENDATIONS**

1. Many of the water right maps that form the basis of both the listed POD and described POU date back to pre-1970, and some to the early 1900's, which may pre-date Bureau of Land Management Township Re-surveys of some of the subject lands. As a result, where the described POD is in relative proximity to a 1/16th line, an accurate re-survey of the lands may find that the existing POD (i.e. drilled well, spring, etc.) is not accurately reflected on the maps of record and falls either within or outside the actual boundaries of lands now subject to acquisition for the benefit of NAS Fallon. It is recommended that the location of the existing points of diversion that fall within 300 feet of a 1/16th line based on record information be "ground-truthed" by a field survey.

2. As noted above, preparation of the GIS base maps presented within this report were compiled from at least three independent geospatial data sets (NAVAC, NDWR and PLSS). These independent datasets do not have the same origin nor were they developed using the same projection system. Reconciling the origin and projection system of these datasets was beyond the scope of the current task order. As a result, when the accompanying GIS base map is reviewed critically, the variation between these datasets is evident when comparing various line, boundary and shape elements. For the integrity of the mapping of these water rights and future water right mapping efforts for which this effort will serve as a basis, it is recommended that the geospatial datasets obtained or retrieved from other agencies be re-projected to the origin and projection as used to develop NAVAC's dataset.

**PRIVATE OR THIRD-PARTY WATER RIGHT SUMMARY AND RECOMMENDATIONS**

Within the lands currently being considered for acquisition, there are total of 119 water right applications or permits. Of these, 50 permits have been certificated, meaning that there are no further filing requirements to perfect these rights; 34 are permits in various states of usage; 19 applications are ready for action (RFA); one is RFA, but protested (RFP); and, 15 are unadjudicated pre-statutory (vested) rights.

Of these 50 certificated permits, 37 are for stock watering purposes and the place of use is generally lands owned by the United States of America and managed by Department of the Interior, Bureau of Land Management (BLM). Of the remaining 13 certificated permits:

- 6 were issued for mining and milling purposes
- One (67727/18413) is for wildlife purposes the owner of record of which is Nevada Department of Wildlife
- three (73635/21375; 76356/21376; and 76737/21377) are for municipal purposes, all of which are owned by Churchill County
- one (4597/1580) is for irrigation of about 9 acres for land from Lyman Canyon Spring in the Carson Desert hydrographic basin. The current owner of record is California Lands, Inc.
- one (4245/1201) is certified for about 5.6 gallons per minute (GPM) for domestic purposes from Lucky Boy Spring. The owner of record is Mamie Lofthouse.

- and one (303/573X) was issued for "Other" purposes. The application for Permit 303/Certificate 573X is dated December 1906, which was very shortly after Nevada's water law was established, and the listed purpose of the application was to appropriate water originating in Bench Creek for the use of the Bench Creek Ranch.

Of the 34 permits, 19 were issued for stock watering purposes from both existing wells or springs. Of those 19, 18 were issued specifically to support stock on the Dixie Valley Grazing Allotment over lands owned by the United States of America and managed by Department of the Interior, Bureau of Land Management (BLM). The current owner of record for each of these 18 permits is Bench Creek Ranch. The one other stockwater permit (86831) was issued to Michael Casey to support stock on a grazing allotment over lands managed by BLM in Stingaree Valley.

Of the remaining 15 permits, 11 are owned by Churchill County and were issued for municipal purposes; three were issued for mining and milling purposes; and one was issued for wildlife purposes to the Nevada Department of Wildlife.

Each of the 19 pending applications that are RFA was filed by Churchill County and the manner of use was listed as either quasi-municipal (QM) or municipal (MUN) purposes. Of those 19 applications, 18 were filed with a requested diversion rate of 6.0 CFS; the one other application was filed for a diversion rate of 0.5 CFS. The proposed place of use of all 19 of these applications is essentially the entire county. Presumably these applications were filed in anticipation of servicing future growth within the county (as opposed to speculative purposes).

The one pending application (63886) that is RFP was filed by Michael Casey in March 1998 for commercial purposes (a fish and frog farm) in Dixie Valley. The application seeks a diversion rate of 0.446 CFS. It was timely protested by Churchill County and to date the State Engineer has not taken final action on this application.

There is a total of 15 unadjudicated claims of vested rights within the lands subject to acquisition that were filed by four different claimants. Ira and Nina Kent are listed as the claimants for 9 of the claims; Michael and Claudia Casey are listed as the claimants of 4 of the claims, and the two remaining claims were filed by George Williams Land & Livestock Co. and Ron Greenfield. Mr. Greenfield's claim was for irrigation of 40 acres within Gabbs Valley from Rawhide Hot Springs that are also apparently known as Gabbs Valley Hot Springs. Except for Mr. Greenfield's claim, all the other claims were filed for stock watering purposes over lands within the public domain and now managed by BLM.

The following recommendations are specific to the water right permits and pending applications that are held in ownership of private or 3rd parties within the proposed acquisition areas.

1. For the 70 different water rights including claims of vested rights, permits, certificates and pending applications, issued for or seeking stock water for livestock pursuant to grazing allotments over lands managed by BLM, it is recommended that:
    a. Further research be undertaken through the office of BLM to determine the status of any grazing rights associated with the place of use of these applications/permits.
    b. To the extent that the grazing right is still active and in good standing, the Navy should determine whether continued use of these lands for stock watering purposes conflicts with the Navy's planned future use of these areas.
    c. If it is determined that this use does not conflict, no further action is required.
    d. However, if continued use of the lands for stock watering purposes conflicts with future uses of the Navy, it is recommended that the appropriate officer of the Navy meet with representatives of BLM to develop and implement a strategy for terminating or relocating these existing grazing allotments to areas off of or outside of the acquisition lands.
2. Of the remaining 48 (119-71) water rights identified within the lands subject to acquisition, 33 have been filed by Churchill County for its municipal purposes. Three of these 33 water rights have been certificated or perfected; 12 are permits and the remaining 18 are pending applications.
    - For the three certificated permits that the county owns, they have demonstrated that they have an actual need for the allowed duty of those permits. Unless after further, more detailed review that concludes even these permits/certificates conflict with the Navy's proposed uses. it is probable that the Navy would acquire the lands subject to these existing rights and related facilities.
    - The remaining 30 permits and applications should be reviewed more thoroughly in context to the Navy's planned use of the properties subject to acquisition. If, after further review it is found that they are contrary to the interests of the Navy, and particularly its proposed uses for the lands to be acquired, the appropriate officer of the Navy should first contact the appropriate parties at Churchill County to discuss the specific concerns of each permit/application with the objective of reaching an understanding with the county's management on how best to cooperate to meet the respective needs of the parties, while not interfering with the Navy's proposed use of the lands. To the extent that it is determined that the county does not require any or all the 30 permits/applications, the county could simply submit a letter to the State Engineer and withdraw the unnecessary permits/applications. If, after meeting with Churchill County and describing the concerns with one or all of the applications, the county refuses to withdraw the permit(s)/application(s) that are or will be in conflict with the Navy's proposed operations, it would be appropriate for the officer of the Navy to submit a formal letter to the State Engineer detailing the specific concerns with each application and concluding the letter with a request that

the State Engineer deny the applications due to "conflicts with existing rights" and/or that the "proposed use threatens to prove detrimental to the public interest" as they will conflict with the Navy's existing or proposed uses on the subject lands.

3. Of the remaining 16 (49-33) water rights identified, 9 have been issued for mining and milling purposes. Of these 9, 6 permits have been certificated indicating that the permittee has demonstrated beneficial use of the duty allowed by the permit terms. The other three have been permitted, but not certificated. Further research is required to confirm the status of the mining and milling use at each of these locations.
    a. If the use has ceased at any one or all the sites, upon acquisition of the properties, it is recommended that the prepare and file a Report of Conveyance for each of the permits and certificates establishing its ownership interest in the land and appurtenant water rights. Then, as the Owner of Record, it is recommended that the Navy issue a formal letter to the State Engineer officially abandoning each of the unused permits. Abandoning the mining and milling permit/certificate will not adversely affect the Navy's opportunity to file a future application to appropriate the water resources at these site(s) if a potential beneficial use was identified.
    b. If the mining and milling use(s) are still active at any or all of these locations, it is recommended that the Navy carefully consider if the existing mining use will interfere with the anticipate future use of the properties and take appropriate actions to ensure that the potential interference is mitigated.
4. For the last 7 (16-9) water rights identified the following specific recommendations are offered:
    a. The state of Nevada, Department of Wildlife has two of these rights: one (67727/18413) is certificated and the other (67726) remains in a permit status. These permits are for unnamed springs that have been, or are being developed to support wildlife indigenous to the areas in proximity to the sources including bighorn sheep, mule deer, antelope, etc. It is expected that the Department's management of these resources is sufficiently passive so as not to conflict with the planned uses of the properties by the Navy. As a result, no further action is recommended or required.
    b. Claim of Vested Right, V08909, that was filed for irrigation purposes by Mr. Greenfield for irrigation of 40 acres within Gabbs Valley from Rawhide Hot Springs. Further research is required to confirm the status of the irrigation use at this location and to determine if it will be in conflict of the Navy's proposed use of this portion of the lands to be acquired. If the use remains active and the Navy determines it does not conflict with planned future uses in this area, in theory with the permission of the Navy as the new owner of the land, the use could continue after acquisition. However, if the use is found to conflict with the Navy's purposes, appropriate actions should be taken to terminate the use at this site.

c. Permit 303/Certificate 573X, was filed for "Other" purposes to appropriate water originating in Bench Creek for the use of the Bench Creek Ranch, a private property. This property, and the appurtenant water right, is within the lands to be acquired. Upon acquisition, it is recommended that the Navy prepare and file a Report of Conveyance to document its ownership interest in the subject water right.
d. Permit 4245/Certificate 1201 was filed for domestic purposes from Lucky Boy Spring. This property, and the appurtenant water right, is within the lands to be acquired. Upon acquisition, it is recommended that the Navy prepare and file a Report of Conveyance to document its ownership interest in the subject water right.
e. Permit 4597/Certificate 1580 was certificated for irrigation and domestic purposes for 8.9 acres of property that is within the lands to be acquired. Upon acquisition, it is recommended that the Navy prepare and file a Report of Conveyance to document its ownership interest in the subject water right.
f. Application 63886, which was filed to appropriate underground water for commercial purposes in Dixie Valley, is and has been RFP for over 20 years. Upon completing the acquisition of the subject properties, it is recommended that the Navy prepare and file a Report of Conveyance documenting its ownership interest in the subject water right application. Once the ownership interest has been established it is recommended that the Navy issue a letter to the State Engineer withdrawing this application.

We trust this summary together with the referenced documents is sufficient for your current purposes. During your review should you have any questions or require any clarifications, I trust you will not hesitate to contact me. Should you decide to accept our recommendations as listed above, we would be pleased to provide a specific proposal to accomplish the identified supplemental research and mapping efforts.

Sincerely,

R.O. ANDERSON ENGINEERING, INC.

Matthew P. Bernard, P.L.S., WRS
Director of Surveying

# APPENDIX A

# KEY WATER RIGHT TERMS

# KEY WATER RIGHT TERMS

**Abandonment (Water Right)** — (1) Generally refers to the intentional surrender of a water right by virtue of nonuse. (2) Failure to put a water right to *Beneficial Use* for generally five or more years, in which the owner of the water right states that the water right will not be used or takes such actions that would prevent the water from being beneficially used.

**Acre-Foot (AF)** — A unit commonly used for measuring the volume of water; equal to the quantity of water required to cover one acre (43,560 square feet or 4,047 square meters) to a depth of 1 foot (0.30 meter) and equal to 43,560 cubic feet (1,234 cubic meters), or 325,851 gallons

**Adjudication** — (1) Refers to a judicial process whereby water rights are determined or decreed by a court of law. (2) A court proceeding to determine all rights to the use of water on a particular stream system or within a specific ground water basin.

**Appropriation** — A granting process whereby authority is granted by a state to divert, store, or use the public waters of the state. Often used interchangeably with the terms water right and water permit. Nevada's water law is based on statutes enacted in 1903 and 1905 and are founded on the principal of *Prior Appropriation*. Unlike some other states, Nevada has a statewide system for the administration of both ground water and surface water. Appropriative water rights are based on the concept of applying water to *Beneficial Use* and *"First in Time, First in Right."* Appropriative water rights can be lost through nonuse and they may be sold or transferred apart from the land. Due in large part to the relative scarcity of water in Nevada and numerous competing uses, Nevada has had a thriving market for water transfers for a number of years. A person in Nevada who desires to place water to beneficial use must file an application with the State Engineer to initiate the process of acquiring an appropriative water right.

**Certificated Water Right** — The right granted by a state water agency to use either surface or ground water.

**CFS (Cubic Foot per Second)** — A unit of discharge for measurement of flowing liquid equal to a flow of one cubic foot per second past a given section. A rate of flow equivalent to 448.83 gallons per minute. Also written as C.F.S. and cfs.

**Decreed Rights (Water)** — Water rights determined by court decree.

**Diversion** — (1) A structure in a river or canal that diverts water from the river or canal to another watercourse. (2) The transfer of water from a stream, lake, aquifer, or other source of water by a canal, pipe, well, or other conduit to another watercourse or to the land, as in the case of an irrigation system. Also, a turning aside or alteration of the natural course of a flow of water, normally considered physically to leave the natural channel. In some states, this can be a consumptive use direct from a stream, such as by livestock watering. In other states, a diversion must consist of such actions as taking water through a canal or conduit.

**Diversion Rate** — A rate of water flow (cfs) diverted into a canal or through a farm headgate.

**Domestic Water** — Water supplied to individual dwellings and other land uses which is suitable for drinking.

**Duty (of Water)** — (1) The total volume of water per year that may be diverted under a vested water right. (2) The total volume of irrigation water required for irrigation in order to mature a particular type of crop. In stating the duty, the crop, and usually the location of the land in question, as well as the type of soil, should be specified. It also includes consumptive use, evaporation and seepage from on-farm ditches and canals, and the water that is eventually returned to streams by percolation and surface runoff

**Forfeiture (Water Right)** — (1) The loss of a water right through nonuse for a specified period of time; can occur involuntarily. (2) The invalidation of a water right because of five or more consecutive years of nonuse.

**Perfected Water Right** — (1) A completed or fully executed water right. A water right is said to have been perfected when all terms and conditions associated with it have been fully accomplished, e.g., the diversion has been affected and the water applied to beneficial use. (2) A water right to which the owner has applied for and obtained a permit, has complied with the conditions of the permit, and has obtained a license or certification of appropriation. (3) A water right which indicates that the uses anticipated by an applicant, and made under permit, were made for *Beneficial Use*. Usually it is irrevocable unless voluntarily canceled or forfeited due to several consecutive years of nonuse.

**Place of Use** — The specific location, typically documented in a water right permit, where water is applied or used. A water user cannot use water at another location without transferring the right or obtaining a new right.

**Point of Diversion** — The point from which water is diverted from a source.

**Priority** — The concept that the person first using water has a better right to it than those commencing their use later. An appropriator is usually assigned a "priority date". However, the date is not significant in and of itself, but only in relation to the dates assigned other water users from the same source of water. Priority is only important when the quantity of available water is insufficient to meet the needs of all those having a right to use water.

**Proof of Beneficial Use** — A part of the water right application and permitting process which documents that the water permitted for use has been applied to *Beneficial Use*. Generally, this process is followed by the issuance of the water right certificate (*Perfected Water Right*).

**Supplemental Sources** — When irrigation water supplies are obtained from more than one source, the source furnishing the principal supply is commonly designated the primary source, and the sources furnishing the additional supplies, the supplemental sources.

**Surface Supply (of Water) —** Water supply from streams, lakes, and reservoirs.

**Underground Water** — Water below the surface of the ground. Also referred to as *Groundwater*, *Ground Water*, *Subsurface Water*, and *Subterranean Water*.

**Vested Water Right** — (1) The water right to use either surface or ground water acquired through more or less continual beneficial use prior to the enactment of water law pertaining to the source of the water. These claims become final through *Adjudication*. (2) A fully executed or finalized appropriative right to use the waters of a state for a beneficial purpose. Also see *Certificated Water Right* and *Perfected Water Right.*

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

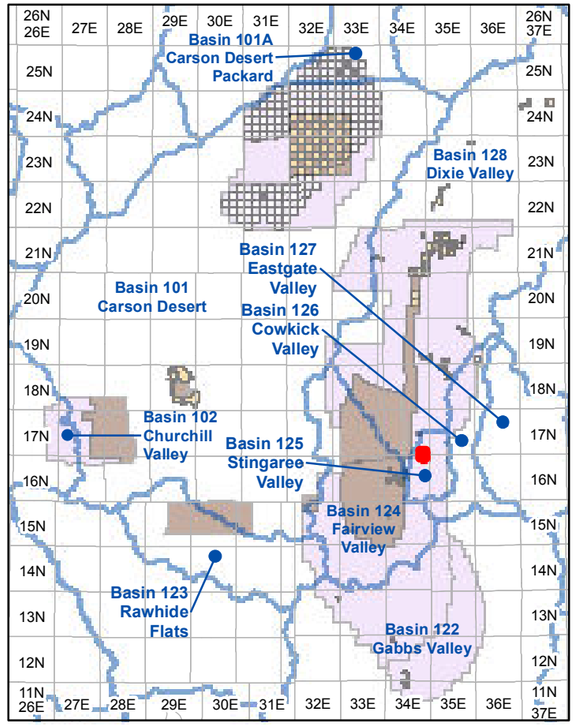

**Permit 86831**

The current owner of Permit 86831 is Michael A. Casey. The permit was approved by the State Engineer on April 11, 2018. It has a priority date of January 12, 2017 and a total duty of 20.61 acre-feet annually with an allowed diversion rate of 0.03 CFS. The permitted manner of use is for stock-watering purposes. The allowed period of use is from January 1 through December 31.

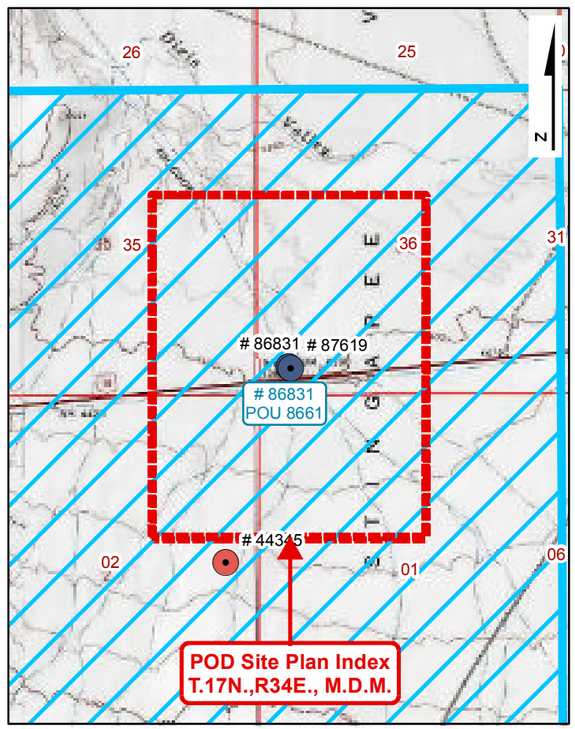

The point of diversion is located within the SW¼SW¼ Section 36, Township 17N, Range 34E, MDM. The permitted place of use is in the Stingaree Valley Basin within Churchill County APN 002-771-06 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| SW | SW | 36 | 17N | 34E | 920 cattle |

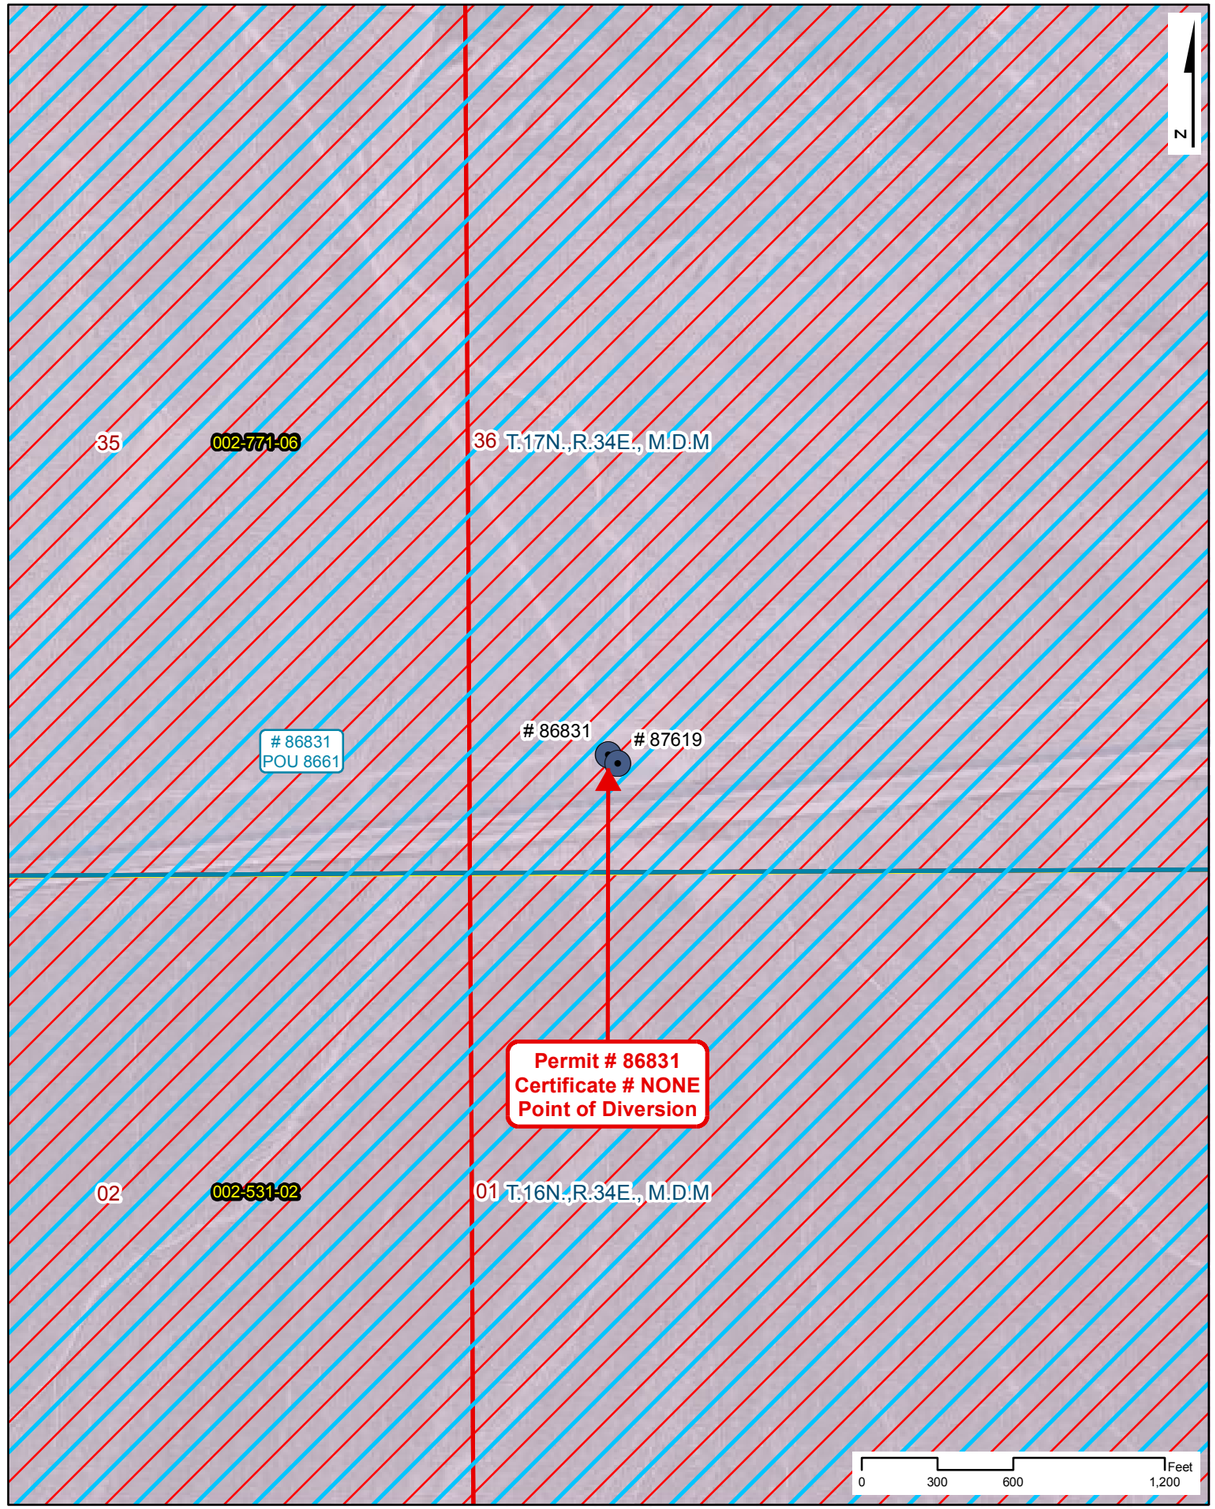

The Proof of Completion for Permit 86831 has a due date of April 11, 2020 and the Proof Beneficial Use has a due date of April 11, 2020.

**********

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.03 cubic feet per second and 20.61 acre-feet annually, or sufficient to water 920 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **April 11 2019**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **April 11 2020**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 11th day of **April, 2018**

PE

State Engineer

Application No. 86831

AMENDED

# APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR OFFICE USE ONLY

Date of Filing in State Engineer's Office JAN 12 2017

Returned to applicant for correction

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

RECEIVED
2017 FEB -1 AM 11:53
STATE ENGINEER'S OFFICE

1. The source of water is underground
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.10 second feet
   One second foot equals 448.83 gallons per minute.
   (a) If stored in a reservoir give the number of acre-feet
3. The water is to be used for livestock watering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated
   (b) Stockwater, state number and kind of animals Cattle 920
   (c) Other use (describe fully in No. 12)
   (d) Power:
      (1) Horsepower developed
      (2) Point of return of water to stream

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)
T. 17N R 34E MDB&M in the SW1/4 SW1/4 Sec 36 or at a point from the which the SE Corner of Section 36 T17N R34E MDB.M bears S. 84 decrees 40'27" E 4740.5 Feet

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)
T17N R34E Sec 35 and 36
T16N R34E Sections. 1, 2, 11, 12, 13, 14, 23, 24, 25, 26, 27 34, 35 and 36
T.15N R34E Sections 2, 3, 10, 11, 14, 15, 16, 21, 22, 23, 26 27, 28, 33, 34 and 35 MDB.M

7. Use will begin about Oct 15th (Month and Day) and end about May 1st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.) Well is existing
Diversion 1½ hp submersable Pump. Discharged Directly into storage tanker on Water truck

9. Estimated cost of works: $5,000

10. Estimated time required to construct works: 1yr (If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 1yr

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)
Haul water to cattle in a water tanker. Storage to water also in tanker truck or directly into water truck.

13. Miscellaneous remarks:

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

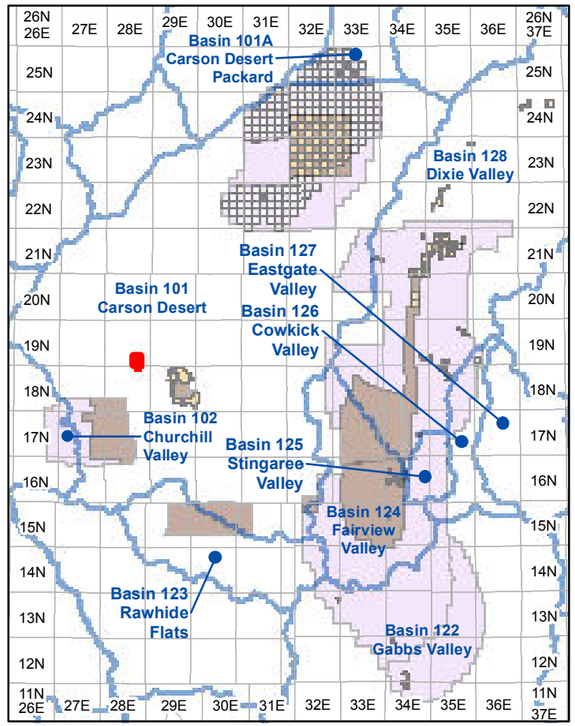

**Permit 87043**

The current owner of Permit 87043 is Churchill County. The permit was approved by the State Engineer on May 30, 2018. It has a priority date of June 12, 1987 and a total duty of 7.18 acre-feet annually with an allowed diversion rate of 0.01 CFS. The permitted manner of use is for municipal purposes. The allowed period of use is from January 1 through December 31.

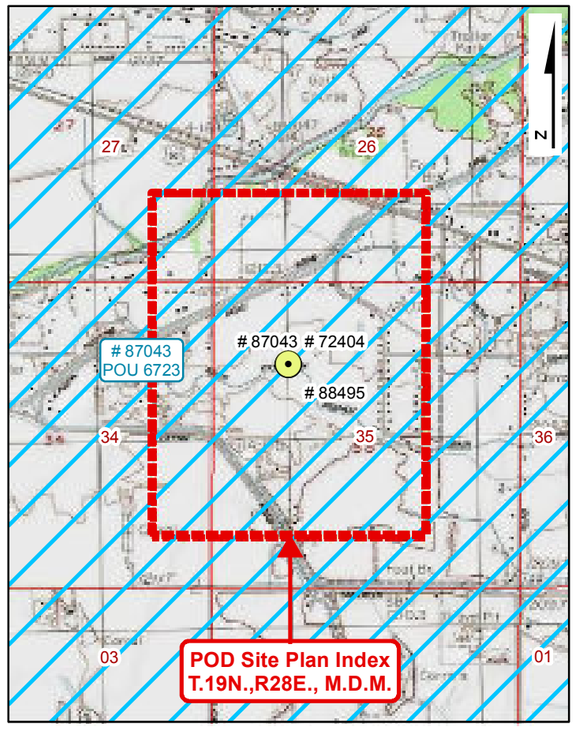

The point of diversion is located within the SW¼NW¼ Section 35, Township 19N, Range 28E, MDM. The permitted place of use is in the Carson Desert Basin within Churchill County and is more specifically listed in the table below.

| Section(s) | Township | Range |
|---|---|---|
| 1- 4, E½5, E⅛8, 9-16, E½17, E½20, 21-28, E½29, E½32, 33-36 | 20N | 26E |

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion, place and manner of use of the waters of an underground source as heretofore granted under Permit 51020, Certificate 12233, is issued subject to the terms and conditions imposed in said Permit 51020, Certificate 12233 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

Any well drilled under this permit shall be drilled in what has been described in the United States Geological Survey Water Supply Paper 2263 as the intermediate alluvial aquifer. In no instance shall the seal on this well be less than 100 feet below ground level

Pursuant to NRS 534.110(3), monthly records shall be kept of the effect of pumping this well on other previously existing wells that are located within 2,500 feet of this well and reported to the State Engineer on an annual basis by February 15th of the following year. Any pumping of water in this well may be limited or prohibited to prevent any unreasonable adverse effects on an existing domestic well located within 2,500 feet of this well, unless the holder of this permit and the owner of the domestic well have agreed to alternative measures that mitigate adverse effects.

If any water under this permit is cancelled or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

(Continued on Page 2)

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.01 cubic feet per second or 7.18 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **May 30 2019**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **May 30 2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 30th day of **May, 2018**

J. K. P.E.

State Engineer

STATE OF NEVADA

Application No. **87043**

# APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

THIS SPACE FOR OFFICE USE ONLY

Date of filing in State Engineer's Office MAR 3 1 2017

Returned to applicant for correction

Corrected application filed Map filed Mar. 23, 2005 Under 72404

The applicant Valverde, Alfred E. & Glenn R. Brown

755 Rutherford Cr. (Street Address or PO Box) of Brentwood (City or Town)

CA 94513 (State and ZIP Code) valverde@sbcglobal.net (E-mail Address)

hereby make(s) application for permission to change the

☑ Point of diversion ☑ Place of use ☑ Manner of use ☐ of a portion

of water heretofore appropriated under (Identify existing rights by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree and identify right in Decree.)

Permit 51020, Certificate 12233

1. The source of water is Underground
   Name of stream, lake, underground, spring or other sources.

2. The amount of water to be changed 0.01 cfs, not to exceed 2.341 MGA
   Second feet, acre-feet. One second foot equals 448.83 gallons per minute.

3. The water to be used for Municipal
   Irrigation, power, mining, commercial, etc. If for stock, state number and kind of animals. Must limit to one major use

4. The water heretofore used for Quasi-municipal
   If for stock, state number and kind of animals.

5. The water is to be diverted at the following point (Describe as being within a 40-acre subdivision of public survey and by course and distance to a found section corner. If on unsurveyed land, it should be stated )

SW1/4 NW1/4 Section 35, T.19N., R.28E., M.D.B.&M. or at a point from which the NW Corner of said Section 35 bears N. 42 degrees 50' 39" W. a distance of 1,973.0 feet. See map accompanying Permit 72404 for proposed POD at Churchill County's Sandcreek municipal well.

6. The existing point of diversion is located within (If point of diversion is not changed, do not answer.)

SW1/4 SE1/4 Section 26, T.19N., R.28E., M.D.B.&M. or at a point from which the S1/4 Corner of said Section 26 bears S. 0 degrees, 55' 18" W. a distance of 959.09 feet. See map accompanying Permit 51020 for existing POD serving the Casey Road mobile home park, PWS#0059.

8-10
ch

7. Proposed place of use (Describe by legal subdivisions. If for irrigation, state number of acres to be irrigated.)

See Exhibit "A". Refer to sheet 3 of 3 map accompanying permit 76541 for depiction of Churchill County's municipal place of use. Water under this change application will be used to satisfy the the will serve requirement for the Casey Road MHP consisting of 6 connections located on APN 008-361-11.

8. Existing place of use (Describe by legal subdivisions. If changing place of use and/or manner of use of irrigation permit, describe acreage to be removed from irrigation.)

1.87 acres within portions of SE1/4 SW1/4 & SW1/4 SE1/4 of Section 26, T.19N., R.28E. M.D.B.&M. (APN 008-361-11). See map filed under 51020 for existing POU.

9. Proposed use will be from January 1 (Month and Day) to December 31 (Month and Day) of each year.

10. Existing use permitted from January 1 (Month and Day) to December 31 (Month and Day) of each year.

11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e., diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

Existing Churchill County Sandcreek municipal well, treatment system, tanks, pumps & distribution system.

12. Estimated cost of works Complete

13. Estimated time required to construct works Complete
(If well completed, describe well.)

14. Estimated time required to complete the application of water to beneficial use 3 years

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

The Casey Road MHP (PWS#0059) has had a number of coliform & loss of pressure violations requiring boil water notices from NDEP. Churchill County has secured funding through the NDEP Clean Water State Revolving Fund (CWSRF) & will be connecting the MHP to their municipal water & sewer system within the next 30-45 days. This water right will be conveyed to Churchill County to satisfy the MHP will serve requirement.

16. Miscellaneous remarks:

Existing well will be abandoned by Parsons Drilling within 60 days following connection to Churchill County's municipal system. This application has been discussed with Mike Randall in a tel-con on 3/29/17.

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

**Permit 87619**

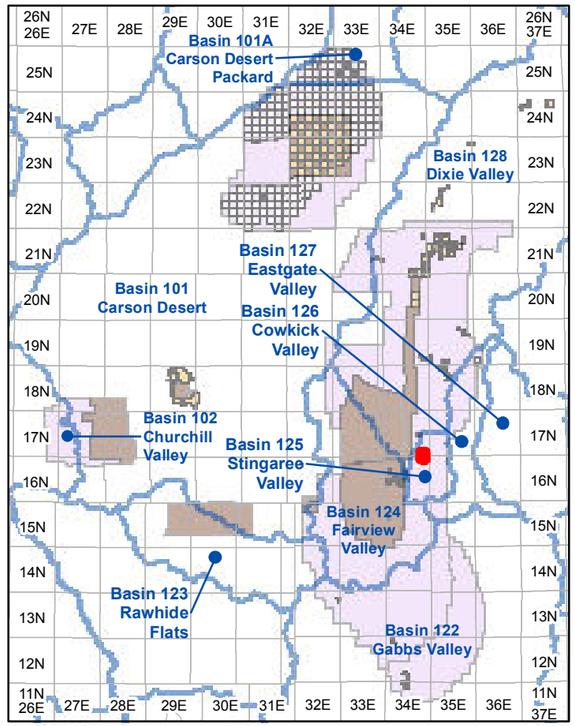

The current owner of Permit 87619 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on May 29, 2019. It has a priority date of January 29, 2018 with an allowed diversion rate of 0.017 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Permit 87619 and 87676 shall not exceed 11.96 acre-feet annually. The allowed period of use is from January 1 through December 31.

The point of diversion is located within the SW¼SW¼ Section 36, Township 17N, Range 34E, MDM. The permitted place of use includes the entire Dixie Creek Allotment within Churchill County and is more specifically listed in the following table.

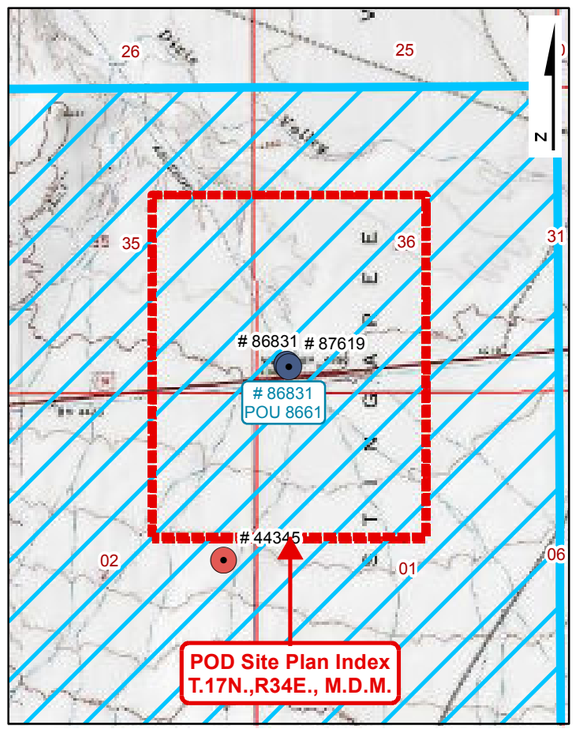

The Proof of Completion for Permit 87619 has a due date of May 29, 2020. The Proof Beneficial Use has a due date of May 29, 2021.

| **Period of Use:** | **JANUARY 1ST THROUGH DECEMBER 31ST** |
| **Priority Date:** | **01/29/2018** |

**********

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permits 87619 and 87676 shall not exceed 11.96 acre-feet annually, or sufficient to water 533 head of cattle.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.017 cubic feet per second and 11.96 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **May 29 2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **May 29 2021**

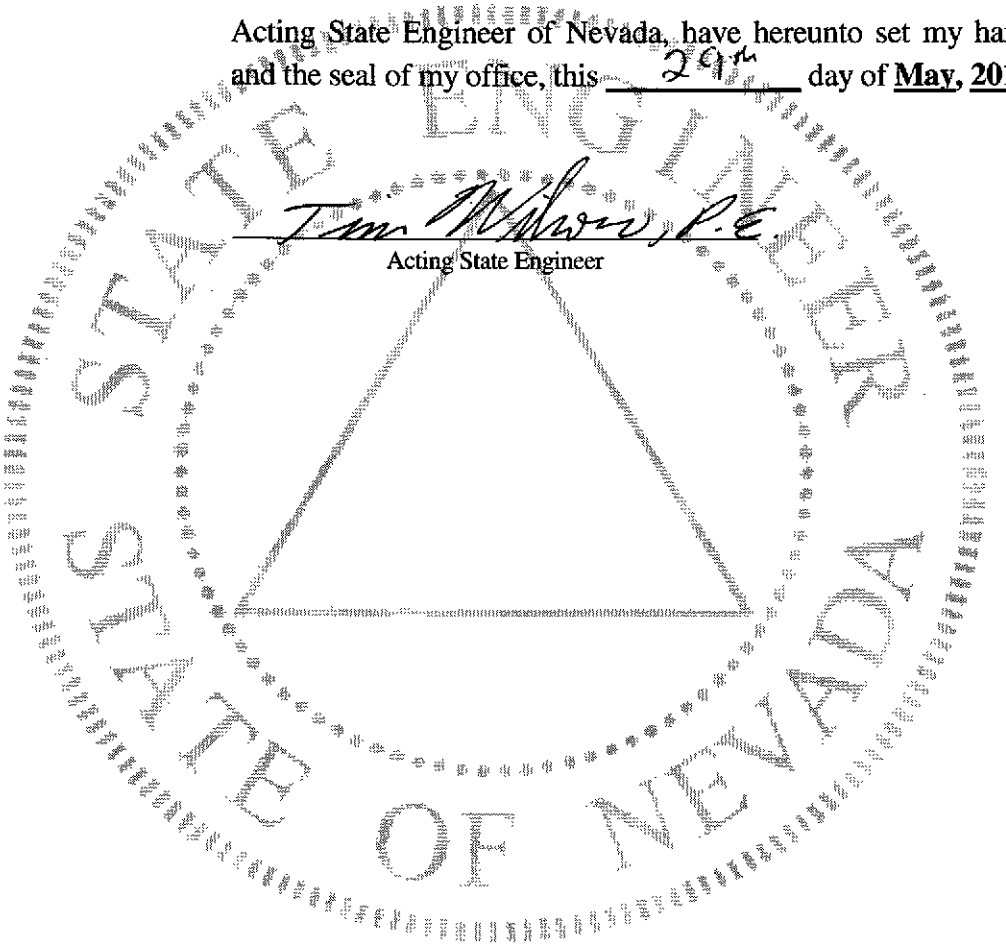

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **May, 2019**

Tim Wilson, P.E.

Acting State Engineer

Application No. 87619

# APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR OFFICE USE ONLY

Date of Filing in State Engineer's Office JAN 29 2018

Returned to applicant for correction

Corrected Application filed _____ Map filed Sept. 22, 1981 Under 44344

The applicant BENCH CREEK RANCH CO, LLC.

943 Edgecliff Drive (Street Address or P.O. Box) of Reno (City or Town)

NV 89523 (State and ZIP Code) _____ (E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated.

(If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

RECEIVED 2018 JAN 29 PM 1:12 STATE ENGINEER'S OFFICE

1. The source of water is Underground (Chalk Mtn. Well)
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12)
   (d) Power:
      (1) Horsepower developed
      (2) Point of return of water to stream

Revised 06/17

Stingaree Valley 10-125 Ch

87619

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the SW¼ SW¼ of Section 36, T. 17 N., R. 34 E., M.D.B.&M., or at a point from which the SE Corner of said Section 36 bears S. 84° 40' 27" E, a distance of 4,740.50 feet. (Please see map filed under 44344).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

Please See "Attachment A" and map accompanying this application.

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Well, Pump, Electrical, Generator, 10 miles of pipeline, and trough system already in place. No additional works are proposed at this time.

9. Estimated cost of works: $0.00

10. Estimated time required to construct works: N/A - Works complete
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 2 Years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Please See "Attachment B".

13. Miscellaneous remarks:

Please See "Attachment B".

## Attachment B

**12. Provide a detailed description of the proposed project and its water usage.**

Well Location is within the Dixie Valley Grazing Allotment. Well, pipeline, and trough system has historically been in place and supplied water for cattle in the Dixie Valley Grazing Allotment through the Chalk Mtn. Pipeline since the 1960s. Per discussions with the Applicant, this pipeline is almost 10 miles long, and is connected to a number of trough stations. Alternatively water can be pumped into a water truck for delivery to any number of troughs within the Dixie Valley Grazing Allotment. For this reason the entire proposed POU is the entire Dixie Valley Grazing Allotment. Water is pumped using mobile generators. Please see attached image for BLM Chalk Mtn. Pipeline Marker (BLM Project No. 4085) dated 1967. Additionally the approximate Chalk Mtn. Pipeline and Trough locations can be seen on an Easement Map (Churchill County Document No. 458444 recorded on 12/28/2016). A copy of Document No. 458444 with the Chalk Mtn. Pipeline highlighted has been attached to this application.

**13. Miscellaneous remarks:**

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

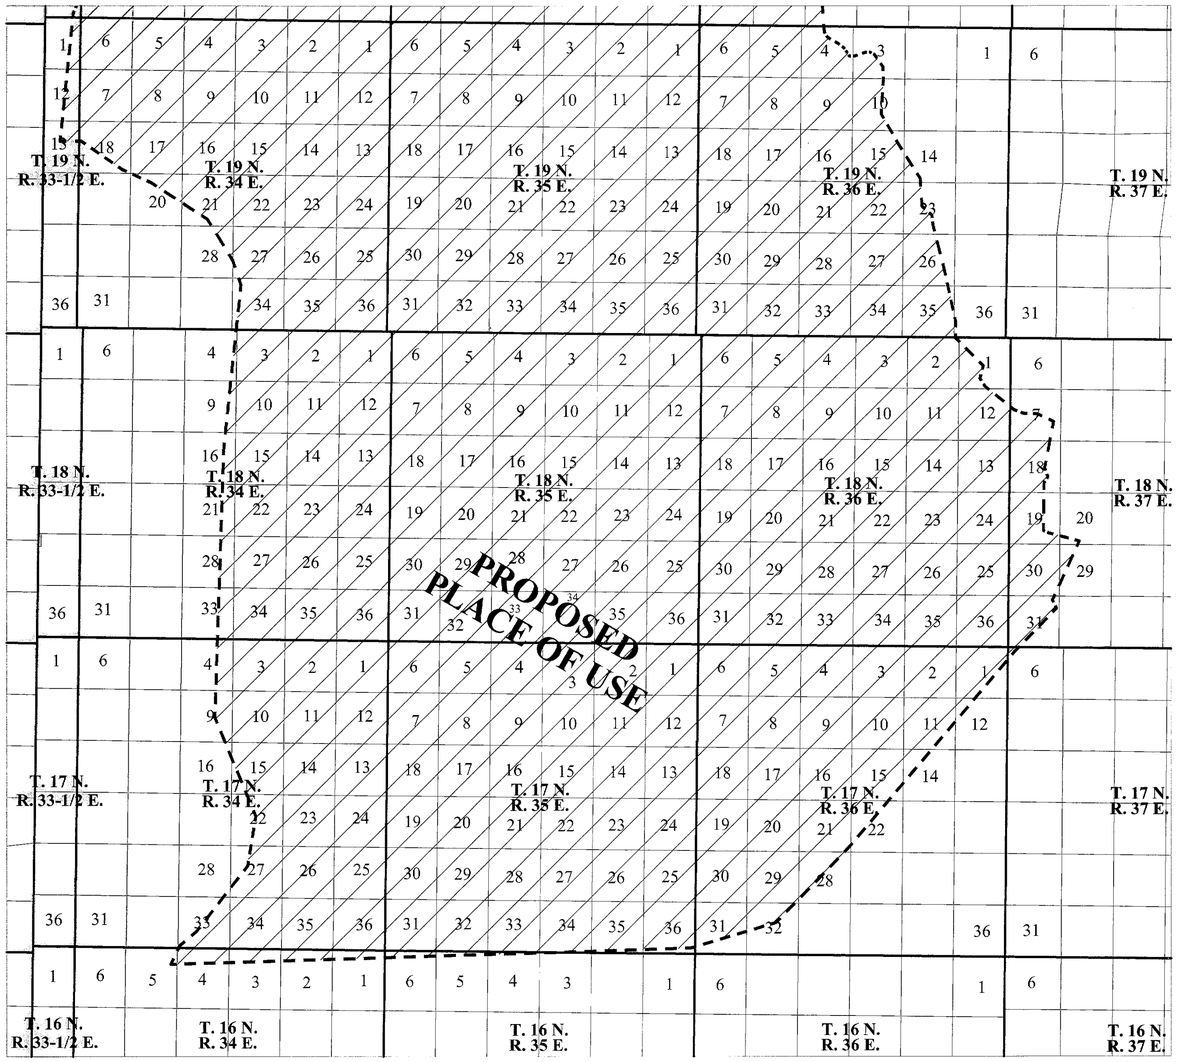

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

# NAVAL FACILITIES ENGINEERING COMMAND
# CONTRACT# N62473-17-D-4631
## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

**Permit 87676**

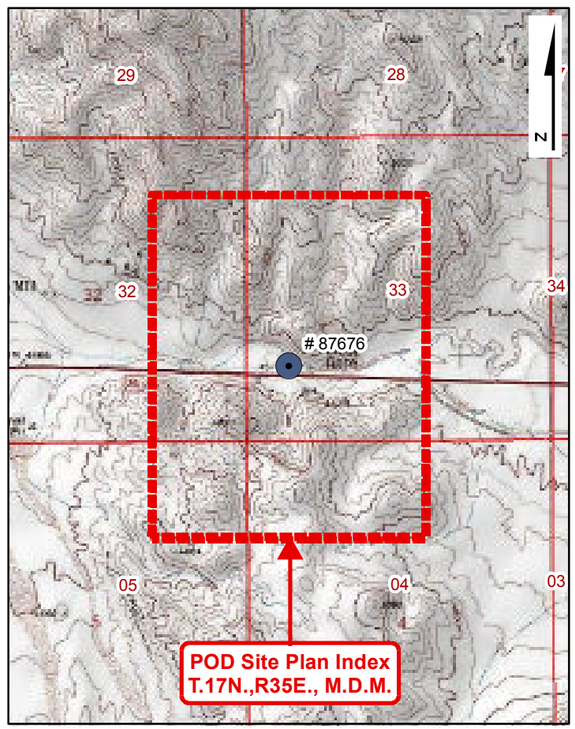

The current owner of Permit 87676 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on May 29, 2019. It has a priority date of February 13, 2018 with an allowed diversion rate of 0.017 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Permit 87619 and 87676 shall not exceed 11.96 acre-feet annually. The allowed period of use is from January 1 through December 31.

The point of diversion is located within the SW¼SW¼ Section 33, Township 17N, Range 35E, MDM. The permitted place of use includes the entire Dixie Creek Allotment within Churchill County, the same as listed in the table for Permit 87619.

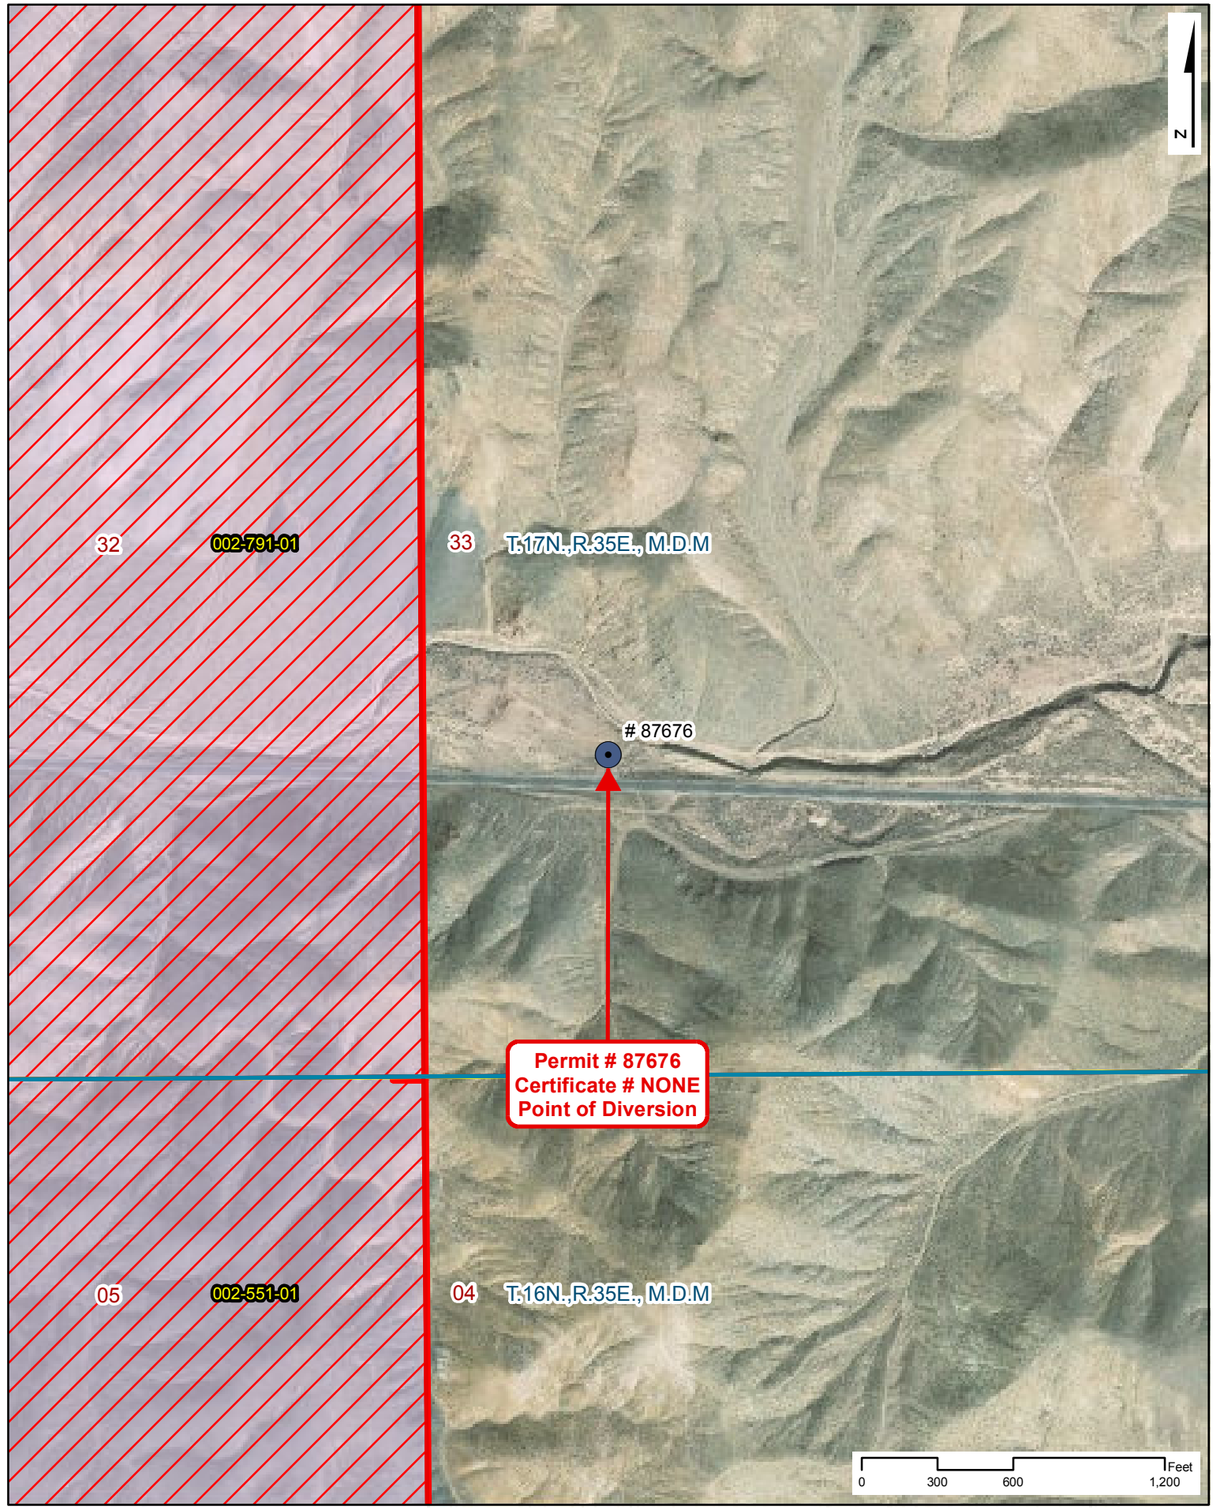

The Proof of Completion for Permit 87676 has a due date of May 29, 2020. The Proof Beneficial Use has a due date of May 29, 2021.

| **Period of Use:** | **JANUARY 1ST THROUGH DECEMBER 31ST** |
| **Priority Date:** | **02/13/2018** |

**********

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permits 87619 and 87676 shall not exceed 11.96 acre-feet annually, or sufficient to water 533 head of cattle.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.017 cubic feet per second and 11.96 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **May 29 2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **May 29 2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **May, 2019**

Tim Wilson, P.E.
Acting State Engineer

STATE ENGINEER STATE OF NEVADA

Application No. 87678

# APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR OFFICE USE ONLY

Date of Filing in State Engineer's Office FEB 13 2018

Returned to applicant for correction _____

Corrected Application filed _____ Map filed FEB 13 2018

The applicant BENCH CREEK RANCH CO, LLC.

943 Edgecliff Drive (Street Address or P.O. Box) of Reno (City or Town)

NV 89523 (State and ZIP Code) _____ (E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated.

(If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co. LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

RECEIVED
2018 FEB 13 P 12:56
STATE ENGINEERS OFFICE

1. The source of water is Underground (West Gate Well)
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet _____
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated _____
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12) _____
   (d) Power:
      (1) Horsepower developed _____
      (2) Point of return of water to stream _____

Revised 06/17

10-125 CH

87676

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the SW¼ SW¼ of Section 33, T.17N., R.35E., M.D.B.&M., or at a point from which the SE corner of Section 34, T.17N., R.35E., M.D.B.&M. bears S. 82° 38' 0.57" E., a distance of 9,910.3 feet. (Please see map accompanying this application).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

The proposed place of use is the entire Dixie Valley Grazing Allotment. Please See "Attachment A" accompanying this application, and the map filed under 87619.

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Well, Pump, Windmill, and Stone Holding Tank already in place. No additional works are proposed at this time.

9. Estimated cost of works: $0.00

10. Estimated time required to construct works: N/A - Works complete
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 2 Years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Please See "Attachment B".

13. Miscellaneous remarks:

Please See "Attachment B".

## Attachment B

**12. Provide a detailed description of the proposed project and its water usage.**

The well location is within the Dixie Valley Grazing Allotment. This well has historically been used for stockwater and domestic use since at least 1905. Currently this well is used to supply water for stock within the Dixie Valley Grazing Allotment. A windmill is currently hooked up to the well and pumps water into a stone holding trough. Alternatively water can be placed into a water truck for delivery to any number of troughs within the Dixie Valley Grazing Allotment. For this reason the entire proposed POU is the entire Dixie Valley Grazing Allotment.

**13. Miscellaneous remarks:**

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

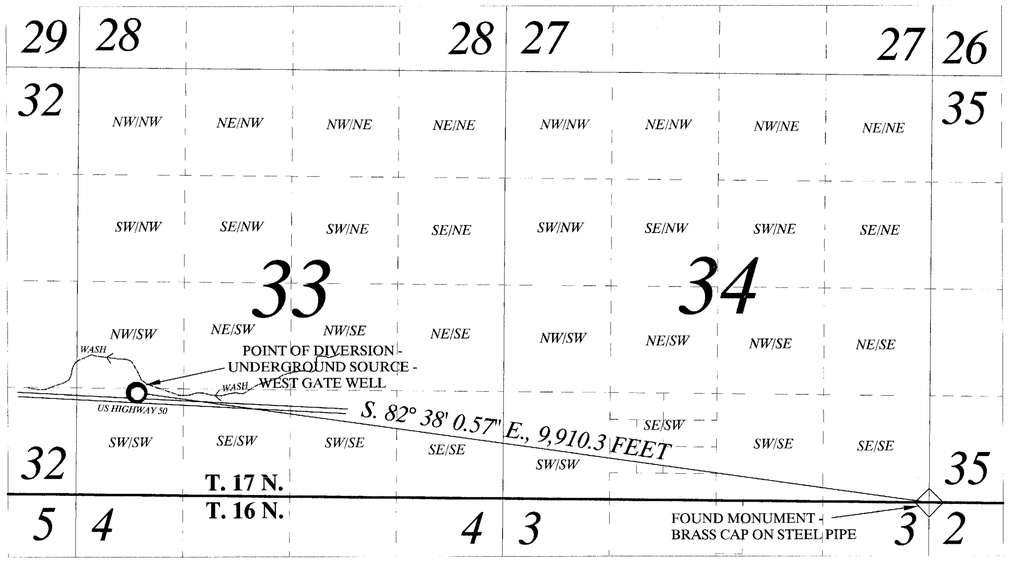

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

RECEIVED
2010 FEB 19 P12:56
STATE ENGINEERS OFFICE

Please note that Permit 4905 / Certificate 2009 is certificated for 0.04 cfs or sufficient water for 1,280 cattle or 6,400 sheep on the West Gate Well. Application 4905 was filed in 1918 and certificated in 1933 for stockwater use. Permit 4905 / Certificate 2009 is still in the original applicant's name (Williams Estate Company). Since Bench Creek Ranch does not own the land where the well is located, and is only the Holder of the grazing allotment permit, no chain of title documents were identified which could link the Bench Creek Ranch Co, LLC to the original holders of Permit 4905 / Certificate, even though they are the successors for the use of the well and the water rights associated with the Westgate Well. This application will not cause any additional strain on the Westgate well and groundwater system, other than what has historically been used at the Westgate well under Permit 4905 / Certificate 2009. The

only reason this application is being filed because no chain of title documents were found between the Williams Estate Company and Bench Creek Ranch Co., LLC. If such documents were found, then a Report of Conveyance and Abstract of Title to update title for Permit 4905 / Certificate 2009 would be filed instead of this Application for Appropriation.

# CONTRACT# N62473-17-D-4631
## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

**Permit 87760**

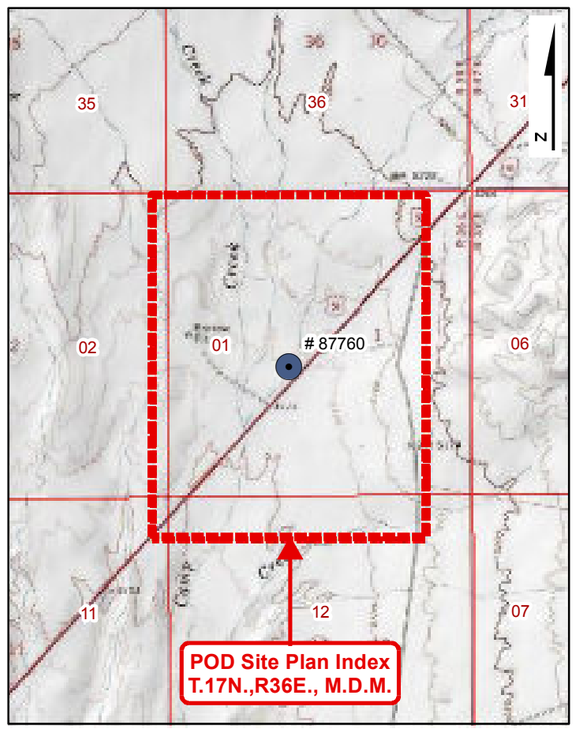

The current owner of Permit 87760 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on April 5, 2019. It has a priority date of March 12, 2018 with an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Permit 87759, 87760 and 87761 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

The point of diversion is located within the NE¼SW¼ Section 1, Township 17N, Range 36E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County, the same as listed in the table for Permit 87619.

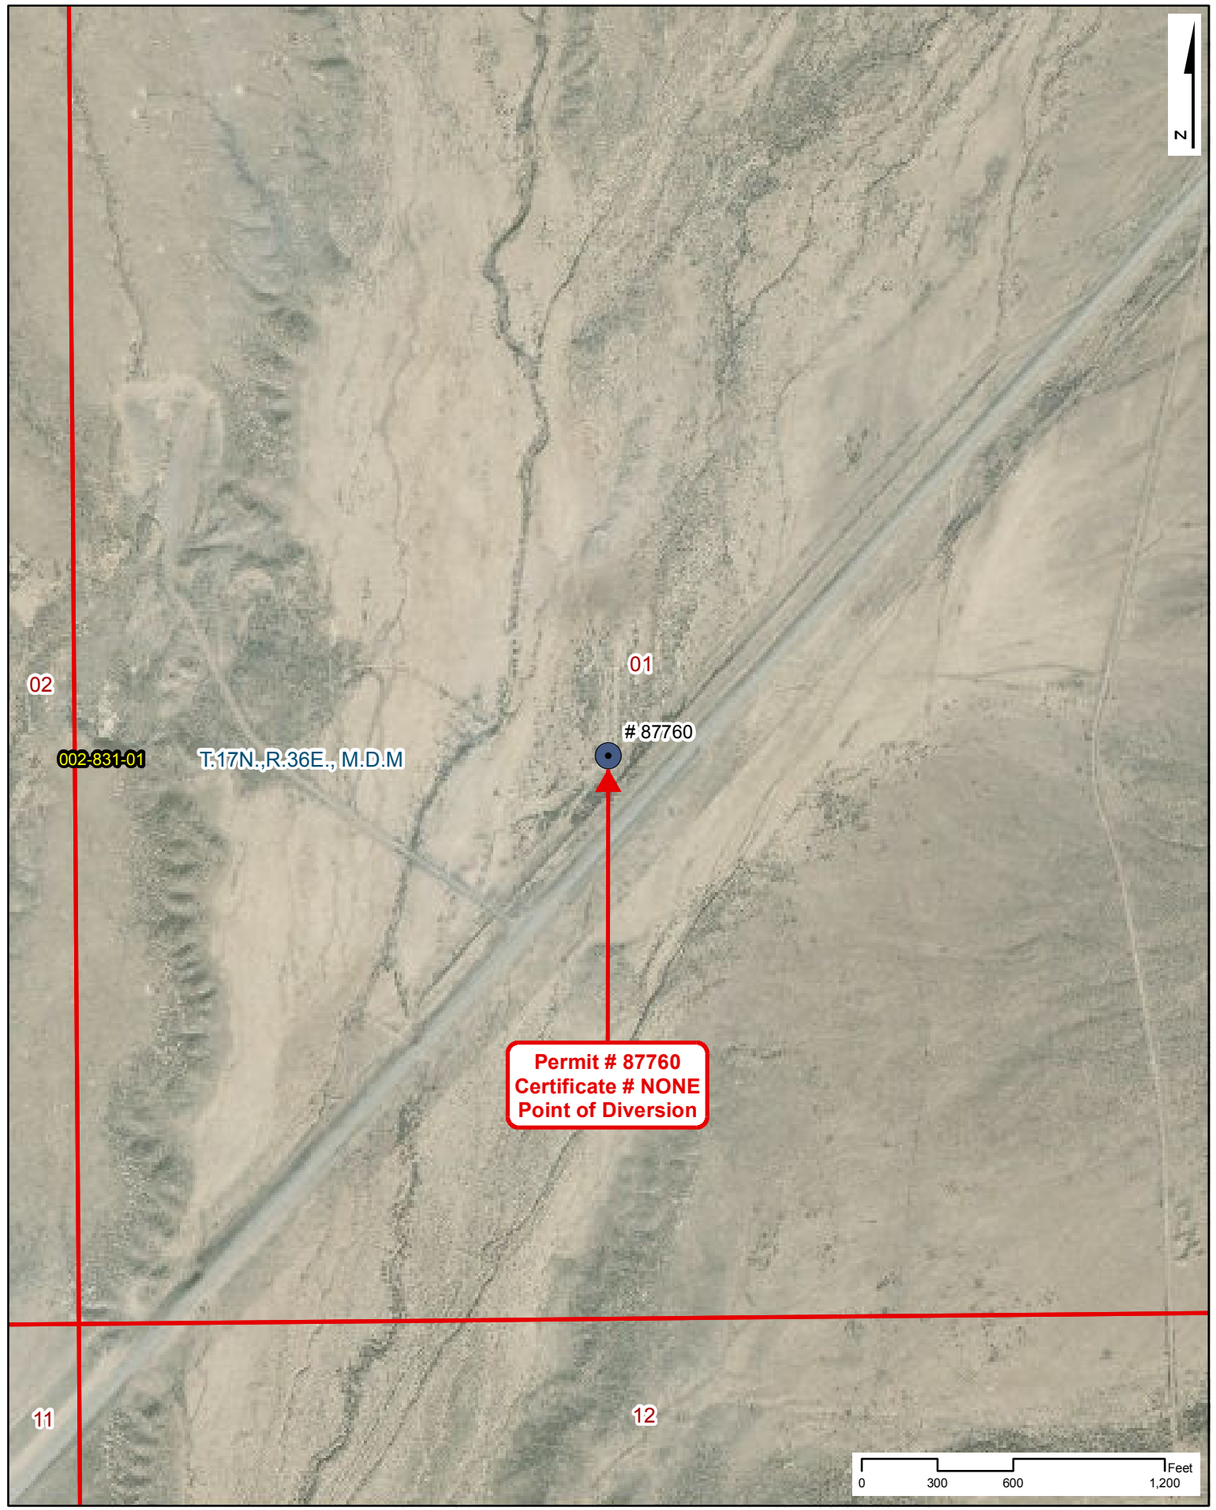

The Proof of Completion for Permit 87760 has a due date of April 5, 2020. The Proof Beneficial Use has a due date of April 5, 2021.

## PERMIT TO APPROPRIATE WATER

| | |
|---|---|
| **Name of Permittee:** | **BENCH CREEK RANCH CO, LLC** |
| **Source:** | **UNDERGROUND (CAMP CREEK WELL)** |
| **Basin:** | **EASTGATE VALLEY AREA** |
| **Manner of Use:** | **STOCKWATERING** |
| **Period of Use:** | **JANUARY 1ST THROUGH DECEMBER 31ST** |
| **Priority Date:** | **03/12/2018** |

**********

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permits 87759, 87760 and 87761 shall not exceed 11.94 acre-feet annually or sufficient to water 533 head of cattle.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **April 5 2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **April 5 2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 5th day of **April, 2019**

Tim Wilson, P.E.

Acting State Engineer

STATE ENGINEER STATE OF NEVADA

Application No. 87760

# APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR OFFICE USE ONLY

Date of Filing in State Engineer's Office MAR 12 2018

Returned to applicant for correction

Corrected Application filed _____ Map filed MAR 12 2018

The applicant BENCH CREEK RANCH CO, LLC.

943 Edgecliff Drive (Street Address or P.O. Box) of Reno (City or Town)

NV 89523 (State and ZIP Code) _____ (E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

---

1. The source of water is Underground (Camp Creek Well)
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet _____
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated _____
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12) _____
   (d) Power:
      (1) Horsepower developed _____
      (2) Point of return of water to stream _____

Revised 06/17

10-127

87760

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the NE¼ SW¼ of Section 1, T.17N., R.36E., M.D.B.&M., or at a point from which the N¼ corner of Section 20, T.18N., R.37E., M.D.B.&M. bears N. 30° 14' 23.24" E., a distance of 21,870.0 feet. (Please see map accompanying this application).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

The proposed place of use is the entire Dixie Valley Grazing Allotment. Please See "Attachment A" accompanying this application, and the map filed under 87619.

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Well, Pump, Mobile Generators, Pipeline, Steel Holding Tank, and Troughs already in place. No additional works are proposed at this time.

9. Estimated cost of works: $0.00

10. Estimated time required to construct works: N/A - Works complete
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 2 Years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary). (Failure to provide a detailed description may cause a delay in processing.)

Please See "Attachment B".

## Attachment B

**12. Provide a detailed description of the proposed project and its water usage.**

The well location is within the Dixie Valley Grazing Allotment. This well has historically been used for stockwater to serve animals within the Dixie Valley Grazing Allotment. The date of installation of the well and diversion works is unknown; however, a field visit revealed that the well has been in use for quite some time (prior to acquisition of the Grazing allotment by the Applicant).

Currently this well is used to supply water for stock within the Dixie Valley Grazing Allotment using mobile generators. A mobile generator is hooked up to the well and pumps water into a steel holding tank and trough system. The trough has a float shutoff system to prevent waste. Alternatively water can be placed into a water truck for delivery to any number of troughs within the Dixie Valley Grazing Allotment. For this reason the entire proposed POU is the entire Dixie Valley Grazing Allotment.

**13. Miscellaneous remarks:**

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

Calculation of 5 Additional Cattle Allowed 31 days of the year:

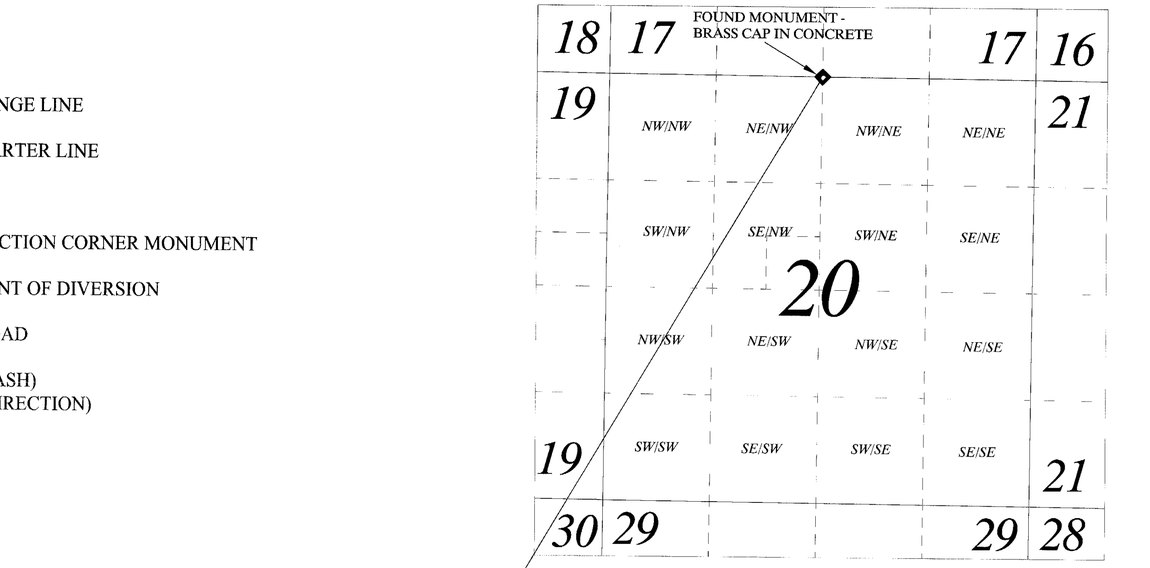

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

**Permit 87761**

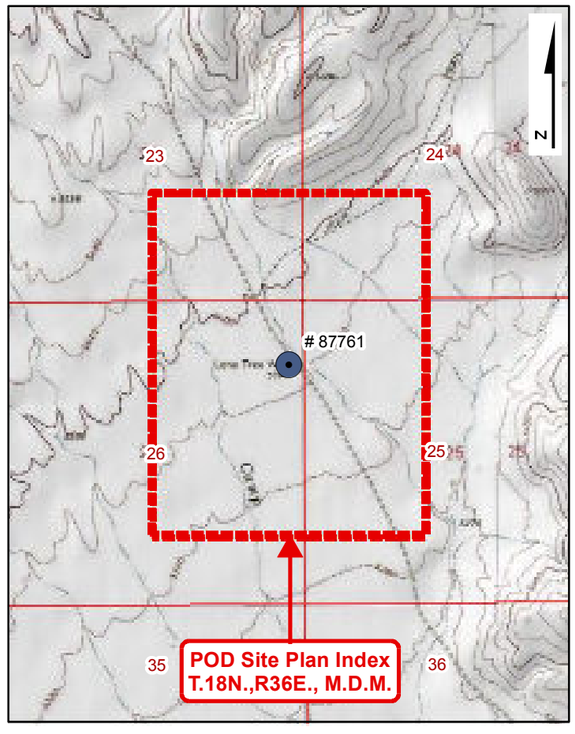

The current owner of Permit 87761 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on April 5, 2019. It has a priority date of March 12, 2018 with an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Permit 87759, 87760 and 87761 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

The point of diversion is located within the NE¼NE¼ Section 26, Township 18N, Range 36E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County, the same as listed in the table for Permit 87619.

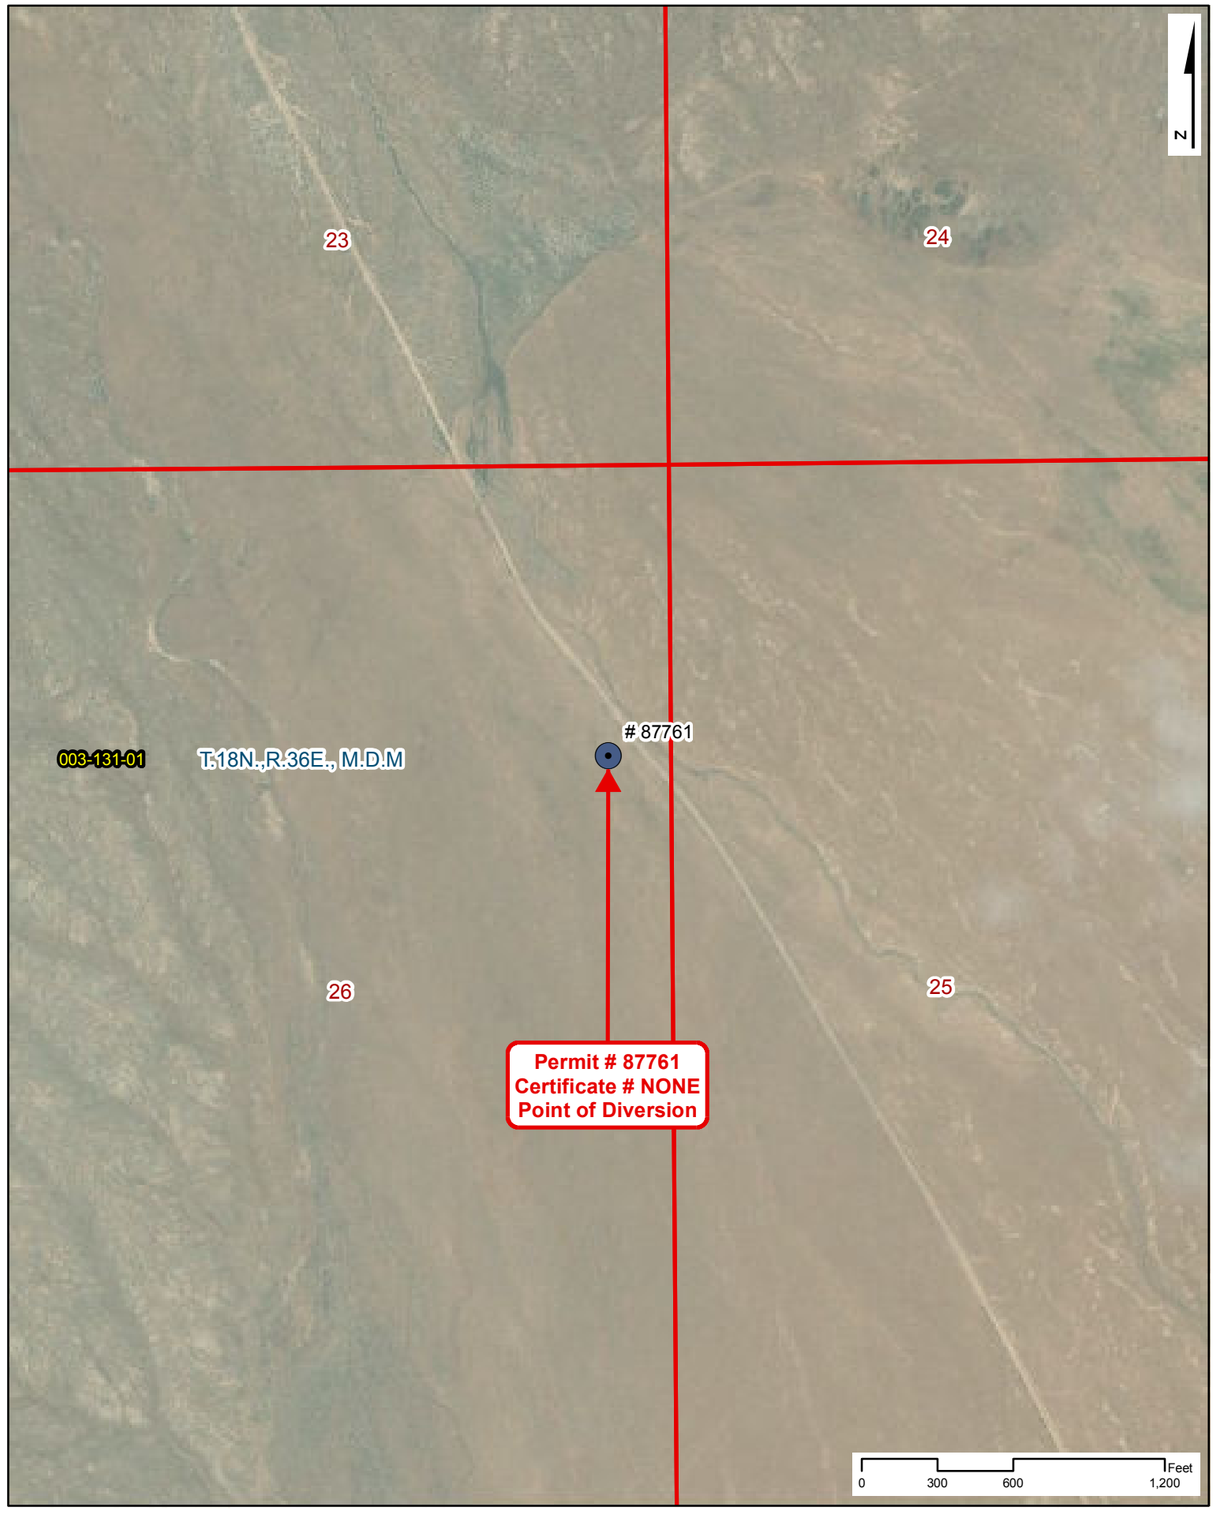

The Proof of Completion for Permit 87761 has a due date of April 5, 2020. The Proof Beneficial Use has a due date of April 5, 2021.

**********

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permits 87759, 87760 and 87761 shall not exceed 11.94 acre-feet annually or sufficient to water 533 head of cattle.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **April 5 2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **April 5 2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 5th day of **April, 2019**

NV 89523 (State and ZIP Code)

(E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC, is a Domestic Limited- Liability Company registered in Nevada since 2006.

RECEIVED
2018 MAR 12 PM 2:50
STATE ENGINEER'S OFFICE

1. The source of water is Underground (Lone Tree Well)
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12)
   (d) Power:
      (1) Horsepower developed
      (2) Point of return of water to stream

Revised 06/17

10-127
ch

87761

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the NE¼ NE¼ of Section 26, T.18N., R.36E., M.D.B.&M., or at a point from which the N¼ corner of Section 20, T.18N., R.37E., M.D.B.&M. bears N. 64° 17' 53.49" E., a distance of 14,820.7 feet. (Please see map accompanying this application).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

The proposed place of use is the entire Dixie Valley Grazing Allotment. Please See "Attachment A" accompanying this application, and the map filed under 87619.

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Well, Pump, and electrical is already in place. Mobile generators will be brought in to use the well. No additional works are proposed at this time.

9. Estimated cost of works: $0.00

10. Estimated time required to construct works: N/A - Works complete
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 2 Years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Please See "Attachment B".

**Attachment B**

**12. Provide a detailed description of the proposed project and its water usage.**

The well location is within the Dixie Valley Grazing Allotment. This well was installed as BLM Project No. 555 (Lone Tree Well) in 1967 (according to an Aluminum BLM Stamped Cap found at the well's location during a field visit to the well in January of 2018). A photo of the BLM project marker has been attached to this application.

This well will be used to supply water for stock within the Dixie Valley Grazing Allotment using mobile generators. Water will be placed into a water truck for delivery to any number of troughs within the Dixie Valley Grazing Allotment. For this reason the entire proposed POU is the entire Dixie Valley Grazing Allotment.

**13. Miscellaneous remarks:**

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

**Permit 87771**

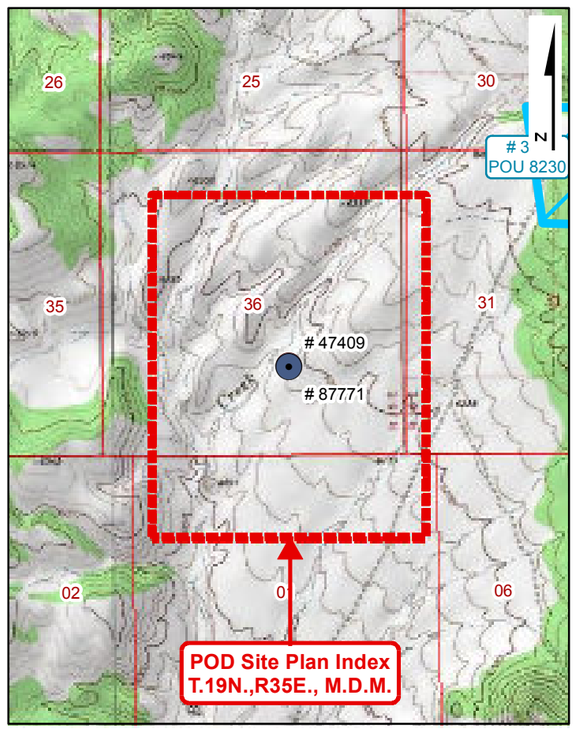

The current owner of Permit 87771 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on April 5, 2019. It has a priority date of March 12, 2018 with an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Permit 75573/Certificate 19262, Permit 87758 and 87771 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

The point of diversion is located within the NW¼SE¼ Section 36, Township 19N, Range 35E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County, the same as listed in the table for Permit 87619.

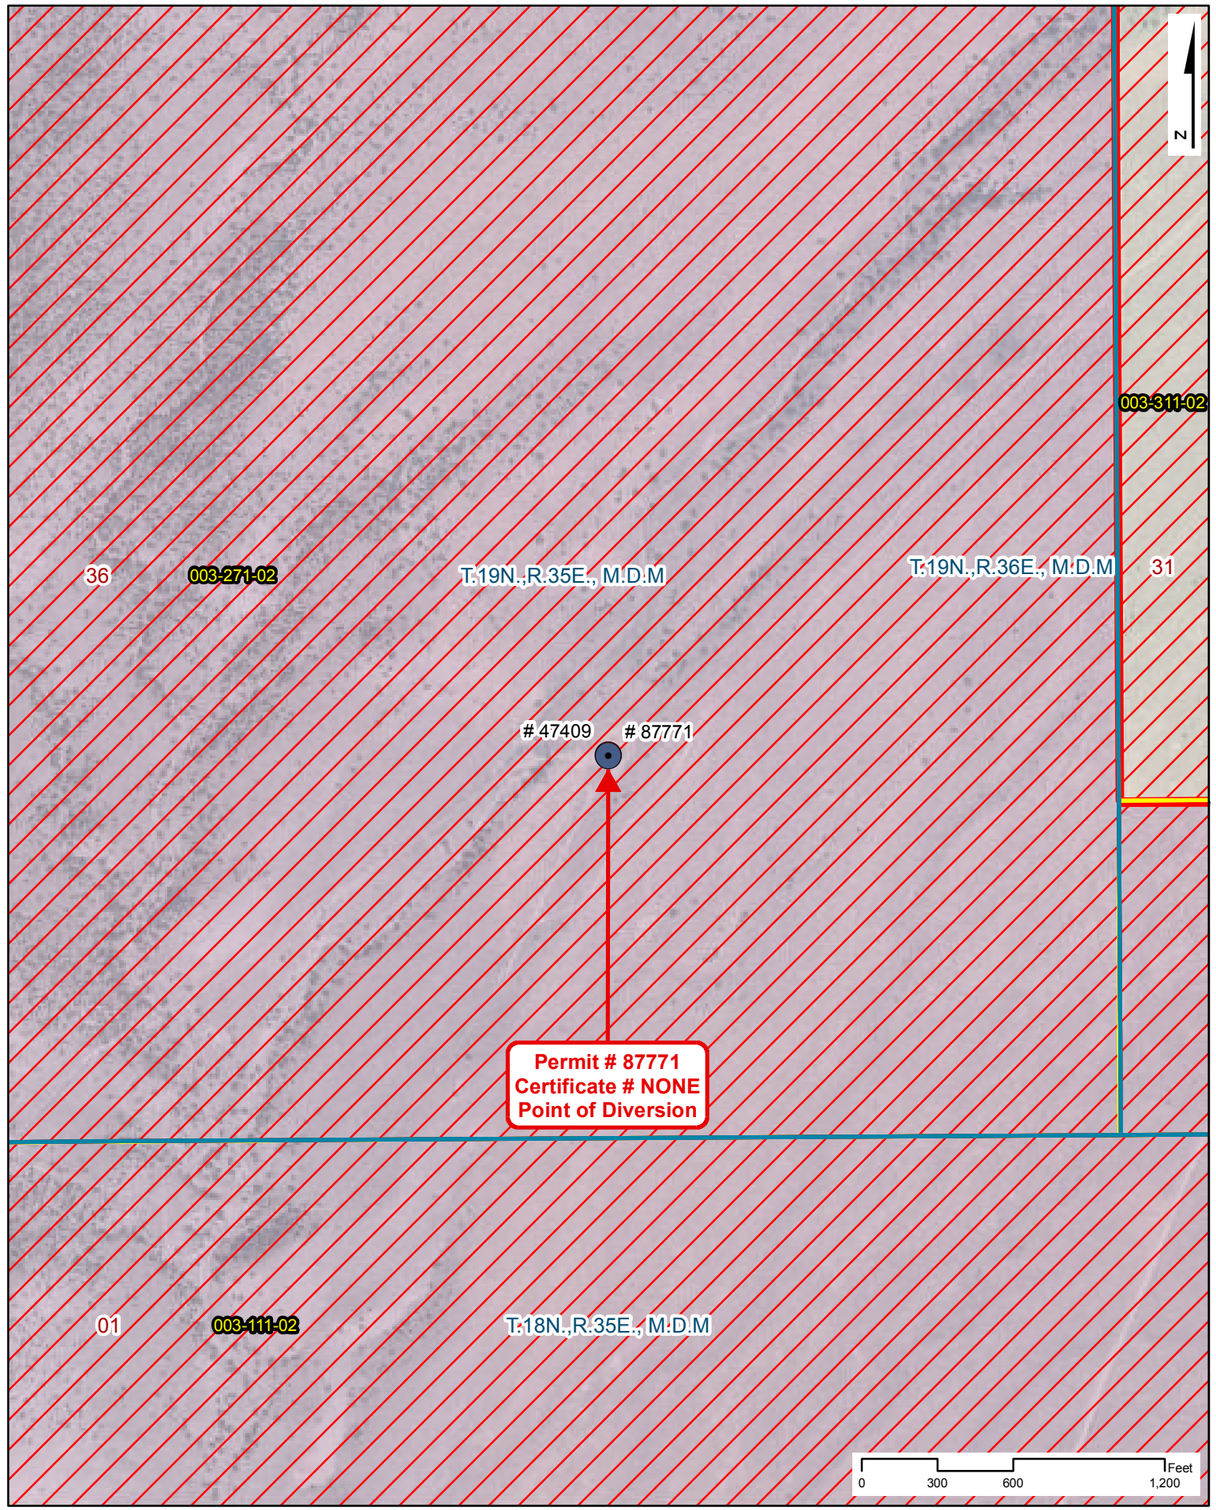

The Proof of Completion for Permit 87771 has a due date of April 5, 2020. The Proof Beneficial Use has a due date of April 5, 2021.

**********

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permit 75573, Certificate 19262, and Permits 87758 and 87771 shall not exceed 11.94 acre-feet or sufficient to water 533 head of cattle.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **April 5 2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **April 5 2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 5th day of **April, 2019**

Tim Wilson, P.E.

Acting State Engineer

STATE ENGINEER STATE OF NEVADA

Application No. 87771

# APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR OFFICE USE ONLY

Date of Filing in State Engineer's Office MAR 12 2018

Returned to applicant for correction

Corrected Application filed _____ Map filed Jan 23, 1984 Under 47409

The applicant BENCH CREEK RANCH CO, LLC.

943 Edgecliff Drive (Street Address or P.O. Box) of Reno (City or Town)

NV 89523 (State and ZIP Code) _____ (E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

RECEIVED

1. The source of water is Underground (Wonder Well)
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12)
   (d) Power:
      (1) Horsepower developed
      (2) Point of return of water to stream

Revised 06/17

10-126
Ch

87771

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the NW¼ SE¼ of Section 36, T.19N., R.35E., M.D.B.&M., or at a point from which the SW corner of said Section 36 bears S. 65° 13' 05" W., a distance of 3,649.2 feet situated in Churchill County, State of Nevada. (Please see Certificate 12957 for Application No. 47409 and Map filed under 47409 [POD listed as "Bench Creek Well" on Map]).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

The proposed place of use is the entire Dixie Valley Grazing Allotment. (Please See "Attachment A" accompanying this application, and the map filed under 87619.)

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Well is already in Place. New submersible pump and electrical might be required. Pipeline and trough system will be installed and hooked into existing well.

9. Estimated cost of works: $10,000.00

10. Estimated time required to construct works: 2 years (If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 3 Years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Please See "Attachment B".

13. Miscellaneous remarks:

Please See "Attachment B".

## Attachment B

**12. Provide a detailed description of the proposed project and its water usage.**

The well location is within the Dixie Valley Grazing Allotment on Public Land Owned by the BLM (APN 003-111-02). This well was installed and drilled in 1984 under Application 47409 / Certificate 12957. Please note that Application 47409 / Certificate 12957 is still active; however, since the well is on public land owned by the BLM and within the Dixie Valley Grazing Allotment this application is being filed by the Applicant as a secondary user on the well. A field visit performed on January 20, 2018 revealed that the existing well appears to have not been recently used, and additional upgrades will likely be required in order to get the well in working order once again.

Although it appears that the well has not recently been used under Application 47409 / Certificate 12957, a separate isolation valve will be installed so that any water used under this stockwater application may be separately monitored from any water used under Application 47409 / Certificate 12957.

Water will be pumped using a mobile generator. It is expected that an on-site pipeline and trough will be installed for use by stock within the Dixie Valley Grazing Allotment. Additionally, water will be placed into a water truck for delivery to any number of troughs within the Dixie Valley Grazing Allotment. For this reason the entire proposed POU is the entire Dixie Valley Grazing Allotment.

**13. Miscellaneous remarks:**

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

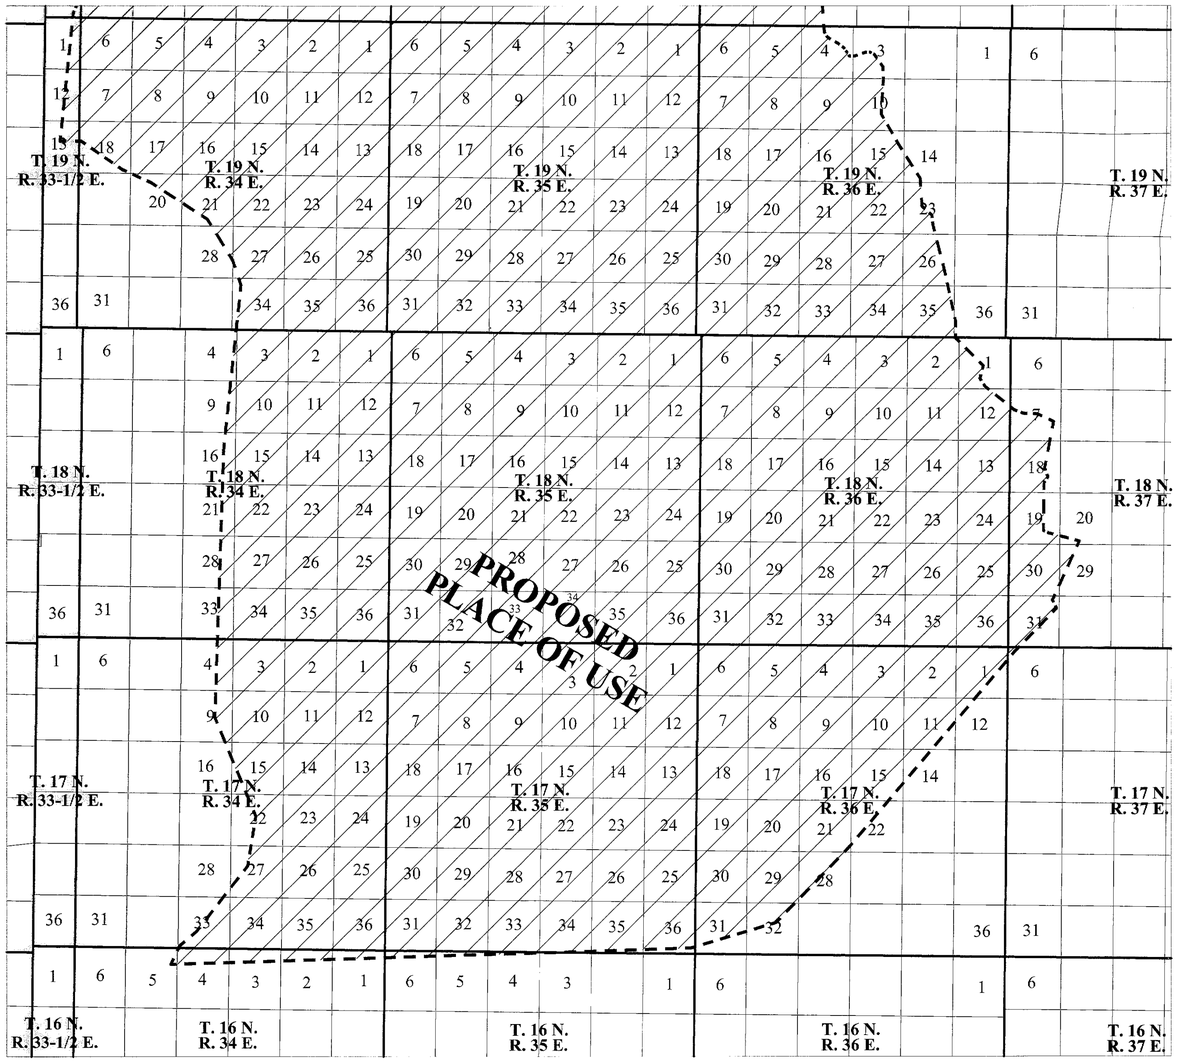

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

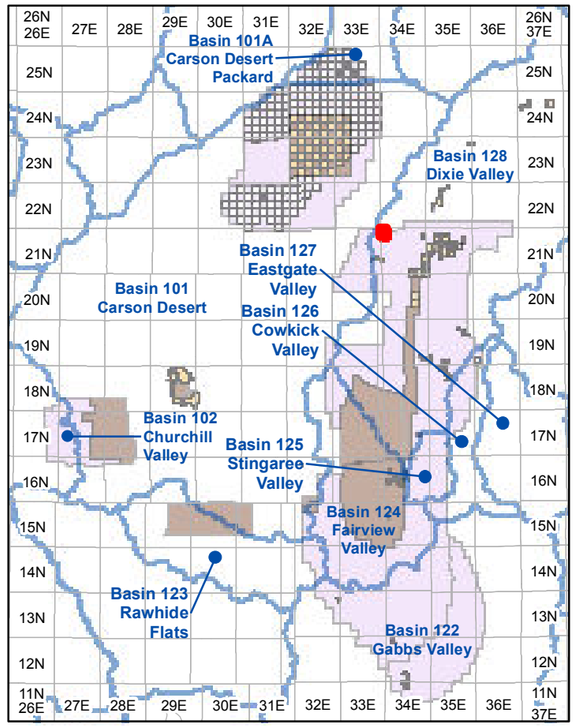

**Permit 87878**

The current owner of Permit 87878 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on January 29, 2019. It has a priority date of April 24, 2018 and an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Claims of Vested Right V11305, V11306, and V11307; and Permit 87763, 87764, 87765, 87766, 87769, 87877, 87878, 87879, 87881, 87882, 87883, 87884, 87885, 87886, 87887, 87888, 87889, 87888, 87889, 87890, 87891, 87892, 87893, 87894, 87895, 87896, and 87897 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

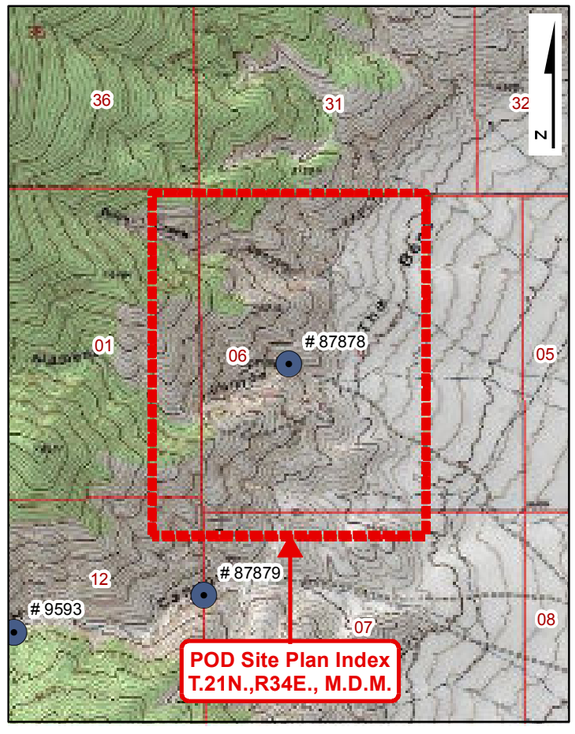

The point of diversion is located within the NW¼SW¼ Section 6, Township 21N, Range 34E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-831-19 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| | Lot 6 | 6 | 21N | 34E | 533 cattle |

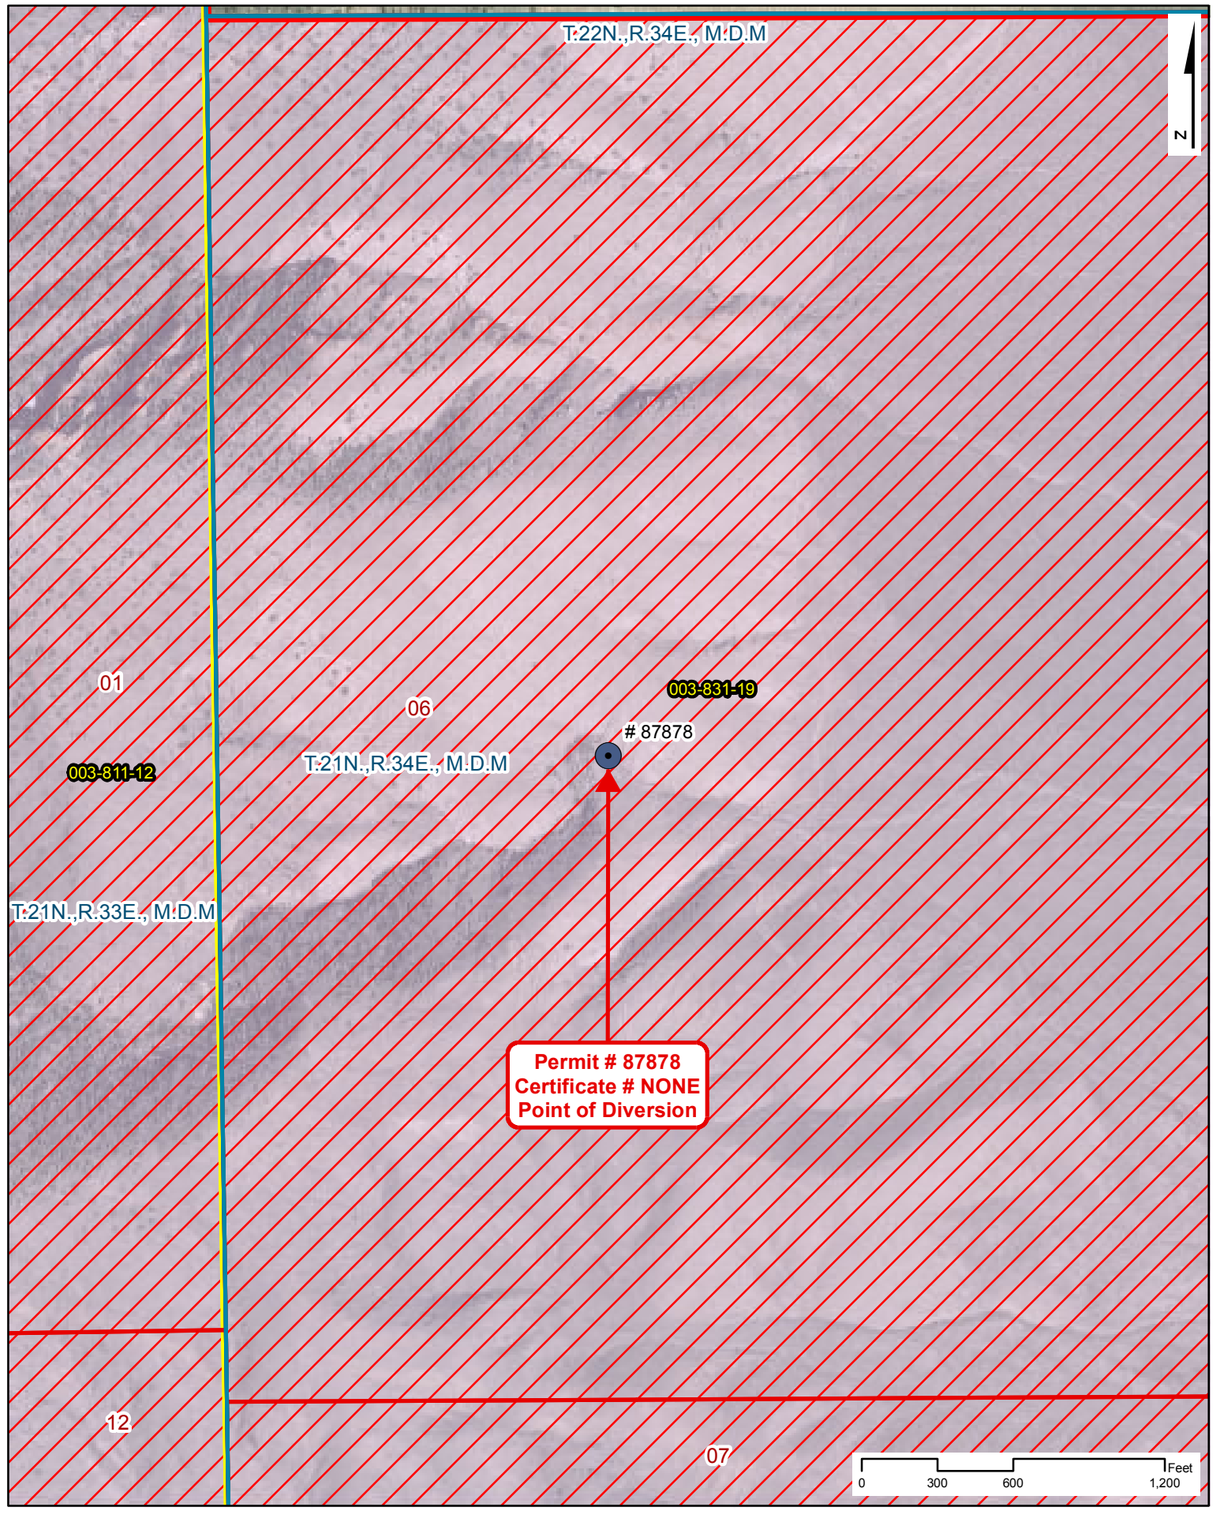

The Proof of Completion for Permit 87878 has a due date of January 29, 2020. The Proof Beneficial Use has a due date of January 29, 2021.

**********

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Claims of Vested Right V11305, V11306 and V11307; Permits 87763 through 87769 inclusive; Permits 87877 through 87879 inclusive and Permits 87881 through 87897 inclusive shall not exceed 11.94 acre-feet annually.

This permit is subject to the condition that the permittee must ensure that wildlife which have customarily used such water will have access thereto, NRS 533.367.

It is understood that the amount of water wherein granted is limited to the amount of water actually produced by the spring, and no rights in excess of that amount are implied or inferred.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **January 29 2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **January 29 2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **January, 2019**

Tim Wilson P.E.

Acting State Engineer

STATE ENGINEER STATE OF NEVADA

Application No. 87878

# APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR OFFICE USE ONLY

Date of Filing in State Engineer's Office APR 2 4 2018

Returned to applicant for correction

Corrected Application filed ____ Map filed April 29, 1947 Under 11772

RECEIVED
2018 APR 24 PM 3:07
STATE ENGINEERS OFFICE

The applicant BENCH CREEK RANCH CO, LLC.

943 Edgecliff Drive (Street Address or P.O. Box) of Reno (City or Town)

NV 89523 (State and ZIP Code) (E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated.

(If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

---

1. The source of water is Alameda Canyon Spring
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12)
   (d) Power:
      (1) Horsepower developed
      (2) Point of return of water to stream

Revised 06/17

10-128 CN

87878

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the NW¼ SW¼ (Lot 6) of Section 6, T.21N., R.34E., M.D.B.&M., or at a point from which the SE corner of said Section 6 bears S. 57° 50' E., a distance of 4,821 feet. (Please see map filed under 11772).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

within the NW¼ SW¼ (Lot 6) of Section 6, T.21N., R.34E., M.D.B.&M. (Please see map filed under 11772).

RECEIVED
2018 APR 24 PM 3:07
STATE ENGINEERS OFFICE

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

It currently is proposed that a trough system be installed to collect water from the spring; however, works might not be installed as cattle currently have access to the naturally flowing spring.

9. Estimated cost of works: $2,000.00

10. Estimated time required to construct works: 2 Years
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 3 Years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

It currently is proposed that a trough system be installed to collect water from the spring; however, works might not be installed as cattle currently have access to the naturally flowing spring.

**13. Miscellaneous remarks:**

Alameda Canyon Spring (also known as "Alameda Canon Spring" on map accompanying denied Application 11772) is located within the Dixie Valley Grazing Allotment (owned by the Applicant) on public land. Stock have historically used this spring as a water source. Stock are currently able to access the spring, which is naturally flowing.

RECEIVED
2018 APR 24 PM 3:07
STATE ENGINEER'S OFFICE

Please note that Application 11772 was filed in 1947, and subsequently denied under Ruling No. 41 in 1950. Based on review of the Ruling it appears that at the time these springs were used by many ranchers in Dixie Valley, which led to the application's Denial by the State Engineer (Ruling No. 41, pg. 2). In the 1940s Dixie Valley had a sizable ranching community, so it would make sense why these sources of water (including Alameda Canyon Spring) were historically used by many parties. The Dixie Valley Ranch Community (in T.21N., R.34E., and T. 21N., R.35E., M.D.B.&M.) is more or less a ghost town and its inhabitants are no more.

Additionally, back in the 1940s it seems grazing practices on public land were more of a free for all in Dixie Valley. With the Public Rangelands Improvement Act of 1978, the BLM began what is now referred to as the Nevada Rangeland Management and Grazing System, in which the BLM manages the amount of stock which can graze on public land. Bench Creek Ranch Co. LLC is the only party allowed to graze stock on public land within the Dixie Valley Grazing Allotment (where Alameda Canyon Spring is located). Because of this, the original reasons for which Application 11772 were denied are not relevant to this new appropriation for waters of Alameda Canyon Spring.

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

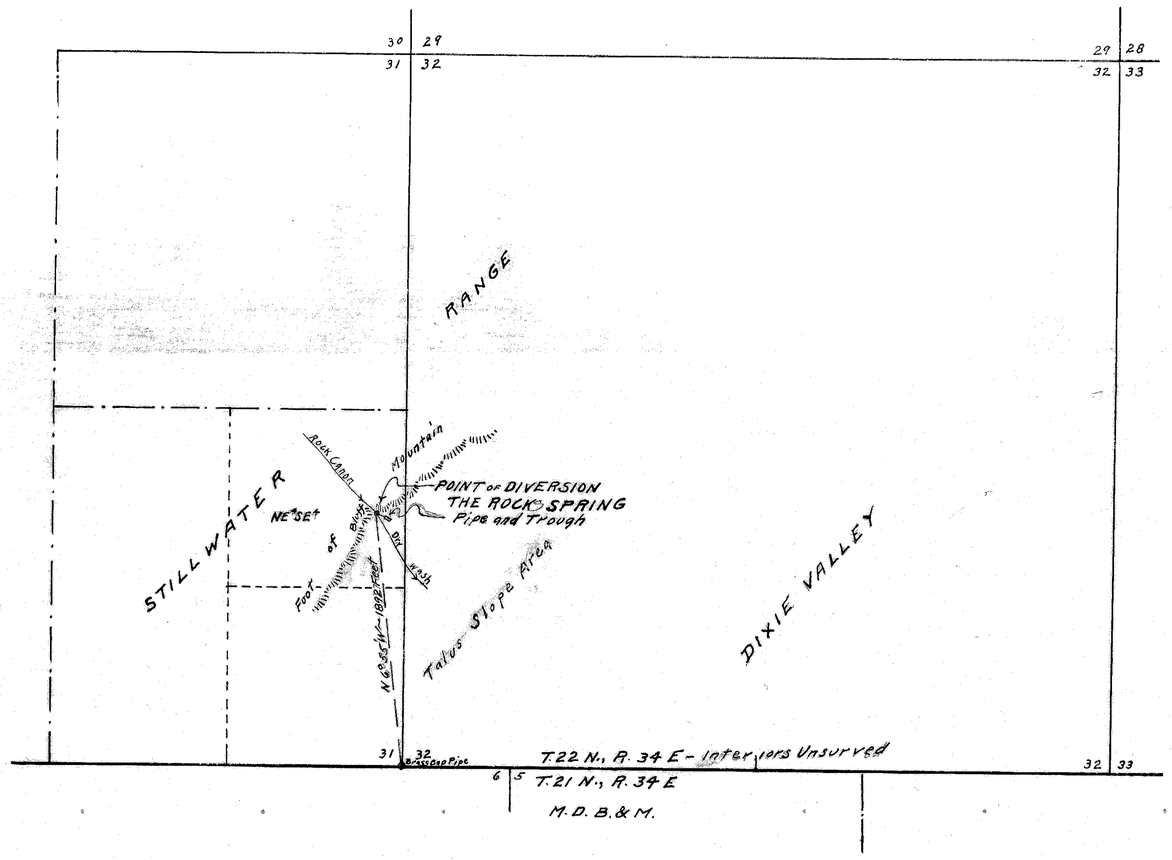

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

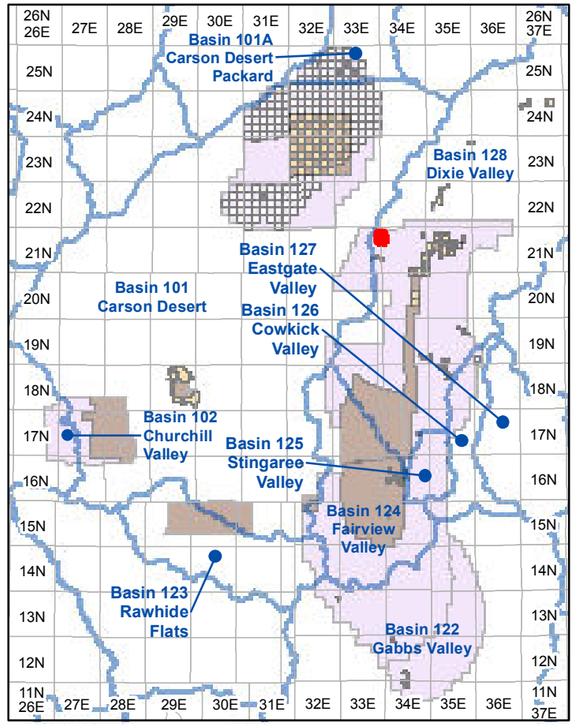

**Permit 87878**

The current owner of Permit 87878 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on January 29, 2019. It has a priority date of April 24, 2018 and an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Claims of Vested Right V11305, V11306, and V11307; and Permit 87763, 87764, 87765, 87766, 87769, 87877, 87878, 87879, 87881, 87882, 87883, 87884, 87885, 87886, 87887, 87888, 87889, 87888, 87889, 87890, 87891, 87892, 87893, 87894, 87895, 87896, and 87897 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

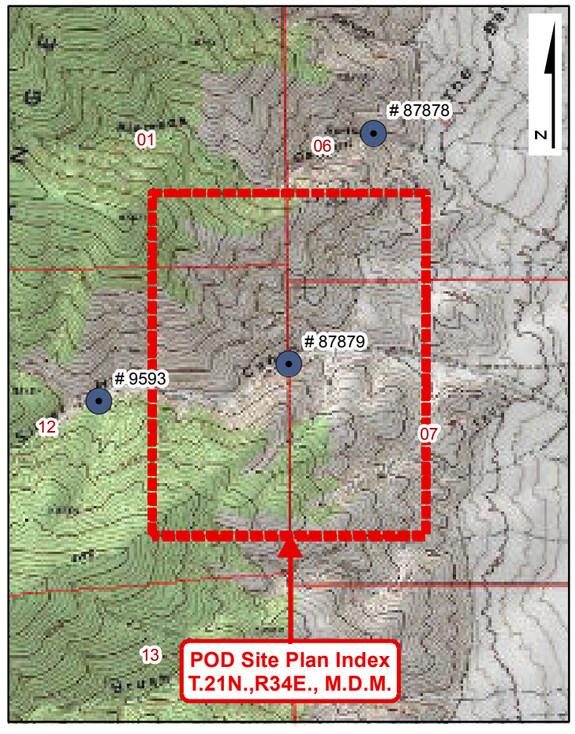

The point of diversion is located within the NW¼SW¼ Section 6, Township 21N, Range 34E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-831-19 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| | Lot 6 | 6 | 21N | 34E | 533 cattle |

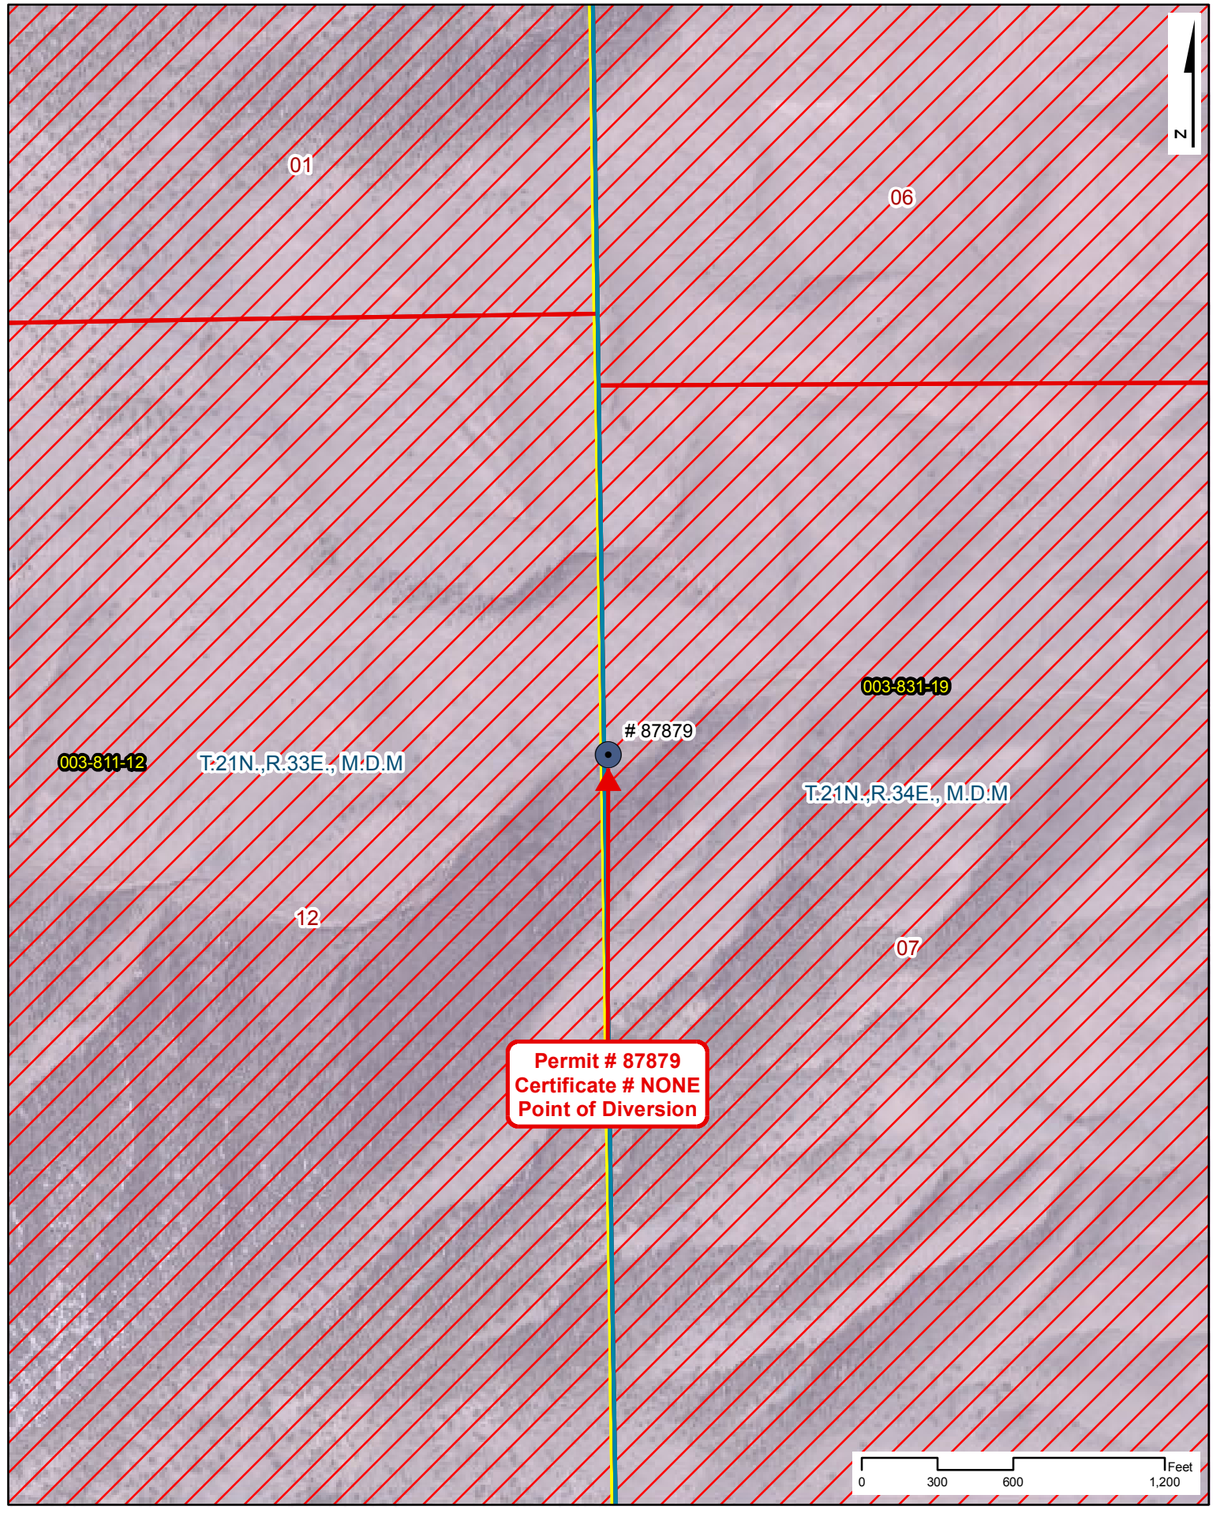

The Proof of Completion for Permit 87878 has a due date of January 29, 2020. The Proof Beneficial Use has a due date of January 29, 2021.

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Claims of Vested Right V11305, V11306 and V11307; Permits 87763 through 87769 inclusive; Permits 87877 through 87879 inclusive and Permits 87881 through 87897 inclusive shall not exceed 11.94 acre-feet annually.

This permit is subject to the condition that the permittee must ensure that wildlife which have customarily used such water will have access thereto, NRS 533.367.

It is understood that the amount of water wherein granted is limited to the amount of water actually produced by the spring, and no rights in excess of that amount are implied or inferred.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

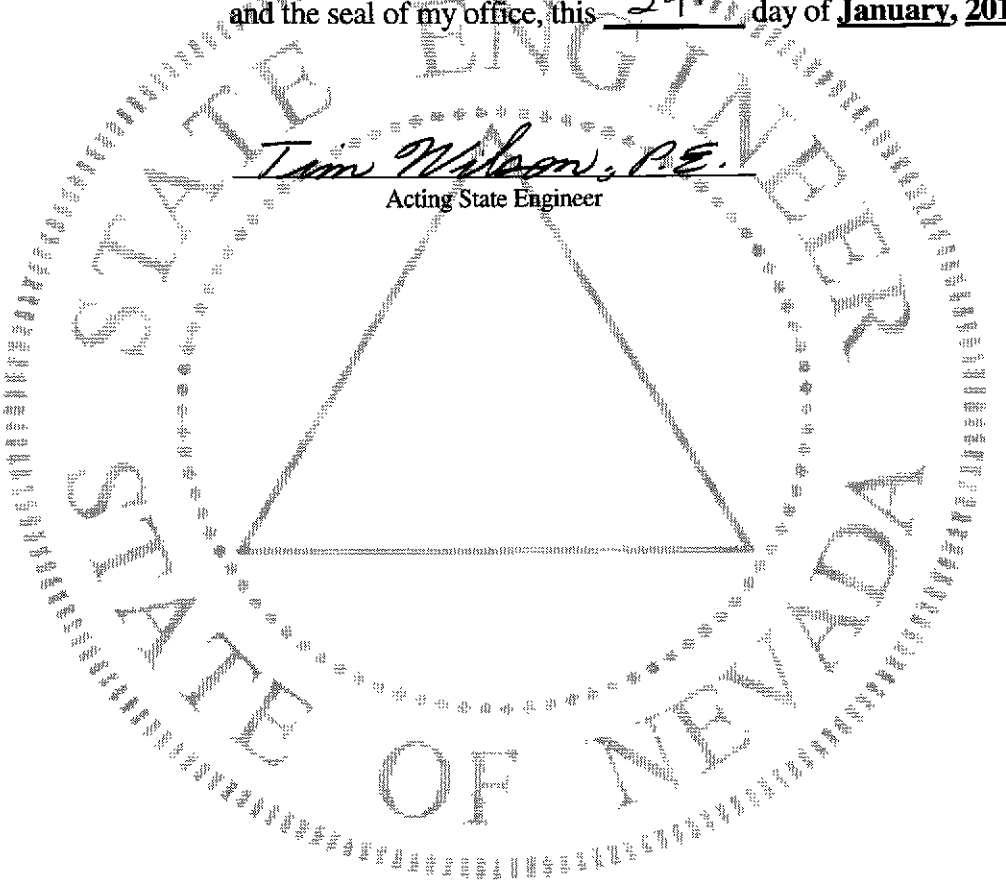

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **January 29 2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **January 29 2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **January, 2019**

Tim Wilson, P.E.
Acting State Engineer

Application No. 87879

# APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR OFFICE USE ONLY

Date of Filing in State Engineer's Office APR 2 4 2018

Returned to applicant for correction

Corrected Application filed ____ Map filed April 29, 1947 Under [illegible]770

RECEIVED

STATE ENGINEERS OFFICE

The applicant BENCH CREEK RANCH CO, LLC.

943 Edgecliff Drive (Street Address or P.O. Box) of Reno (City or Town)

NV 89523 (State and ZIP Code)

(E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated.

(If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

---

1. The source of water is Silver Hill Canyon Creek (Springs)
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12)
   (d) Power:
      (1) Horsepower developed
      (2) Point of return of water to stream

Revised 06/17

10-128 CN

87879

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)
within the SW¼ NW¼ (Lot 2) of Section 7, T.21N., R.34E., M.D.B.&M., or at a point from which the N¼ corner of said Section 7 bears N. 55° 05' E., a distance of 3,270 feet. (Please see map filed under 11770).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)
within the SW¼ NW¼ (Lot 2) of Section 7, T.21N., R.34E., M.D.B.&M. (Please see map filed under 11770).

RECEIVED
2018 APR 24 PM 3:09
STATE ENGINEERS OFFICE

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)
It currently is proposed that a trough system be installed to collect water from the creek (which is fed mostly by a system of springs); however, works might not be installed as cattle currently have access to naturally flowing source.

9. Estimated cost of works: $2,000.00

10. Estimated time required to construct works: 2 Years
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 3 Years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)
It currently is proposed that a trough system be installed to collect water from the creek (which is fed mostly by a system of springs); however, works might not be installed as cattle currently have access to naturally flowing source.

## Attachment A

**13. Miscellaneous remarks:**

Silver Hill Canyon Creek (Springs) is located within the Dixie Valley Grazing Allotment (owned by the Applicant) on public land. On denied application 11770, this source is listed as "Silver Hill Canyon Creek". Review of the source, as well as discussions with Bench Creek Ranch staff have identified that this source is primarily fed by a system of springs. For this reason, on the new application I am referring to the source as "Silver Hill Canyon Creek (Springs). Stock have historically used this creek fed by springs as a water source. Stock are currently able to access the source, which is naturally flowing.

RECEIVED
2019 APR 24 PM 12:08
STATE ENGINEER
CARSON CITY, NEVADA

Please note that Application 11770 was filed in 1947, and subsequently denied under Ruling No. 41 in 1950. Based on review of the Ruling it appears that at the time these springs were used by many ranchers in Dixie Valley, which led to the application's Denial by the State Engineer (Ruling No. 41, pg. 2). In the 1940s Dixie Valley had a sizable ranching community, so it would make sense why these sources of water (including Silver Hill Canyon Creek (Springs)) were historically used by many parties. The Dixie Valley Ranch Community (in T.21N., R.34E., and T. 21N., R.35E., M.D.B.&M.) is more or less a ghost town and its inhabitants are no more.

Additionally, back in the 1940s it seems grazing practices on public land were more of a free for all in Dixie Valley. With the Public Rangelands Improvement Act of 1978, the BLM began what is now referred to as the Nevada Rangeland Management and Grazing System, in which the BLM manages the amount of stock which can graze on public land. Bench Creek Ranch Co. LLC is the only party allowed to graze stock on public land within the Dixie Valley Grazing Allotment (where Silver Hill Canyon Creek (Springs) is located). Because of this, the original reasons for which Application 11770 were denied are not relevant to this new appropriation for waters of Silver Hill Canyon Creek (Springs).

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

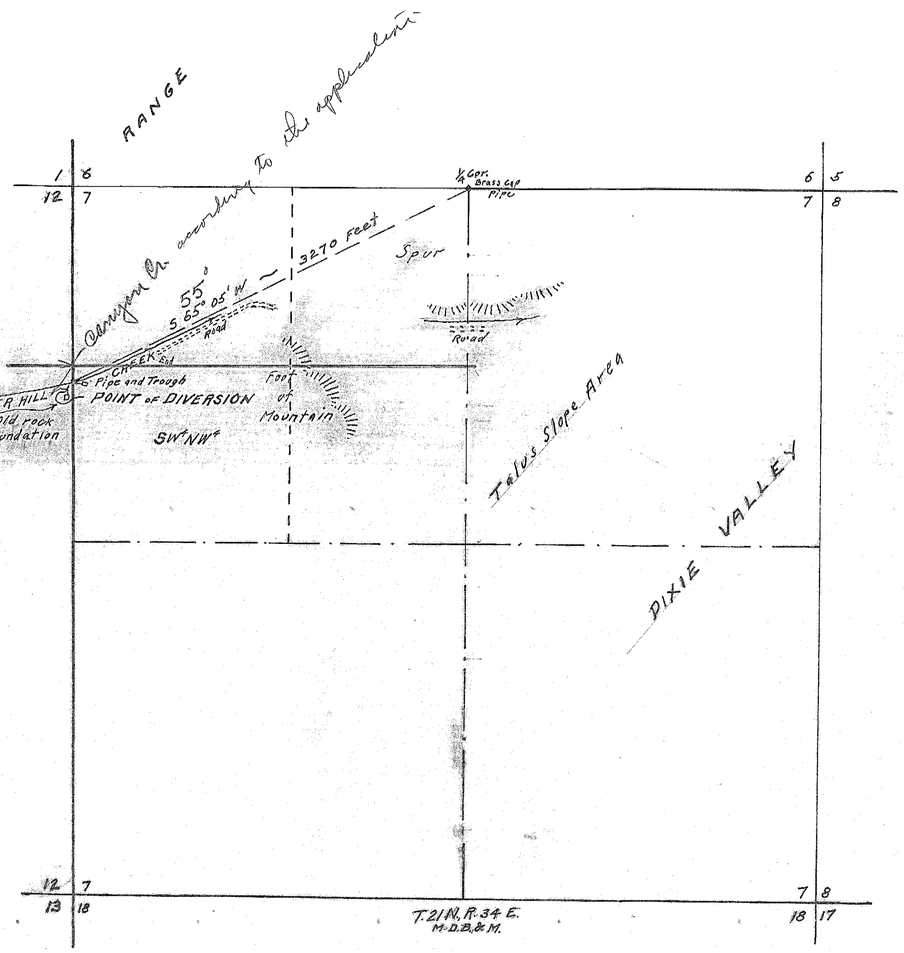

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AF

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

Corrected Application filed _____ Map filed APR 24 2018

The applicant BENCH CREEK RANCH CO, LLC.

943 Edgecliff Drive (Street Address or P.O. Box) of Reno (City or Town)

NV 89523 (State and ZIP Code) _____ (E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated.

(If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

---

1. The source of water is Brush Canyon Spring
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet _____
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated _____
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12) _____
   (d) Power:
      (1) Horsepower developed _____
      (2) Point of return of water to stream _____

Revised 06/17

10-128 cr

87887

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the SW¼ NW¼ (Lot 2) of Section 18, T.21N., R.34E., M.D.B.&M., or at a point from which the W¼ corner of Section 19, T.21N., R.35E., M.D.B.&M. bears S. 78° 59' 46.98" E., a distance of 31,647.8 feet. (Please see map accompanying this application).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

within the SW¼ NW¼ (Lot 2) of Section 18, T. 21 N., R.34E., M.D.B.&M. (Please see map accompanying this application)

RECEIVED
2018 APR 24 PM 3:16
STATE ENGINEER'S OFFICE

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

No proposed works. Cattle currently have access to naturally flowing spring.

9. Estimated cost of works: $0.00

10. Estimated time required to construct works: N/A - Works complete
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 1 Year

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Stock have historically and currently use water from this naturally flowing spring. No proposed works at this time.

**13. Miscellaneous remarks:**

Brush Canyon Spring is located within the Dixie Valley Grazing Allotment (owned by the Applicant), and stock have historically used this spring as a water source. Stock are currently able to access the spring, which is naturally flowing.

RECEIVED
2018 APR 24 PM 3:16
STATE ENGINEERS OFFICE

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

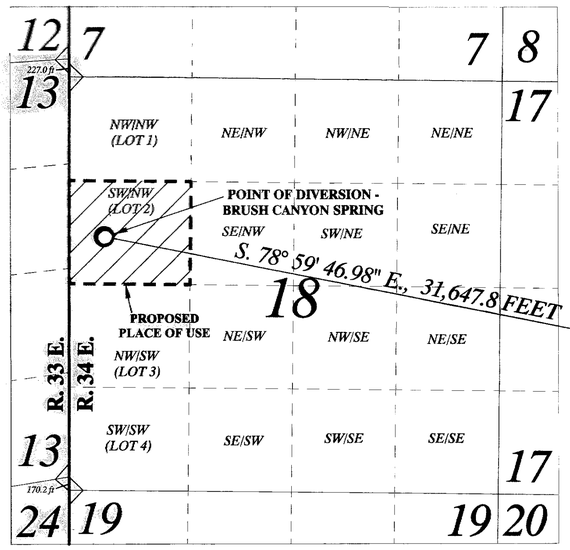

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

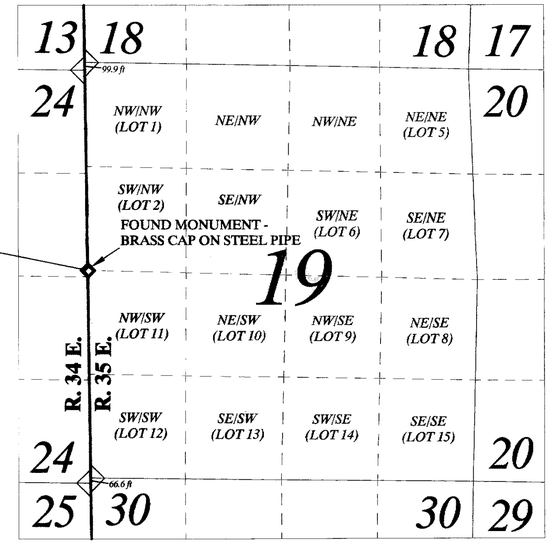

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

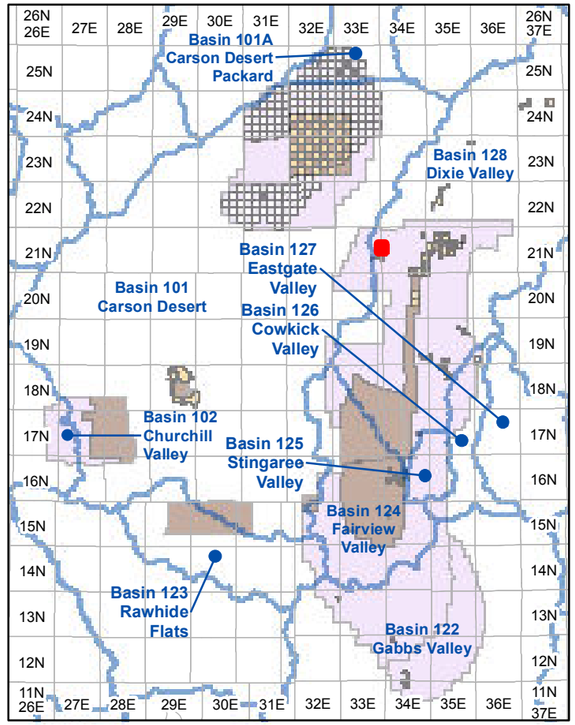

**Permit 87888**

The current owner of Permit 87888 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on January 29, 2019. It has a priority date of April 24, 2018 and an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Claims of Vested Right V11305, V11306, and V11307; and Permit 87763, 87764, 87765, 87766, 87769, 87877, 87878, 87879, 87881, 87882, 87883, 87884, 87885, 87886, 87887, 87888, 87889, 87888, 87889, 87890, 87891, 87892, 87893, 87894, 87895, 87896, and 87897 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

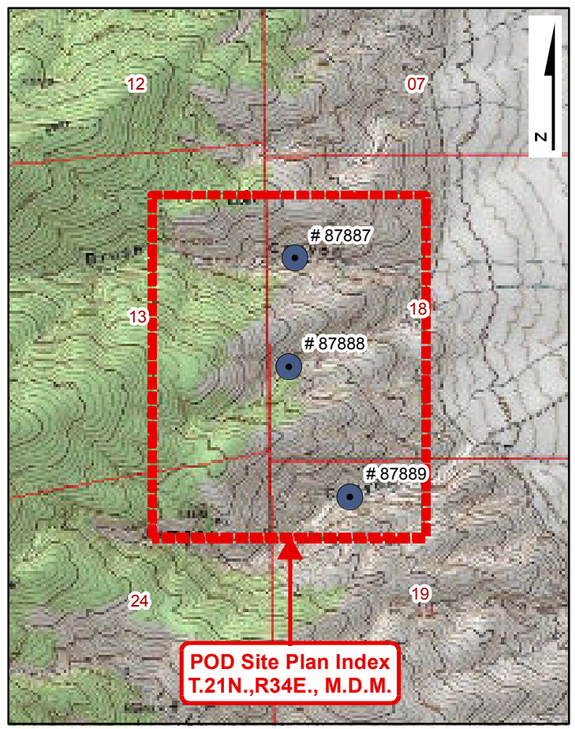

The point of diversion is located within the NW¼SW¼ Section 18, Township 21N, Range 34E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-831-19 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| NW | SW | 18 | 21N | 34E | 533 cattle |

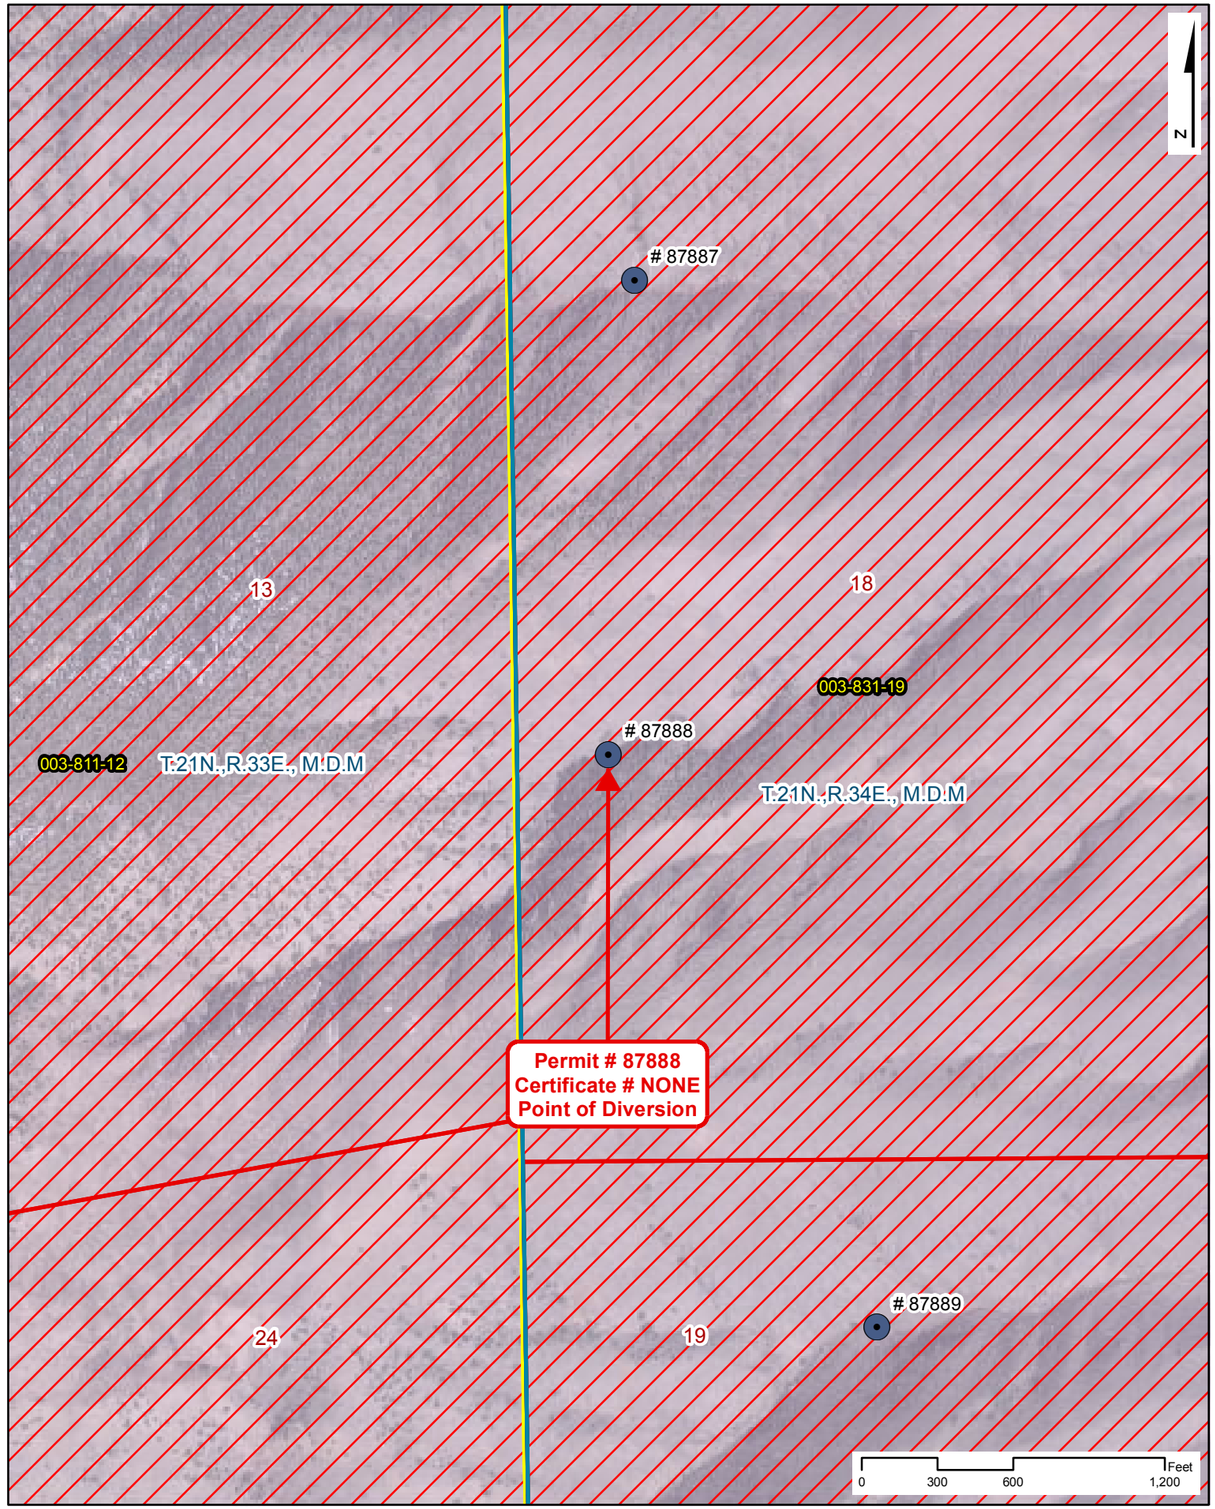

The Proof of Completion for Permit 87888 has a due date of January 29, 2020. The Proof Beneficial Use has a due date of January 29, 2021.

**********

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Claims of Vested Right V11305, V11306 and V11307; Permits 87763 through 87769 inclusive; Permits 87877 through 87879 inclusive and Permits 87881 through 87897 inclusive shall not exceed 11.94 acre-feet annually.

This permit is subject to the condition that the permittee must ensure that wildlife which have customarily used such water will have access thereto, NRS 533.367.

It is understood that the amount of water wherein granted is limited to the amount of water actually produced by the spring, and no rights in excess of that amount are implied or inferred.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **January 29 2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **January 29 2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **January, 2019**

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

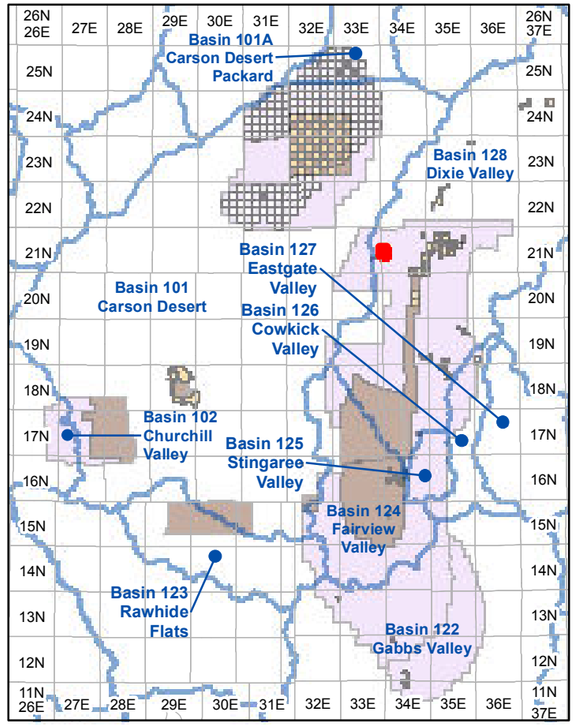

**Permit 87889**

The current owner of Permit 87889 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on January 29, 2019. It has a priority date of April 24, 2018 and an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Claims of Vested Right V11305, V11306, and V11307; and Permit 87763, 87764, 87765, 87766, 87769, 87877, 87878, 87879, 87881, 87882, 87883, 87884, 87885, 87886, 87887, 87888, 87889, 87888, 87889, 87890, 87891, 87892, 87893, 87894, 87895, 87896, and 87897 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

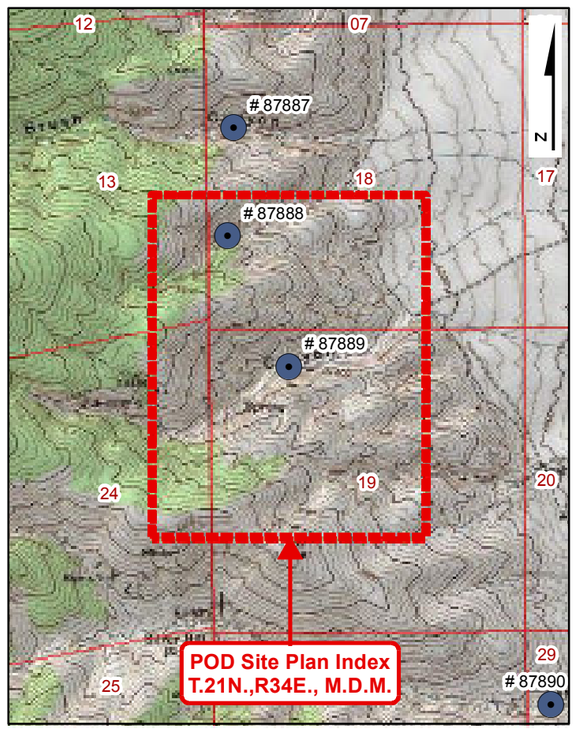

The point of diversion is located within the NW¼NW¼ Section 19, Township 21N, Range 34E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-831-19 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| | Lot 1 | 19 | 21N | 34E | 533 cattle |

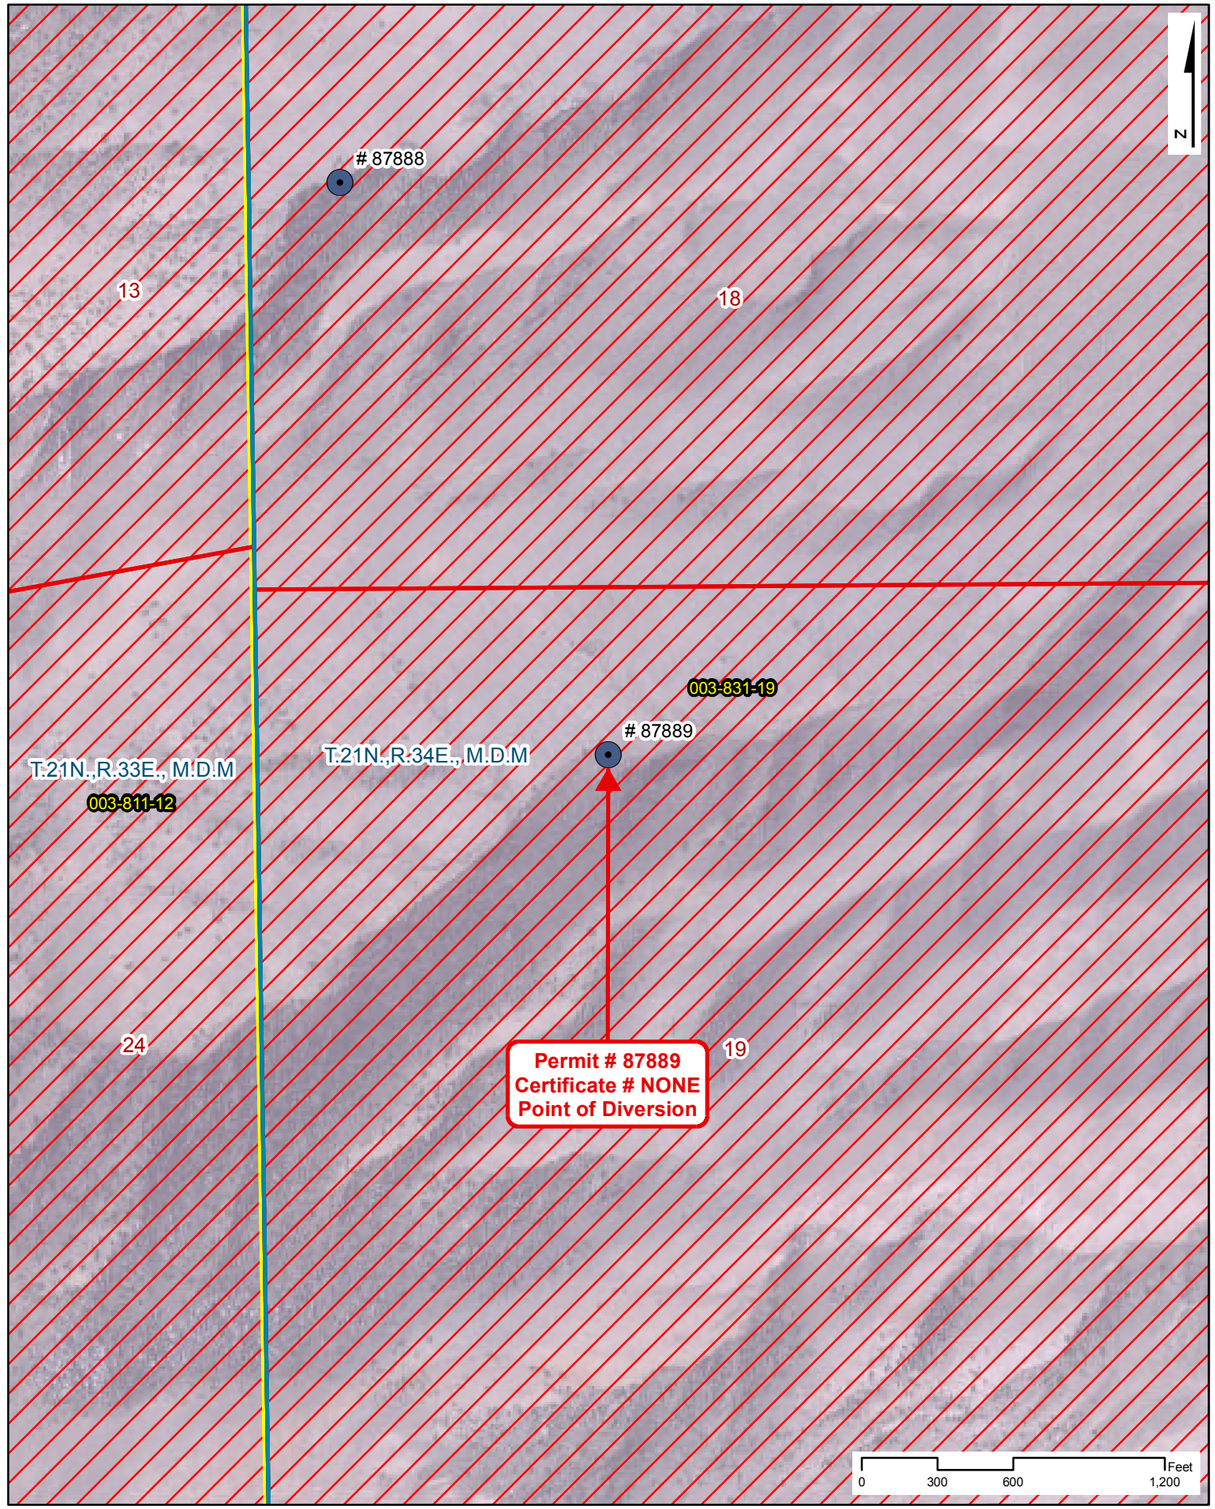

The Proof of Completion for Permit 87889 has a due date of January 29, 2020, and the Proof Beneficial Use has a due date of January 29, 2021.

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Claims of Vested Right V11305, V11306 and V11307; Permits 87763 through 87769 inclusive; Permits 87877 through 87879 inclusive and Permits 87881 through 87897 inclusive shall not exceed 11.94 acre-feet annually.

This permit is subject to the condition that the permittee must ensure that wildlife which have customarily used such water will have access thereto, NRS 533.367.

It is understood that the amount of water wherein granted is limited to the amount of water actually produced by the spring, and no rights in excess of that amount are implied or inferred.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **January 29 2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **January 29 2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **January, 2019**

NV 89523 (State and ZIP Code) _____ (E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

---

1. The source of water is James Canyon Spring
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet _____
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated _____
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12) _____
   (d) Power:
      (1) Horsepower developed _____
      (2) Point of return of water to stream _____

Revised 06/17

10-126 CH

87859

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the NW¼ NW¼ (Lot 1) of Section 19, T.21N., R.34E., M.D.B.&M., or at a point from which the W¼ corner of Section 19, T.21N., R.35E., M.D.B.&M. bears S. 86° 23' 52.57" E., a distance of 30,194.0 feet. (Please see map accompanying this application).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

within the NW¼ NW¼ (Lot 1), and the NE¼ NW¼ of Section 19, T. 21 N., R.34E., M.D.B.&M. (Please see map accompanying this application)

RECEIVED
2018 APR 24 PM 3:17
STATE ENGINEERS OFFICE

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

No proposed works. Cattle currently have access to naturally flowing spring.

9. Estimated cost of works: $0.00

10. Estimated time required to construct works: N/A - Works complete
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 1 Year

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Stock have historically and currently use water from this naturally flowing spring. No proposed works at this time.

**13. Miscellaneous remarks:**

James Canyon Spring is located within the Dixie Valley Grazing Allotment (owned by the Applicant), and stock have historically used this spring as a water source. Stock are currently able to access the spring, which is naturally flowing.

RECEIVED
2018 APR 24 PM 3:18
STATE ENGINEERS OFFICE

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

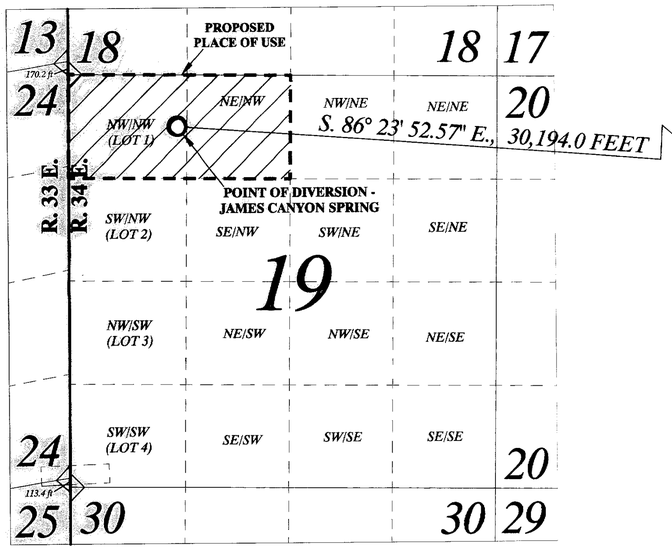

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

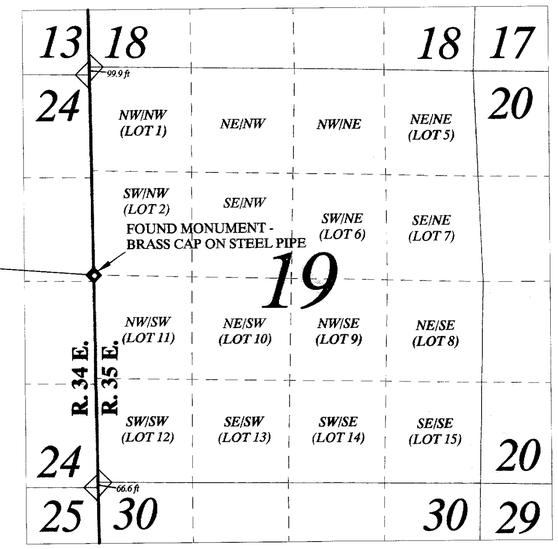

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Claims of Vested Right V11305, V11306 and V11307; Permits 87763 through 87769 inclusive; Permits 87877 through 87879 inclusive and Permits 87881 through 87897 inclusive shall not exceed 11.94 acre-feet annually.

This permit is subject to the condition that the permittee must ensure that wildlife which have customarily used such water will have access thereto, NRS 533.367.

It is understood that the amount of water wherein granted is limited to the amount of water actually produced by the spring, and no rights in excess of that amount are implied or inferred.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **January** 29 **2020**

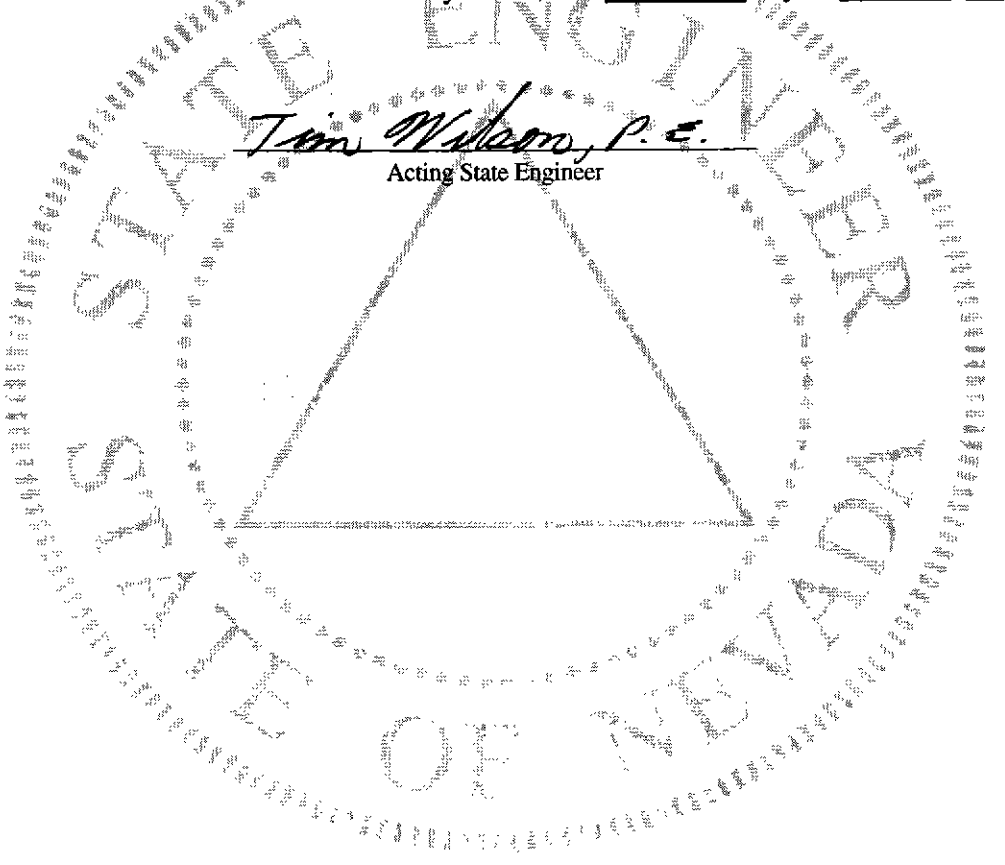

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **January** 29 **2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **January, 2019**

Tim Wilson, P.E.
Acting State Engineer

The applicant BENCH CREEK RANCH CO, LLC.

943 Edgecliff Drive (Street Address or P.O. Box) of Reno (City or Town)

NV 89523 (State and ZIP Code)

(E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

---

1. The source of water is IXL Canyon Springs
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12)
   (d) Power:
      (1) Horsepower developed
      (2) Point of return of water to stream

Revised 06/17

10-128

87890

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the NW¼ NW¼ of Section 29, T.21N., R.34E., M.D.B.&M., or at a point from which the SE corner of Section 36, T.21N., R.34E., M.D.B.&M. bears S. 70° 18' 2.88" E., a distance of 27,556.8 feet. (Please see map accompanying this application).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

within the NW¼ NW¼ of Section 29, T. 21 N., R.34E., M.D.B.&M. (Please see map accompanying this application)

RECEIVED
2018 APR 24 PM 3:08
STATE ENGINEER'S OFFICE

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

No proposed works. Cattle currently have access to naturally flowing springs.

9. Estimated cost of works: $0.00

10. Estimated time required to construct works: N/A - Works complete
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 1 Year

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Stock have historically and currently use water from these naturally flowing springs. No proposed works at this time.

87890

**Attachment A**

**13. Miscellaneous remarks:**

IXL Canyon Springs is located within the Dixie Valley Grazing Allotment (owned by the Applicant), and stock have historically used these springs as a water source. Stock are currently able to access the springs, which are naturally flowing.

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

Calculation of AFA 528 Cattle Allowed 365 days of the year:

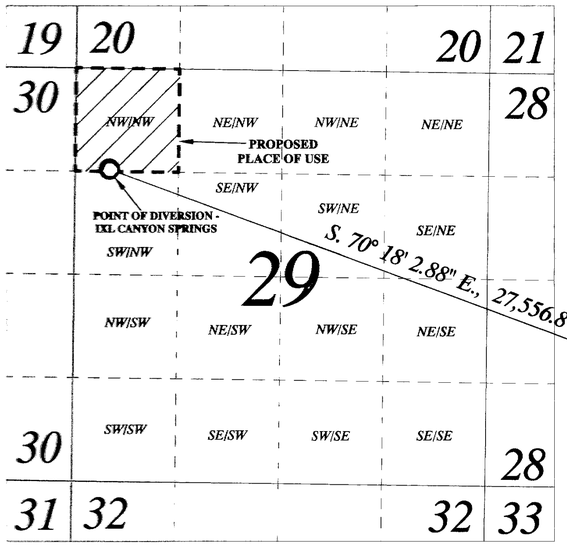

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

Calculation of 5 Additional Cattle Allowed 31 days of the year:

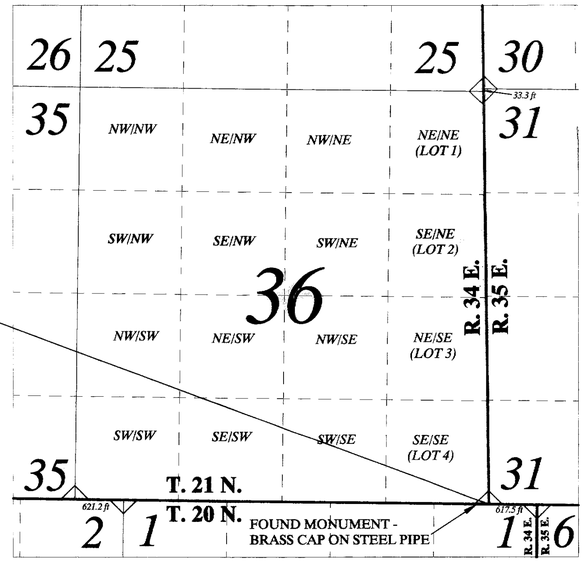

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

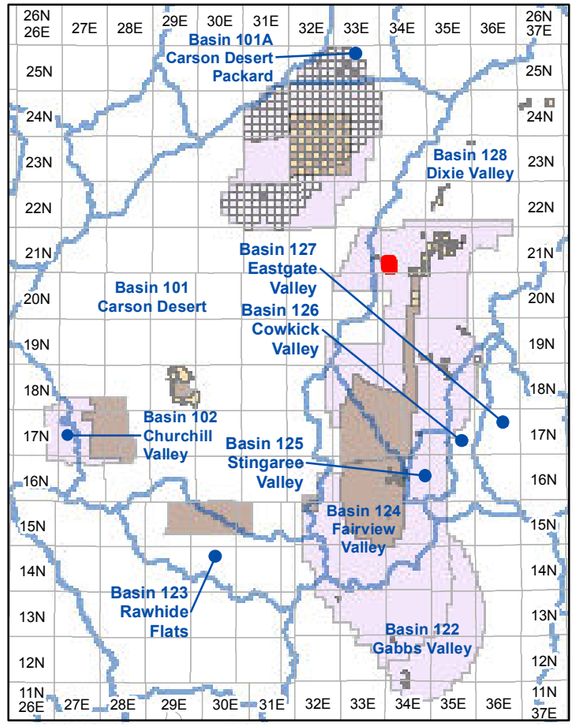

**Permit 87891**

The current owner of Permit 87891 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on January 29, 2019. It has a priority date of April 24, 2018 and an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Claims of Vested Right V11305, V11306, and V11307; and Permit 87763, 87764, 87765, 87766, 87769, 87877, 87878, 87879, 87881, 87882, 87883, 87884, 87885, 87886, 87887, 87888, 87889, 87888, 87889, 87890, 87891, 87892, 87893, 87894, 87895, 87896, and 87897 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

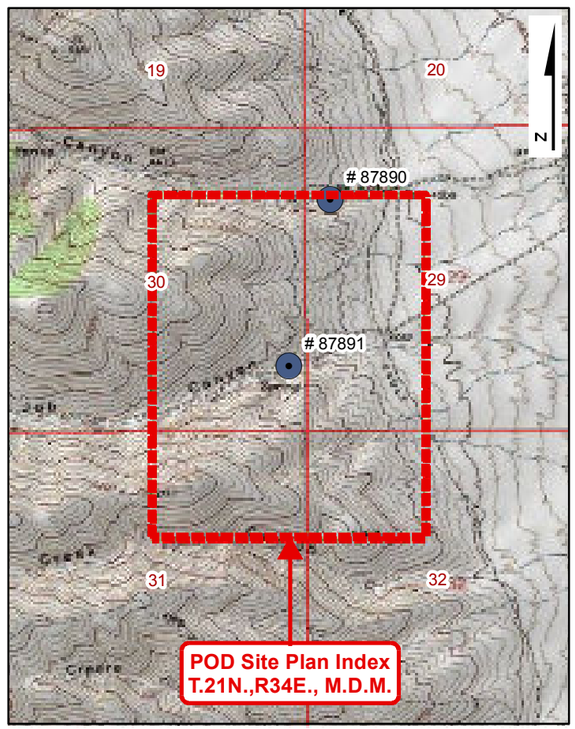

The point of diversion is located within the SE¼SE¼ Section 30, Township 21N, Range 34E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-831-19 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| SE | SE | 30 | 21N | 34E | 533 cattle |

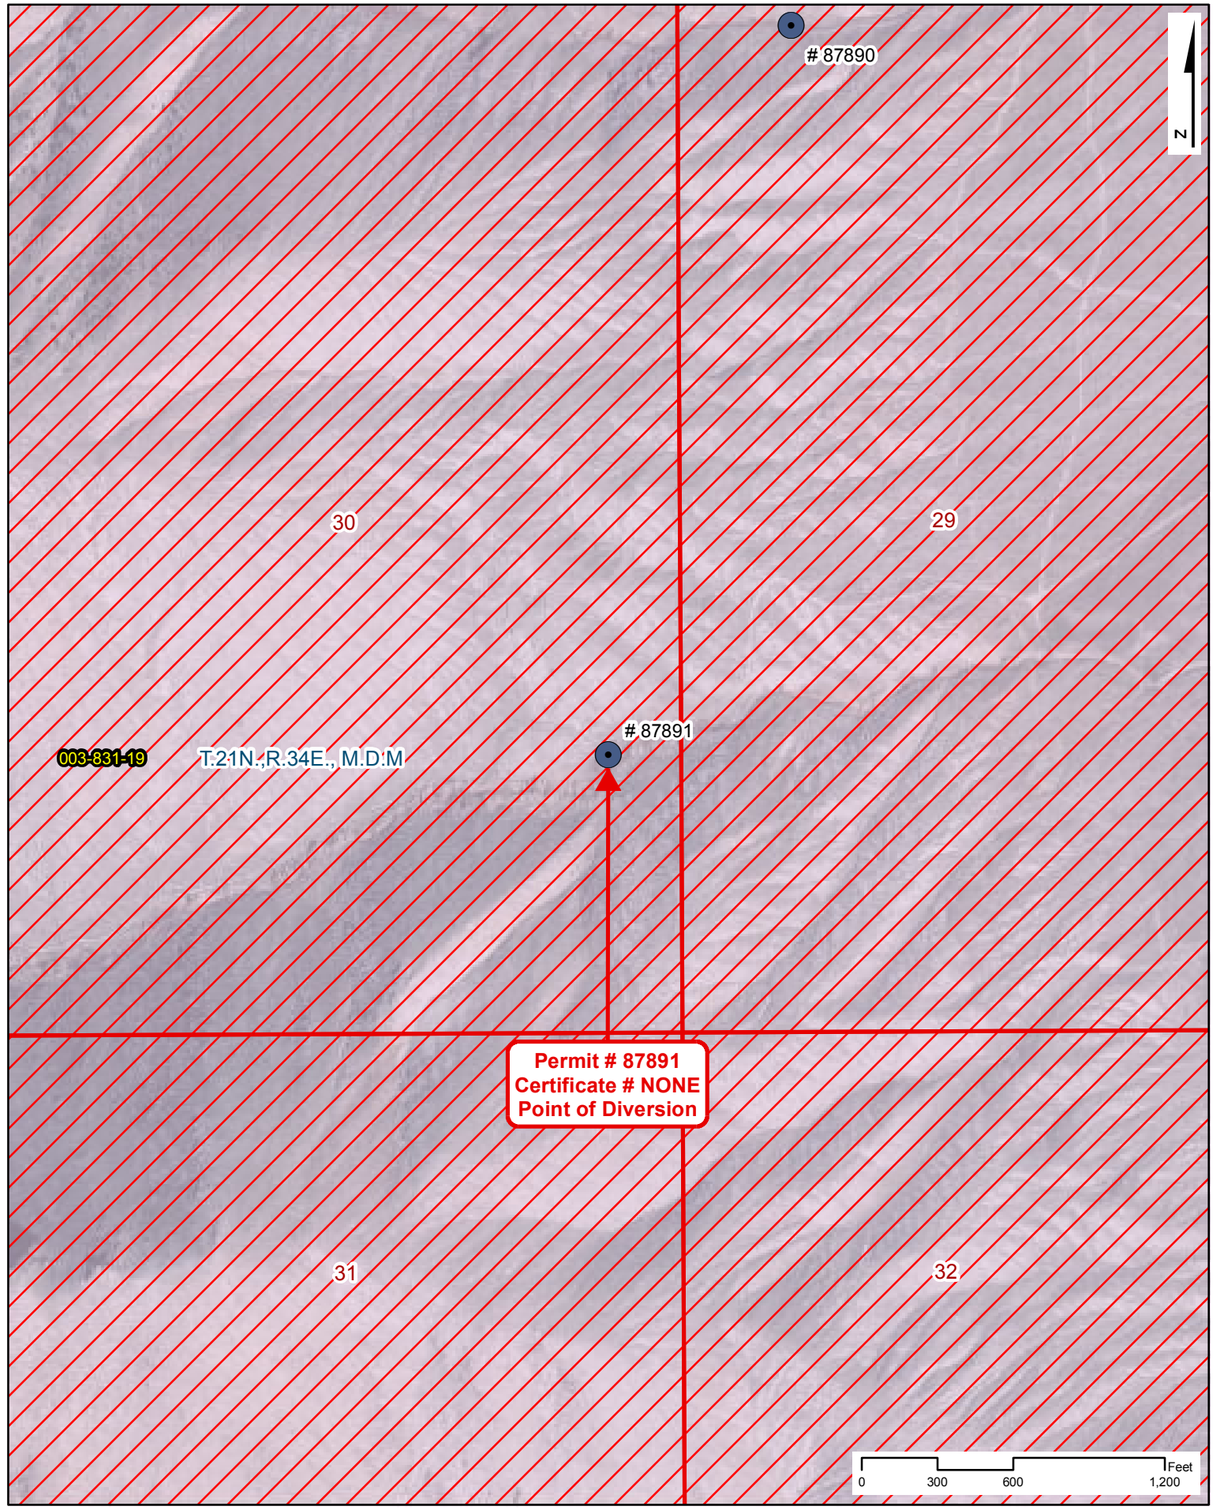

The Proof of Completion for Permit 87891 has a due date of January 29, 2020. The Proof Beneficial Use has a due date of January 29, 2021.

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Claims of Vested Right V11305, V11306 and V11307; Permits 87763 through 87769 inclusive; Permits 87877 through 87879 inclusive and Permits 87881 through 87897 inclusive shall not exceed 11.94 acre-feet annually.

This permit is subject to the condition that the permittee must ensure that wildlife which have customarily used such water will have access thereto, NRS 533.367.

It is understood that the amount of water wherein granted is limited to the amount of water actually produced by the spring, and no rights in excess of that amount are implied or inferred.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **January 29 2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **January 29 2021**

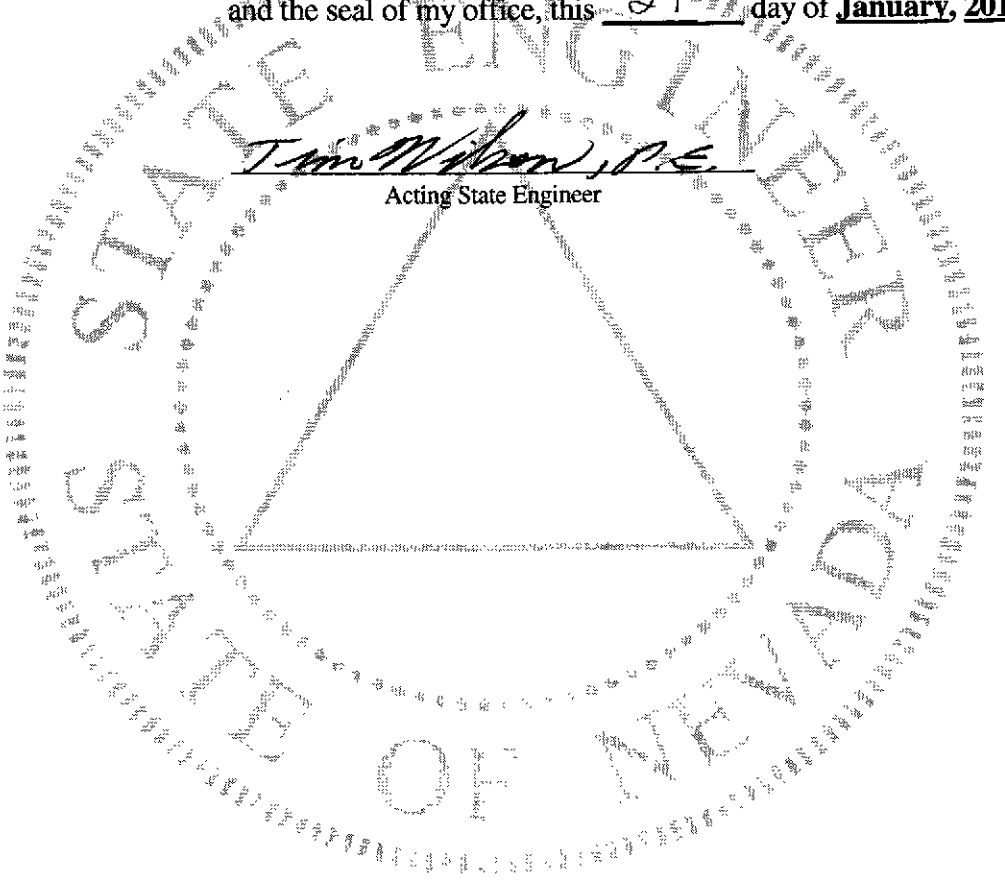

Map in support of proof of beneficial use shall be filed on or before: **N/A**

Job's Canyon Springs is located within the Dixie Valley Grazing Allotment (owned by the Applicant), and stock have historically used these springs as a water source. Stock are currently able to access the springs, which are naturally flowing.

RECEIVED
2018 APR 25 PM 3:19
STATE ENGINEER'S OFFICE

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

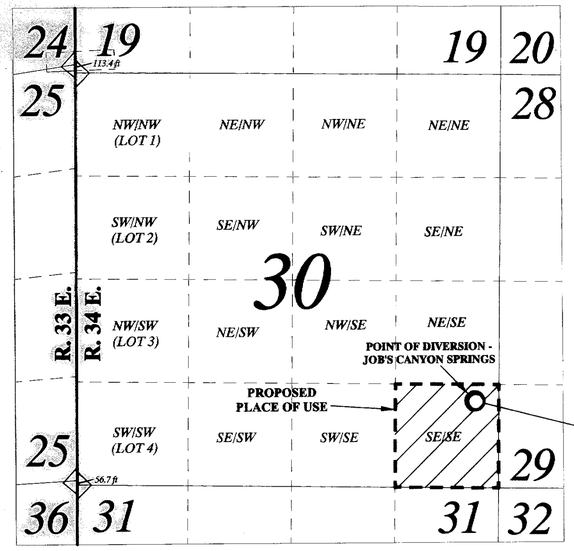

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

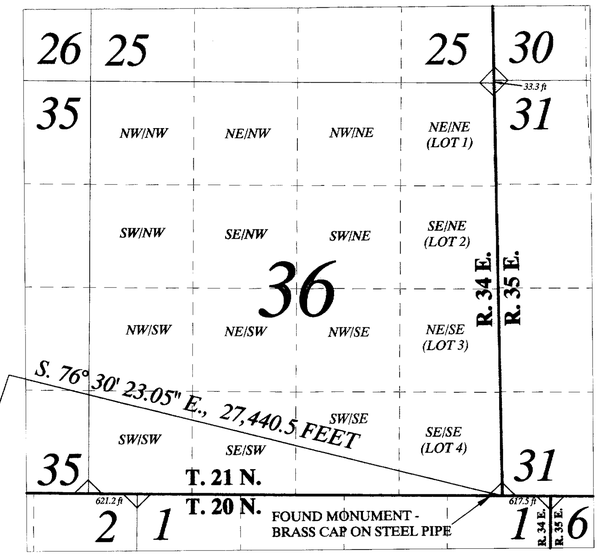

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

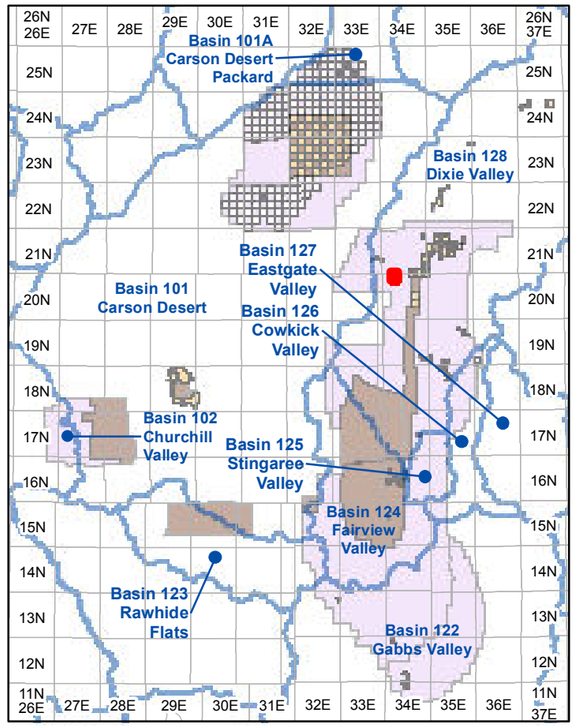

**Permit 87892**

The current owner of Permit 87892 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on January 29, 2019. It has a priority date of April 24, 2018 and an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Claims of Vested Right V11305, V11306, and V11307; and Permit 87763, 87764, 87765, 87766, 87769, 87877, 87878, 87879, 87881, 87882, 87883, 87884, 87885, 87886, 87887, 87888, 87889, 87888, 87889, 87890, 87891, 87892, 87893, 87894, 87895, 87896, and 87897 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

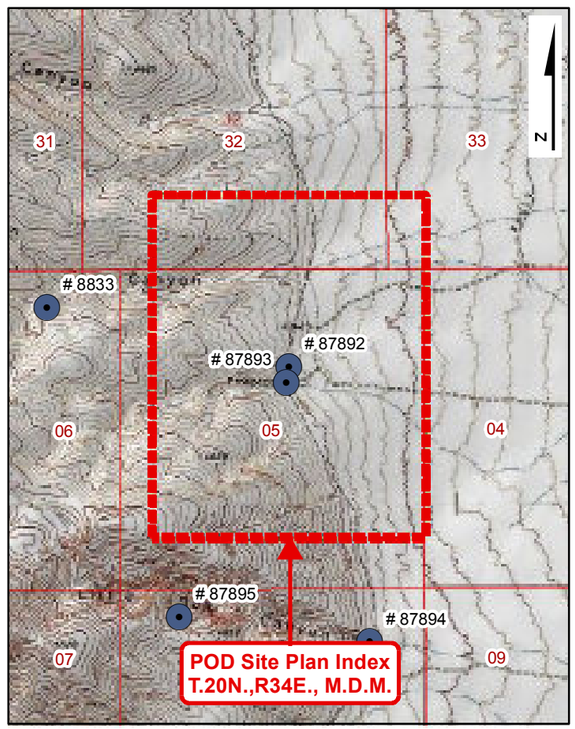

The point of diversion is located within the SW¼NE¼ Section 5, Township 20N, Range 34E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-471-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| SW | NE | 5 | 20N | 34E | 533 cattle |

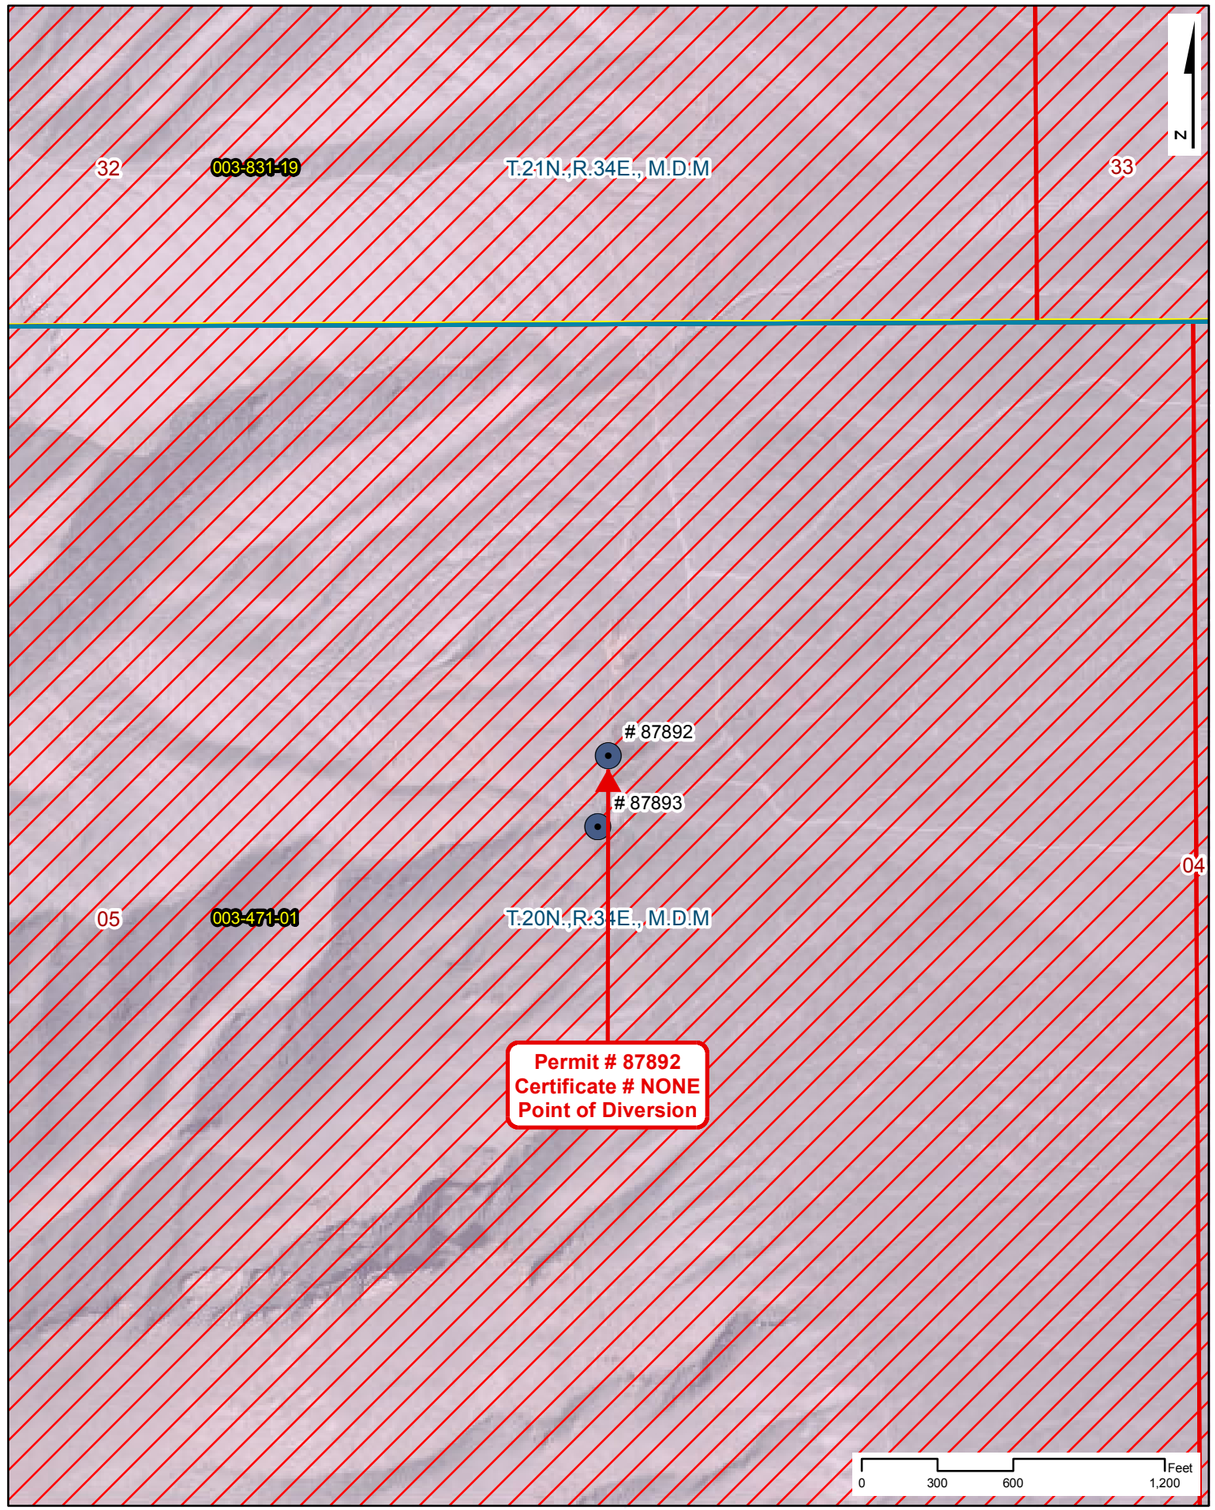

The Proof of Completion for Permit 87892 has a due date of January 29, 2020. The Proof Beneficial Use has a due date of January 29, 2021.

**********

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Claims of Vested Right V11305, V11306 and V11307; Permits 87763 through 87769 inclusive; Permits 87877 through 87879 inclusive and Permits 87881 through 87897 inclusive shall not exceed 11.94 acre-feet annually.

This permit is subject to the condition that the permittee must ensure that wildlife which have customarily used such water will have access thereto, NRS 533.367.

It is understood that the amount of water wherein granted is limited to the amount of water actually produced by the spring, and no rights in excess of that amount are implied or inferred.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **January 29 2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **January 29 2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **January, 2019**

NV 89523 (State and ZIP Code) _____ (E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated.

(If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

---

1. The source of water is Mud Springs
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet _____
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated _____
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12) _____
   (d) Power:
      (1) Horsepower developed _____
      (2) Point of return of water to stream _____

Revised 06/17

10-128 CN

87892

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the SW¼ NE¼ of Section 5, T.20N., R.34E., M.D.B.&M., or at a point from which the SE corner of Section 36, T.21N., R.34E., M.D.B.&M. bears N. 85° 46' 4.06" E., a distance of 22,881.1 feet. (Please see map accompanying this application).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

within the SW¼ NE¼ of Section 5, T. 20 N., R.34E., M.D.B.&M. (Please see map accompanying this application)

RECEIVED
2018 APR 24 PM 3:21
STATE ENGINEER'S OFFICE

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches, and flumes, drilled well with a pump and motor, etc.)

Spring box, pipeline, and trough system is already in place. No additional works are proposed at this time.

9. Estimated cost of works: $0.00

10. Estimated time required to construct works: N/A - Works complete
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 1 Year

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Stock have historically and currently use water from these naturally flowing springs. Spring box, pipeline, and trough system is already in place. No additional works are proposed at this time.

**Attachment A**

**13. Miscellaneous remarks:**

Mud Springs is located within the Dixie Valley Grazing Allotment (owned by the Applicant), and stock have historically used these springs as a water source. Stock are currently able to access the springs via existing spring box, pipeline, and trough system. No additional works are proposed at this time.

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

RECEIVED
2024 APR 24 PM 3:21
STATE ENGINEERS OFFICE

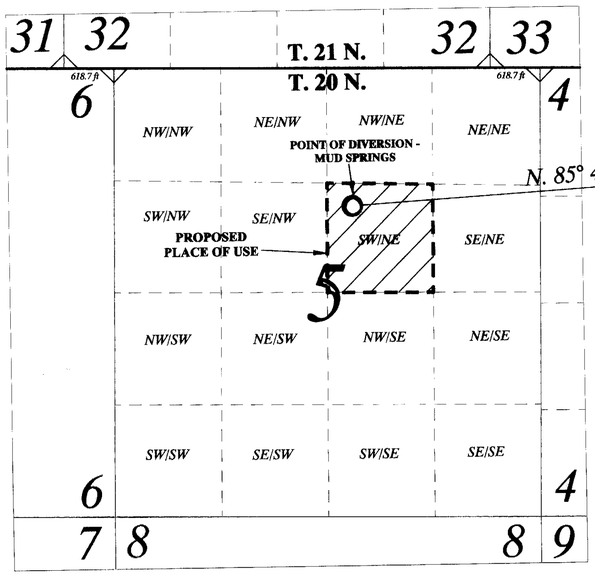

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

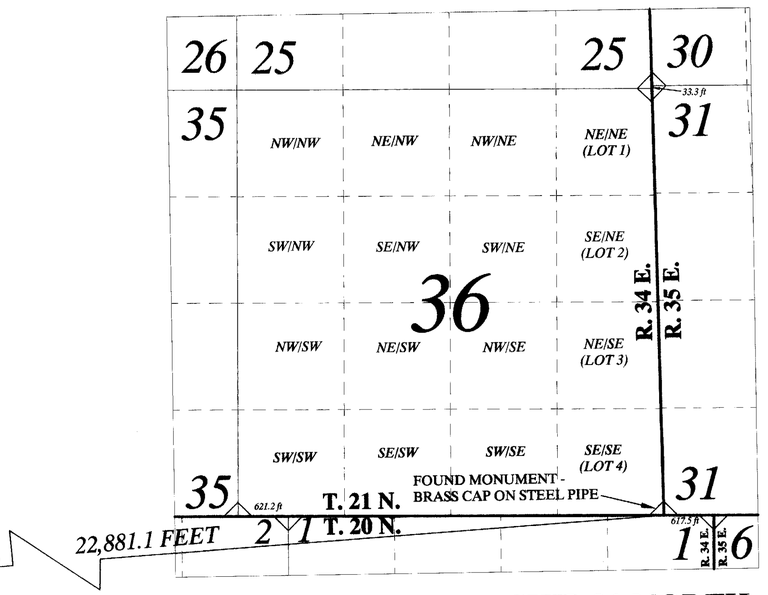

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

| **Basin:** | **DIXIE VALLEY** |
| **Manner of Use:** | **STOCKWATERING** |
| **Period of Use:** | **JANUARY 1ST THROUGH DECEMBER 31ST** |
| **Priority Date:** | **04/24/2018** |

**********

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Claims of Vested Right V11305, V11306 and V11307; Permits 87763 through 87769 inclusive; Permits 87877 through 87879 inclusive and Permits 87881 through 87897 inclusive shall not exceed 11.94 acre-feet annually.

This permit is subject to the condition that the permittee must ensure that wildlife which have customarily used such water will have access thereto, NRS 533.367.

It is understood that the amount of water wherein granted is limited to the amount of water actually produced by the spring, and no rights in excess of that amount are implied or inferred.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **January** 29 **2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **January** 29 **2021**

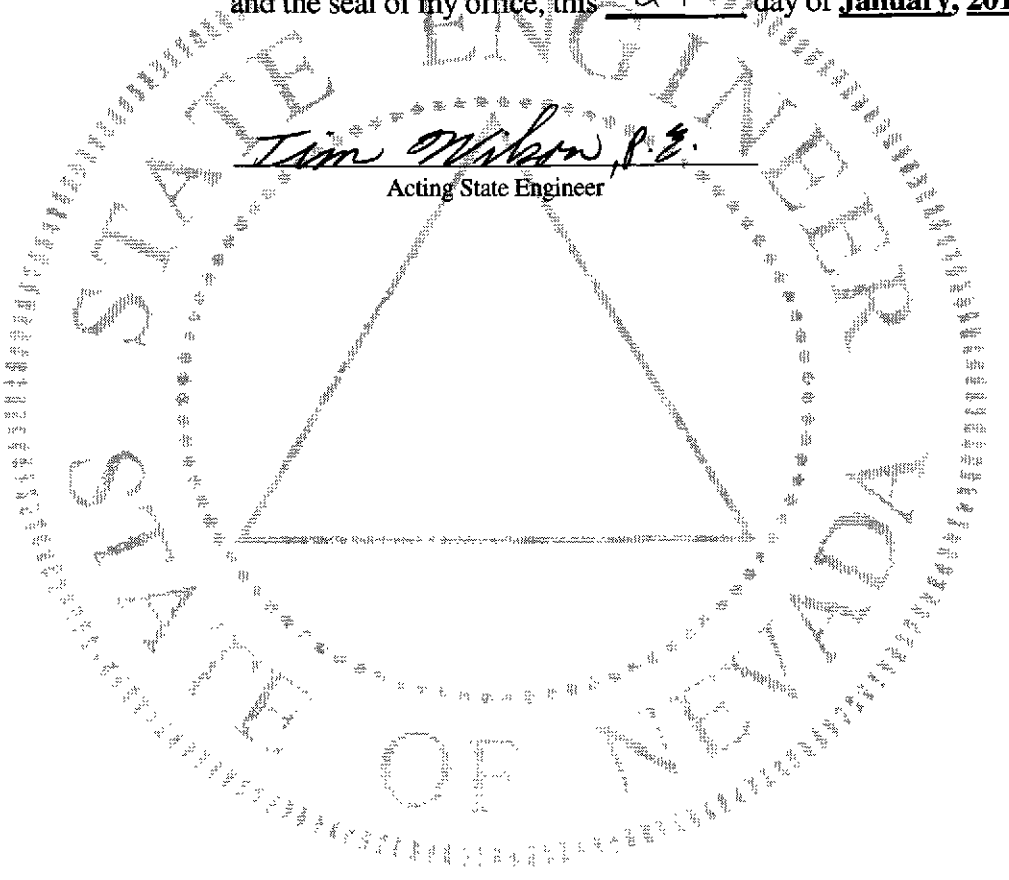

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **January, 2019**

Tim Wilson, P.E.

Acting State Engineer

The applicant BENCH CREEK RANCH CO, LLC.

943 Edgecliff Drive of Reno

Street Address or P.O. Box City or Town

NV 89523

State and ZIP Code E-mail Address

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

---

1. The source of water is Willow Springs

Name of the stream, lake, underground, spring or other sources.

2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA

Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).

(a) If stored in a reservoir give the number of acre-feet _____

3. The water is to be used for Stockwatering

Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.

4. If use is for:

(a) Irrigation, state number of acres to be irrigated _____

(b) Stockwater, state number and kind of animals 533 Cattle

(c) Other use (describe fully in No. 12) _____

(d) Power:

(1) Horsepower developed _____

(2) Point of return of water to stream _____

87893

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the SW¼ NE¼ of Section 5, T.20N., R.34E., M.D.B.&M., or at a point from which the SE corner of Section 36, T.21N., R.34E., M.D.B.&M. bears N. 85° 7' 47.58" E., a distance of 23,188.2 feet. (Please see map accompanying this application).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

within the SW¼ NE¼ of Section 5, T. 20 N., R.34E., M.D.B.&M. (Please see map accompanying this application)

RECEIVED
2018 APR 24 PM 3:22
STATE ENGINEERS OFFICE

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Cattle currently have access to naturally flowing springs. No additional works are proposed at this time.

9. Estimated cost of works: $0.00

10. Estimated time required to construct works: N/A - Works complete
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 1 Year

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Stock have historically and currently use water from these naturally flowing springs. No additional works are proposed at this time.

13. Miscellaneous remarks:

**Attachment A**

**13. Miscellaneous remarks:**

Willow Springs is located within the Dixie Valley Grazing Allotment (owned by the Applicant), and stock have historically used these springs as a water source. Stock are currently able to access the naturally flowing springs. No works are proposed at this time.

Bench Creek Ranch Co., LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

Calculation of AFA 528 Cattle Allowed 365 days of the year:

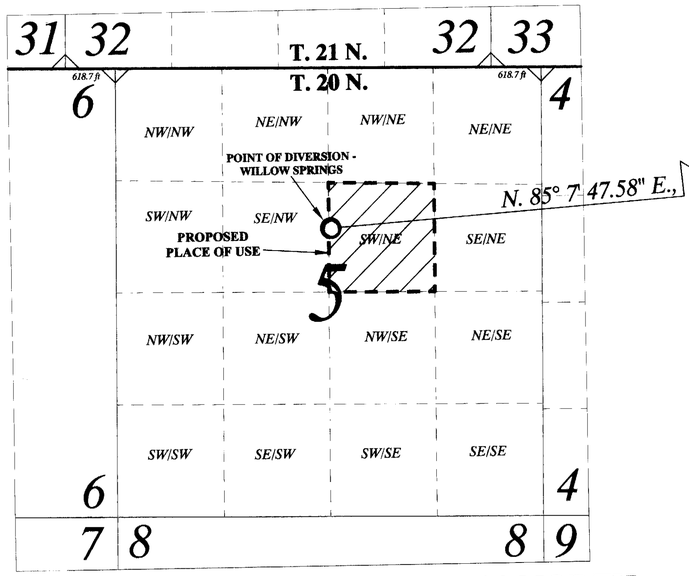

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

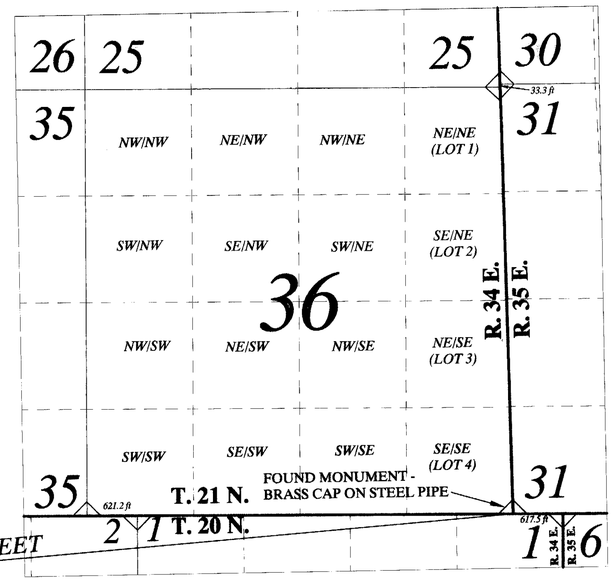

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

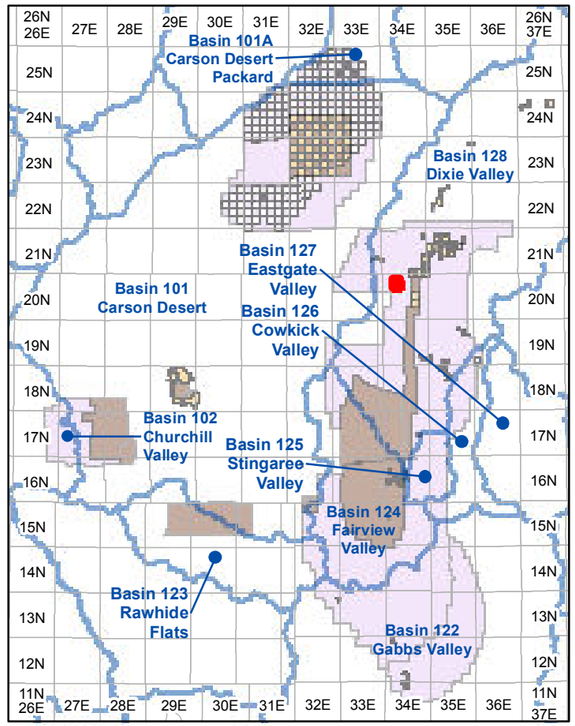

**Permit 87894**

The current owner of Permit 87894 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on January 29, 2019. It has a priority date of April 24, 2018 and an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Claims of Vested Right V11305, V11306, and V11307; and Permit 87763, 87764, 87765, 87766, 87769, 87877, 87878, 87879, 87881, 87882, 87883, 87884, 87885, 87886, 87887, 87888, 87889, 87888, 87889, 87890, 87891, 87892, 87893, 87894, 87895, 87896, and 87897 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

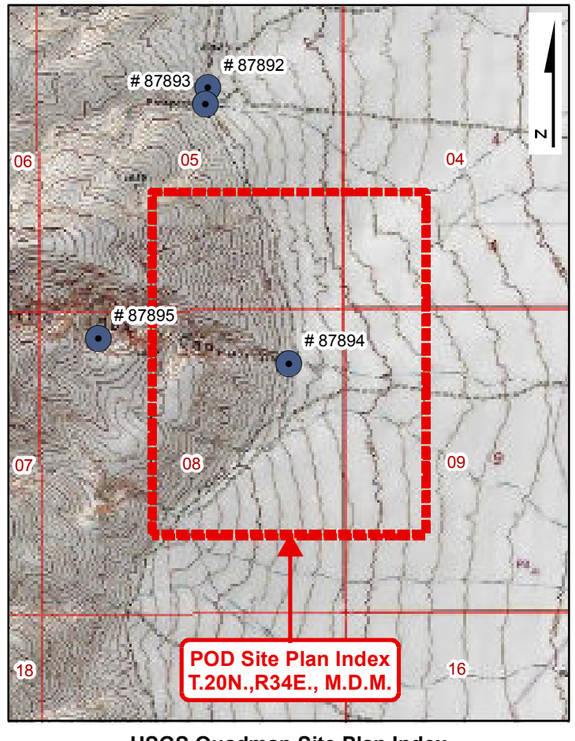

The point of diversion is located within the NE¼NE¼ Section 8, Township 20N, Range 34E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-471-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| NE | NE | 8 | 20N | 34E | 533 cattle |

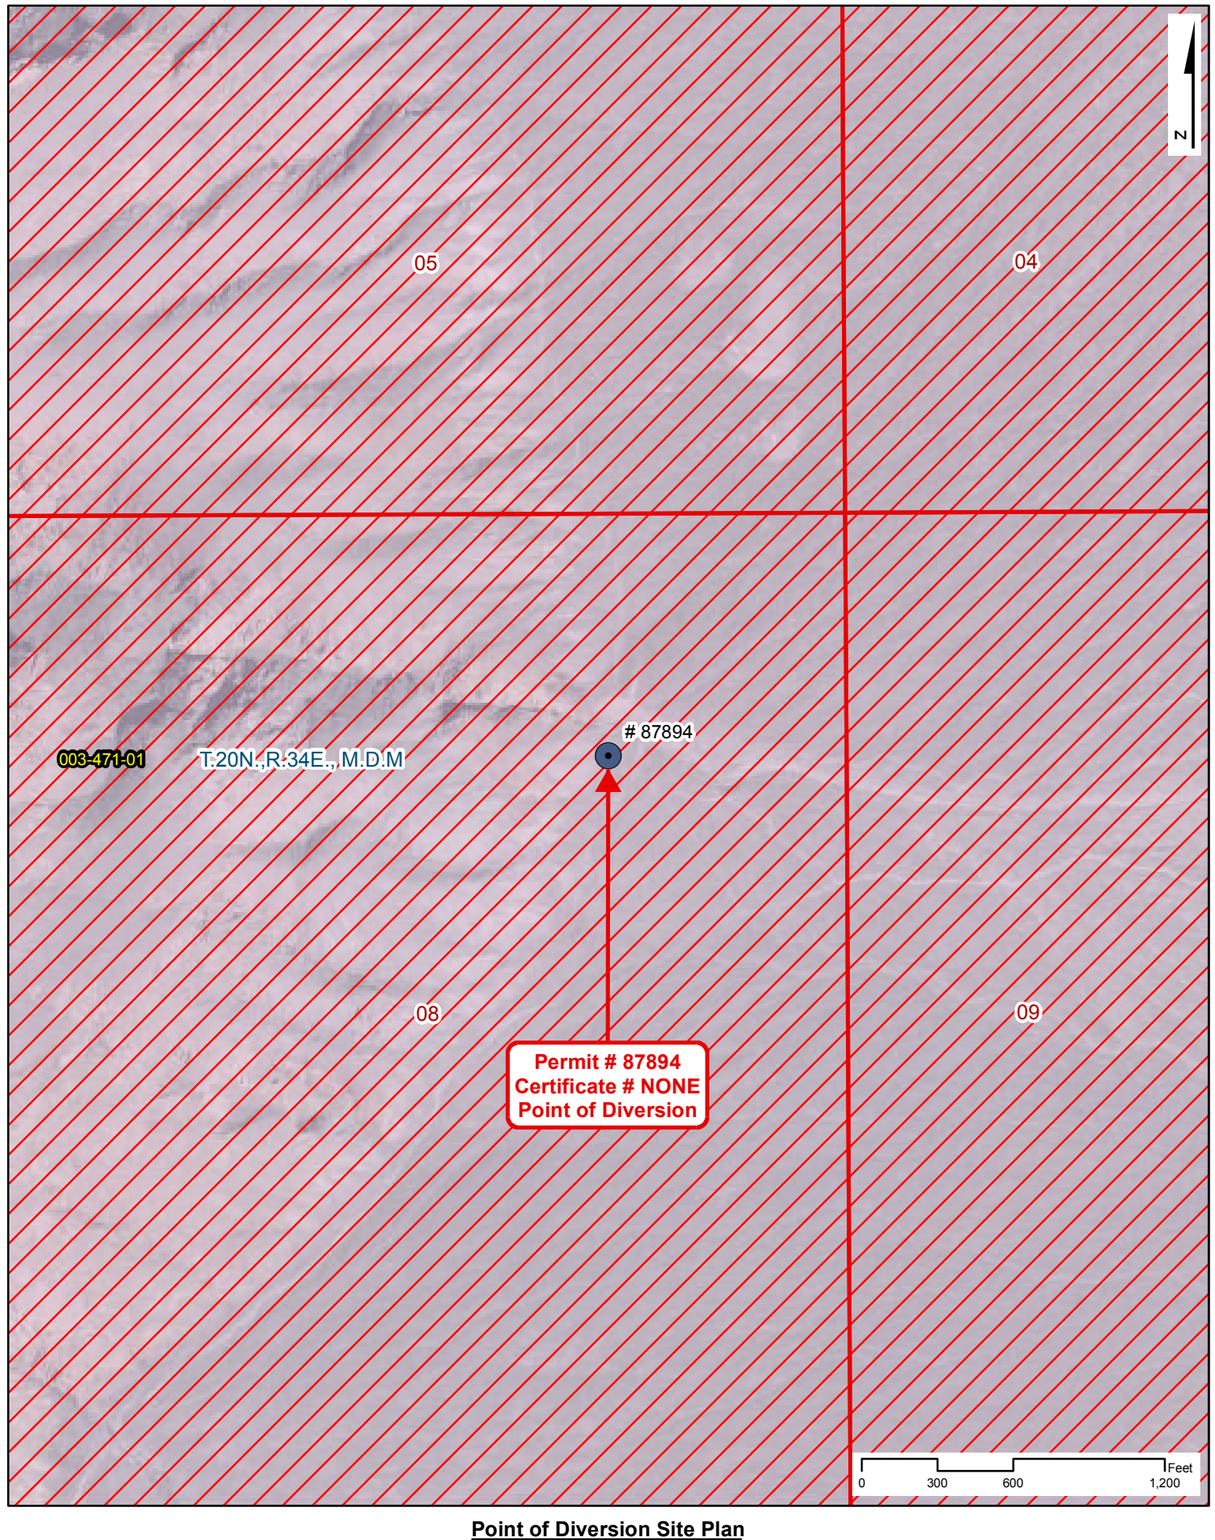

The Proof of Completion for Permit 87894 has a due date of January 29, 2020. The Proof Beneficial Use has a due date of January 29, 2021.

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

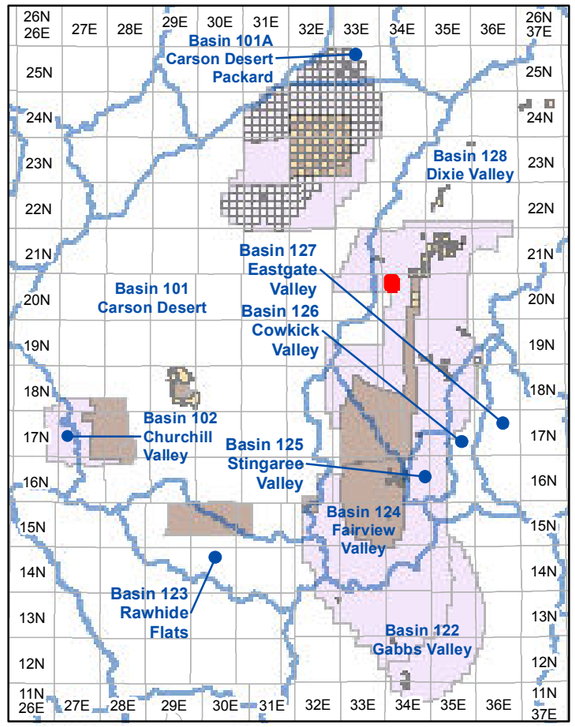

**Permit 87895**

The current owner of Permit 87895 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on January 29, 2019. It has a priority date of April 24, 2018 and an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Claims of Vested Right V11305, V11306, and V11307; and Permit 87763, 87764, 87765, 87766, 87769, 87877, 87878, 87879, 87881, 87882, 87883, 87884, 87885, 87886, 87887, 87888, 87889, 87888, 87889, 87890, 87891, 87892, 87893, 87894, 87895, 87896, and 87897 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

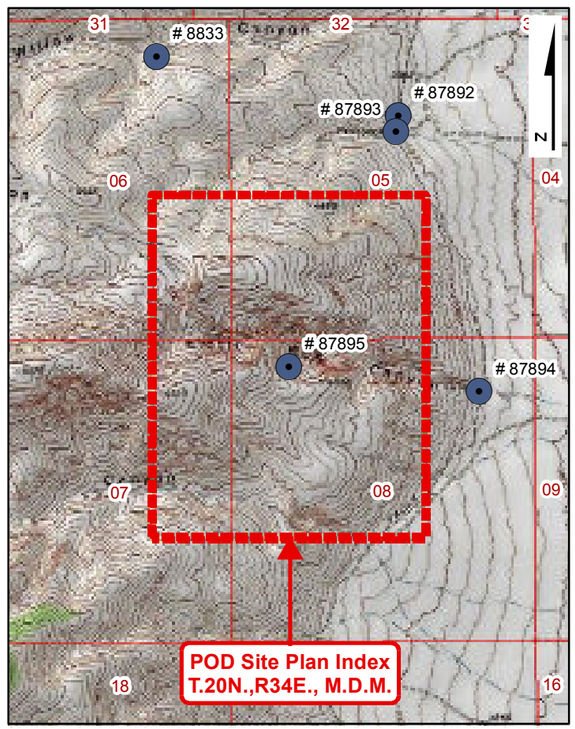

The point of diversion is located within the NW¼SW¼ Section 8, Township 20N, Range 34E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-471-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| NW | SW | 8 | 20N | 34E | 533 cattle |

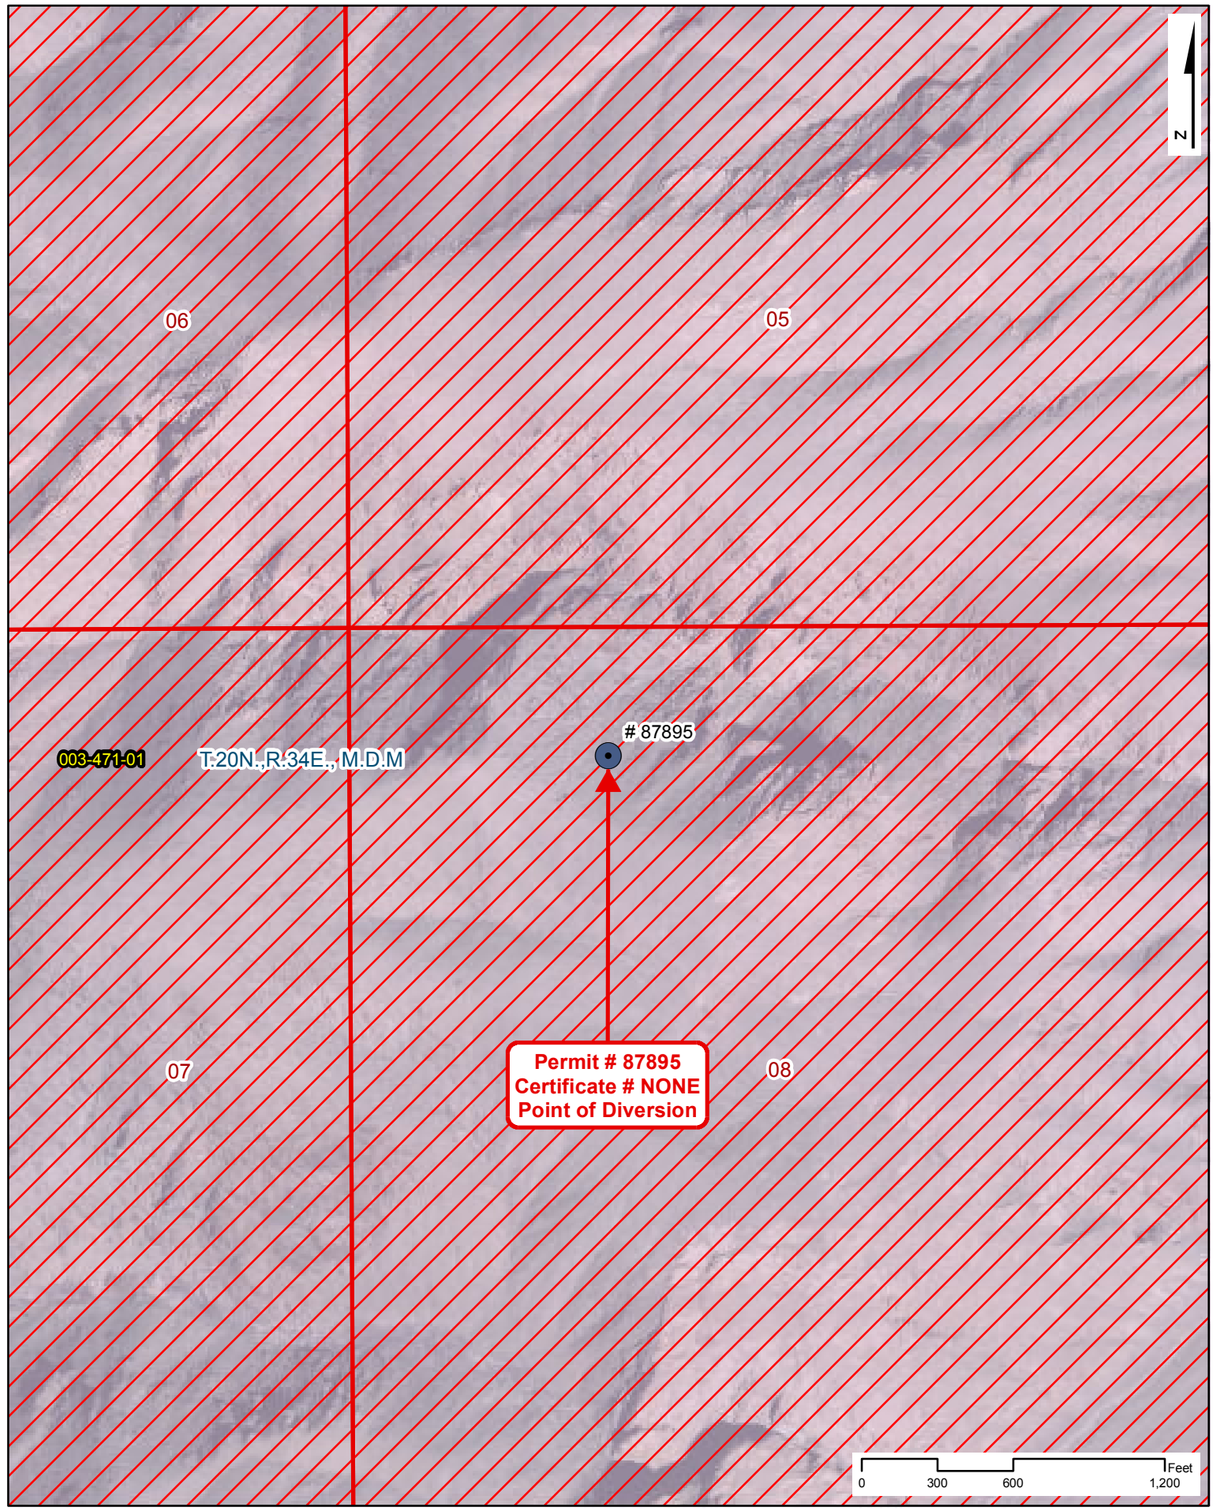

The Proof of Completion for Permit 87895 has a due date of January 29, 2020. The Proof Beneficial Use has a due date of January 29, 2021.

**********

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Claims of Vested Right V11305, V11306 and V11307; Permits 87763 through 87769 inclusive; Permits 87877 through 87879 inclusive and Permits 87881 through 87897 inclusive shall not exceed 11.94 acre-feet annually.

This permit is subject to the condition that the permittee must ensure that wildlife which have customarily used such water will have access thereto, NRS 533.367.

It is understood that the amount of water wherein granted is limited to the amount of water actually produced by the spring, and no rights in excess of that amount are implied or inferred.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **January** 29 **2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **January** 29 **2021**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **January, 2019**

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co, LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

---

1. The source of water is Big Box Canyon Spring
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet _____
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated _____
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12) _____
   (d) Power:
      (1) Horsepower developed _____
      (2) Point of return of water to stream _____

Revised 06/17

10-128

87895

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the NW¼ SW¼ of Section 8, T.20N., R.34E., M.D.B.&M., or at a point from which the SE corner of Section 36, T.21N., R.34E., M.D.B.&M. bears N. 70° 25' 40.23" E., a distance of 26,272.3 feet. (Please see map accompanying this application).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

within the NW¼ SW¼ of Section 8, T. 20 N., R.34E., M.D.B.&M. (Please see map accompanying this application)

RECEIVED
2018 APR 24 PM 2:24
STATE ENGINEER'S OFFICE

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Cattle currently have access to naturally flowing spring. No additional works are proposed at this time.

9. Estimated cost of works: $0.00

10. Estimated time required to construct works: N/A - Works complete
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 1 Year

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Stock have historically and currently use water from this naturally flowing spring. No additional works are proposed at this time.

**13. Miscellaneous remarks:**

Big Box Canyon Spring is located within the Dixie Valley Grazing Allotment (owned by the Applicant), and stock have historically used this spring as a water source. Stock are currently able to access the naturally flowing spring. No works are proposed at this time.

RECEIVED
2018 APR 24 PM 3:24
STATE ENGINEER'S OFFICE

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

Calculation of 5 Additional Cattle Allowed 31 days of the year:

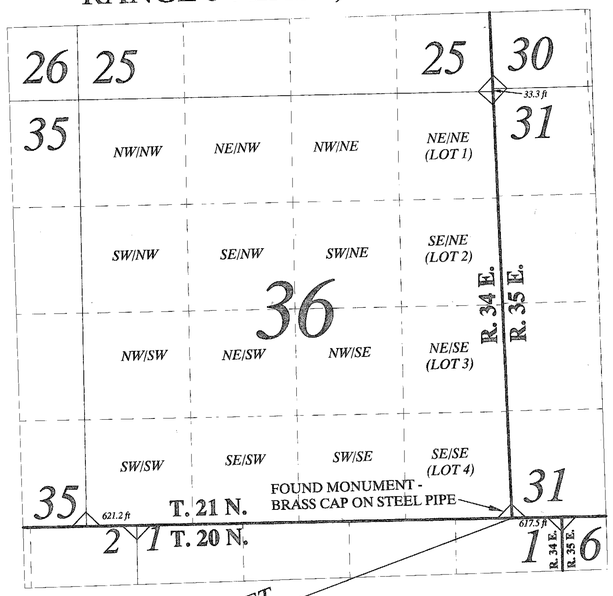

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

**Permit 87896**

The current owner of Permit 87896 is Bench Creek Ranch Co., LLC. The permit was approved by the State Engineer on January 29, 2019. It has a priority date of April 24, 2018 and an allowed diversion rate of 0.0166 CFS. The permitted manner of use is for stock-watering purposes. The total combined duty of water under Claims of Vested Right V11305, V11306, and V11307; and Permit 87763, 87764, 87765, 87766, 87769, 87877, 87878, 87879, 87881, 87882, 87883, 87884, 87885, 87886, 87887, 87888, 87889, 87888, 87889, 87890, 87891, 87892, 87893, 87894, 87895, 87896, and 87897 shall not exceed 11.94 acre-feet annually. The allowed period of use is from January 1 through December 31.

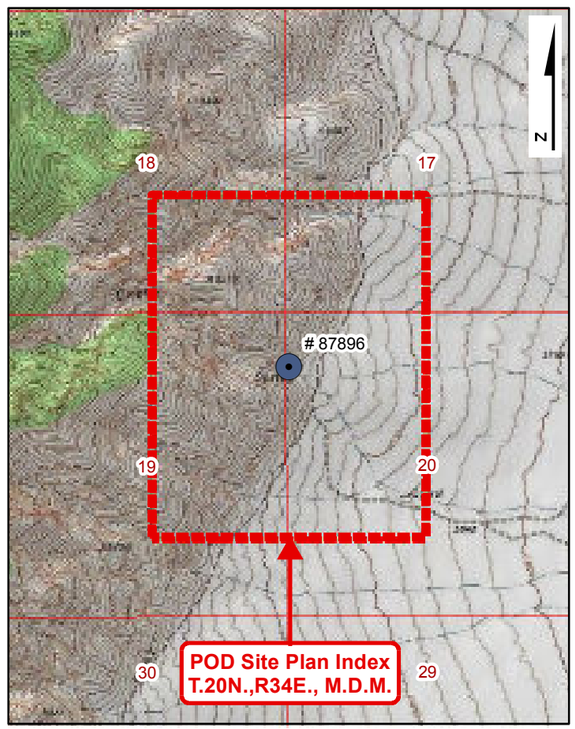

The point of diversion is located within the NW¼NW¼ Section 20, Township 20N, Range 34E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-471-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| NW | NW | 20 | 20N | 34E | 533 cattle |

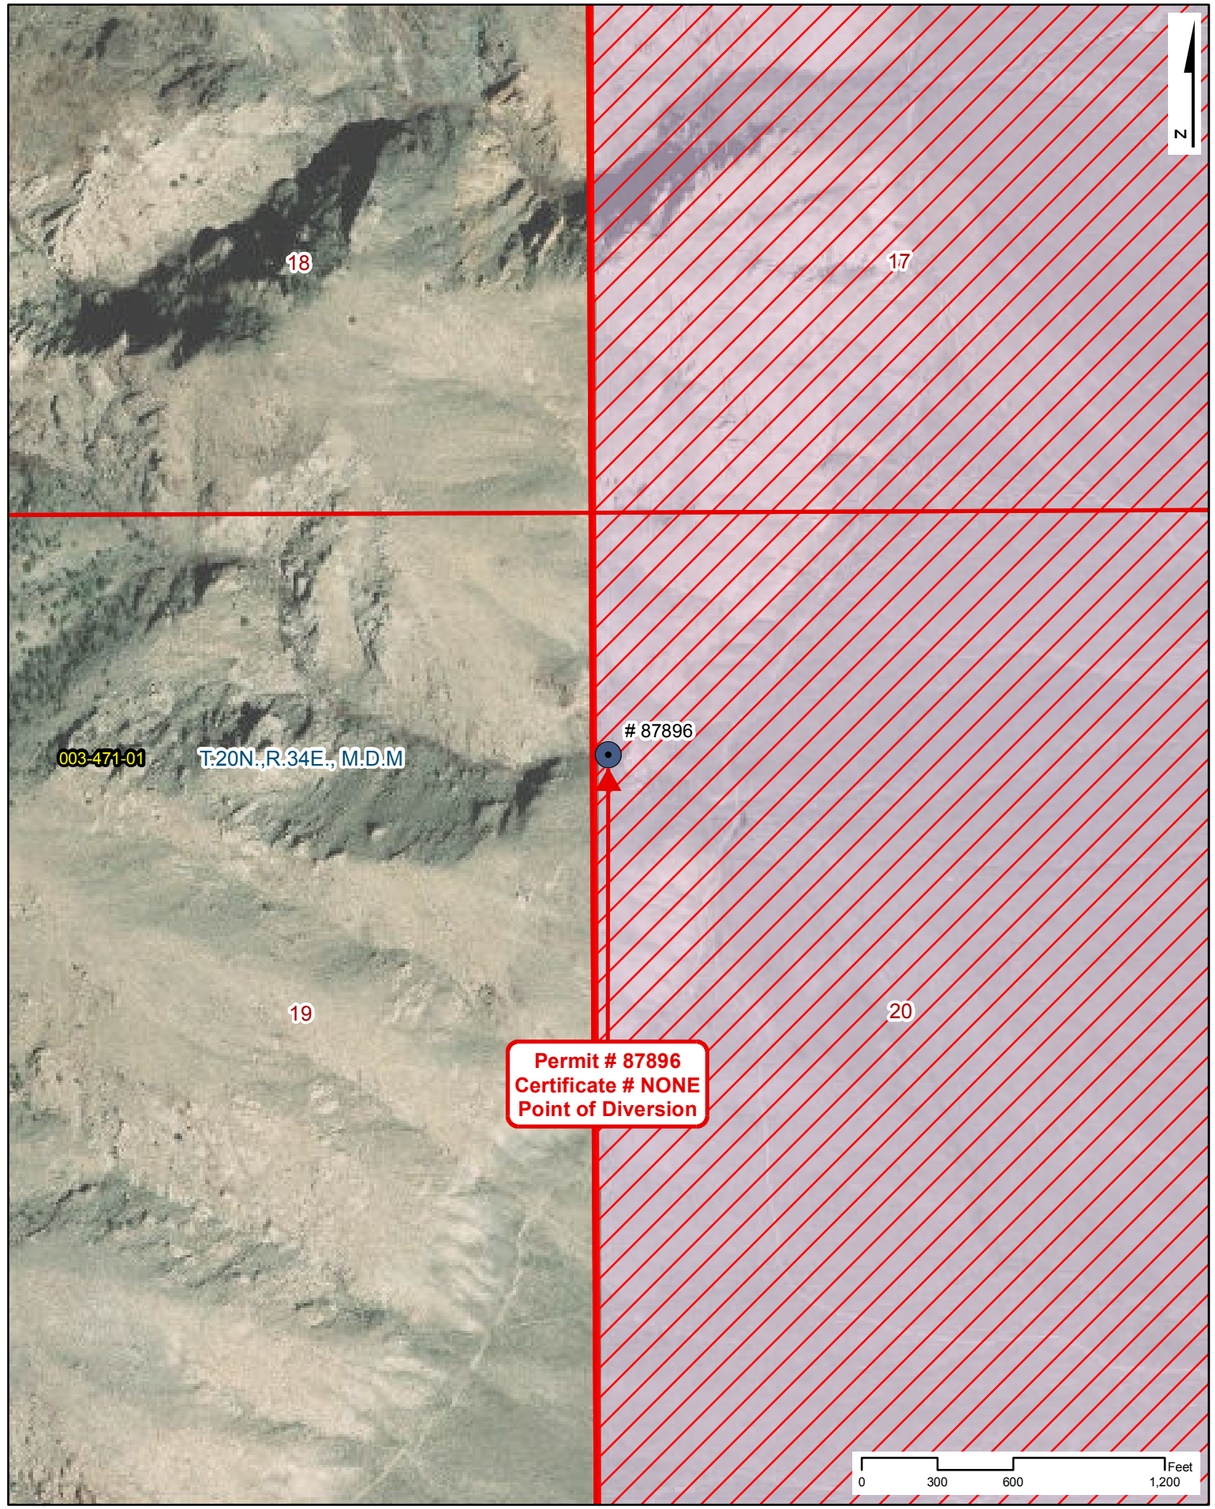

The Proof of Completion for Permit 87896 has a due date of January 29, 2020. The Proof Beneficial Use has a due date of January 29, 2021.

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Claims of Vested Right V11305, V11306 and V11307; Permits 87763 through 87769 inclusive; Permits 87877 through 87879 inclusive and Permits 87881 through 87897 inclusive shall not exceed 11.94 acre-feet annually.

This permit is subject to the condition that the permittee must ensure that wildlife which have customarily used such water will have access thereto, NRS 533.367.

It is understood that the amount of water wherein granted is limited to the amount of water actually produced by the spring, and no rights in excess of that amount are implied or inferred.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **not to exceed 0.01666 cubic feet per second and 11.94 acre-feet annually, or sufficient to water 533 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **January** 29 **2020**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **January** 29 **2021**

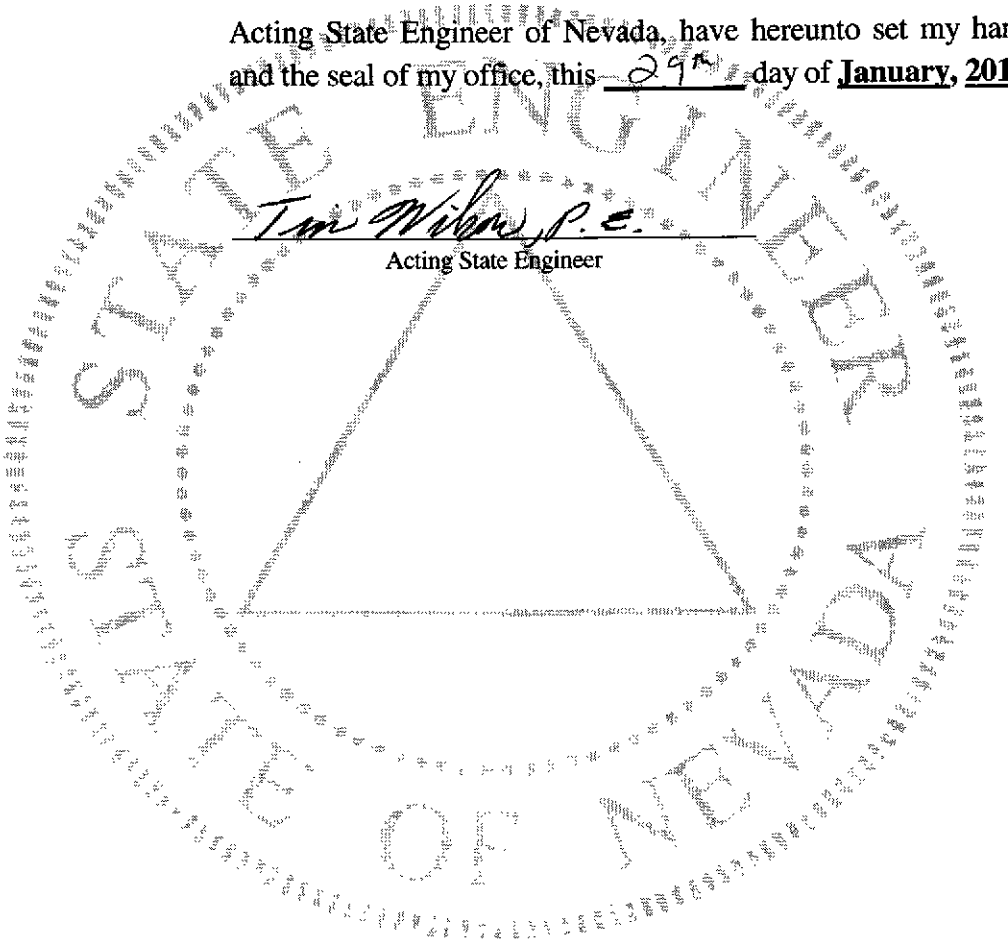

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TIM WILSON, P.E.,

Acting State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **January, 2019**

Tim Wilson, P.E.

Acting State Engineer

Application No. 87896

# APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

The applicant BENCH CREEK RANCH CO, LLC.

943 Edgecliff Drive (Street Address or P.O. Box) of Reno (City or Town)

NV 89523 (State and ZIP Code)

(E-mail Address)

hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

Bench Creek Ranch Co. LLC. is a Domestic Limited- Liability Company registered in Nevada since 2006.

---

1. The source of water is Freeman Creek Spring
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12)
   (d) Power:
      (1) Horsepower developed
      (2) Point of return of water to stream

Revised 06/17

10-128 CR

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the NW¼ NW¼ of Section 20, T.20N., R.34E., M.D.B.&M., or at a point from which the SE corner of Section 36, T.21N., R.34E., M.D.B.&M. bears N. 56° 28' 5.52" E., a distance of 30,851.8 feet. (Please see map accompanying this application).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

within the NW¼ NW¼ of Section 20, T. 20 N., R.34E., M.D.B.&M. (Please see map accompanying this application).

RECEIVED
2018 APR 24 PM 3:24
STATE ENGINEERS OFFICE

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

It currently is proposed that a trough system be installed to collect water from the spring; however, works might not be installed as cattle currently have access to the naturally flowing spring.

9. Estimated cost of works: $2,000.00

10. Estimated time required to construct works: 2 Years
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 3 Years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

It currently is proposed that a trough system be installed to collect water from the spring; however, works might not be installed as cattle currently have access to the naturally flowing spring.

**Attachment A**

**13. Miscellaneous remarks:**

Freeman Creek Spring is located within the Dixie Valley Grazing Allotment (owned by the Applicant), and stock have historically used this spring as a water source. Stock are currently able to access this naturally flowing spring.

Bench Creek Ranch Co., LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

1. The source of water is Sheep Canyon Spring
   Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.01665625 c.f.s., not to exceed 11.955 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).
   (a) If stored in a reservoir give the number of acre-feet
3. The water is to be used for Stockwatering
   Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated
   (b) Stockwater, state number and kind of animals 533 Cattle
   (c) Other use (describe fully in No. 12)
   (d) Power:
      (1) Horsepower developed
      (2) Point of return of water to stream

Revised 06/17

10-128 CR

87897

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the NW¼ SW¼ of Section 31, T.20N., R.34E., M.D.B.&M., or at a point from which the SE corner of Section 36, T.21N., R.34E., M.D.B.&M. bears N. 44° 58' 2.05" E., a distance of 43,235.6 feet. (Please see map accompanying this application).

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

within the NW¼ SW¼ and SW¼ SW¼ of Section 31, T. 20 N., R.34E., M.D.B.&M. (Please see map accompanying this application)

RECEIVED
2018 APR 24 PM 3:25
STATE ENGINEERS OFFICE

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Spring box, pipeline, and trough system is already in place. No additional works are proposed at this time.

9. Estimated cost of works: $0.00

10. Estimated time required to construct works: N/A - Works complete
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 1 Year

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Stock have historically and currently use water from this naturally flowing spring. Spring box, pipeline, and trough system is already in place. No additional works are proposed at this time.

**13. Miscellaneous remarks:**

Sheep Canyon Spring is located within the Dixie Valley Grazing Allotment (owned by the Applicant) and stock have historically used this spring as a water source. Stock are currently able to access the spring via existing spring box, pipeline, and trough system. No additional works are proposed at this time.

RECEIVED
2018 APR 24 PM 3:22
STATE ENGINEER'S OFFICE

Bench Creek Ranch Co. LLC is the current holder of the BLM Dixie Valley Grazing Allotment (Allotment 03018). They are allowed 528 cattle year round, plus an additional 5 cattle from March 1st, through March 31st. C.F.S. is based on the 533 maximum cattle allowed, and AFA is based on 528 cattle allowed year round plus the additional 5 cattle allowed from March 1st through March 31st.

Calculation of AFA 528 Cattle Allowed 365 days of the year:

0.00003125 cfs/cow *528 cattle * 723.97 AFA /cfs = 11.945505 AFA

Calculation of 5 Additional Cattle Allowed 31 days of the year:

0.00003125 cfs/cow * 5 cattle *723.97 AFA /cfs * 31 days / 365 days = 0.009607479 AFA

Total AFA Applied For = 11.945505 AFA + 0.009607479 AFA = 11.955 AFA

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

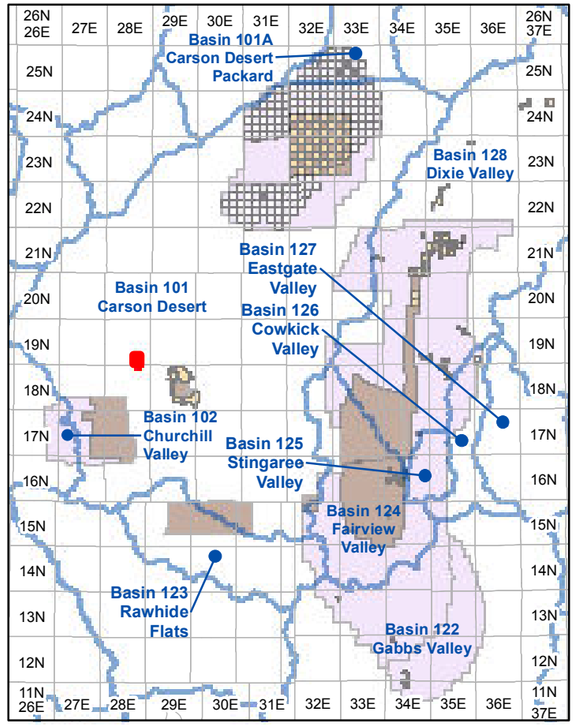

**Application 88495**

The current owner of Application 88495 is Churchill County. The application was submitted to the NDWR on November 26, 2018. The application requests a duty of 61.07 and an allowed diversion rate of 0.5 CFS be permitted for municipal purposes from January 1 through December 31.

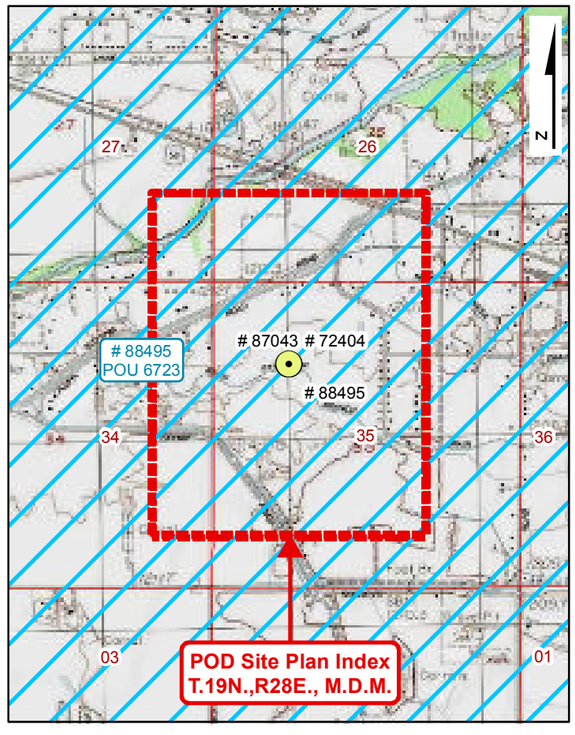

The proposed point of diversion is located within the SW¼NW¼ Section 35, Township 19N, Range 28E, MDM and is more specifically listed in the table below.

| Section(s) | Township | Range |
|---|---|---|
| 1-4, E½5, E½8, 9-16, E½17, E½20, 21-28, E½29, 30, 31, E½32, 33-36 | 20N | 26E |
| All Sections | 20N | 27E |

Application No. 88495

# APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

THIS SPACE FOR OFFICE USE ONLY

Date of filing in State Engineer's Office NOV 26 2018

Returned to applicant for correction

Corrected application filed Map filed Mar. 23, 2005 Under 72404

The applicant Churchill County, a political subdivision of the State of Nevada

155 N. Taylor Street, Suite 153 (Street Address or PO Box) of Fallon (City or Town)

Nevada 89406 (State and ZIP Code) jbarbee@churchillcounty.org (E-mail Address)

hereby make(s) application for permission to change the

☑ Point of diversion ☑ Place of use ☑ Manner of use ☐ of a portion

of water heretofore appropriated under (Identify existing rights by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree and identify right in Decree.)

Permit 26254, Certificate 10640

RECEIVED
2018 NOV 26 PM 12:17
STATE ENGINEER'S OFFICE

1. The source of water is Underground
   Name of stream, lake, underground, spring or other sources.

2. The amount of water to be changed 0.50 cfs, NTE 61.07 AFA
   Give diversion rate in cubic feet per second (CFS) AND duty in acre-feet annually (AFA).

3. The water to be used for Municipal
   Irrigation, power, mining, commercial, etc. If for stock, state number and kind of animals. Must limit to one major use

4. The water heretofore used for Quasi-Municipal & Domestic
   If for stock, state number and kind of animals.

5. The water is to be diverted at the following point (Describe as being within a 40-acre subdivision of public survey and by course and distance to a found section corner. If on unsurveyed land, it should be stated.)

SW1/4 NW1/4 of Section 35, T.19N., R.28E., M.D.B.&M. or at a point from which the NW corner of said Section 35 bears N. 42 degrees 50' 39" W. a distance of 1,973.0 feet. See map accompanying Permit 72404 for PPOD at Churchill County's Sandcreek municipal well.

6. The existing point of diversion is located within (If point of diversion is not changed, do not answer.)

NE1/4 NW1/4 of Section 26, T.19N., R.28E., M.D.B.&M. or at a point from which the NW corner of said Section 26 bears S. 78 degrees 45' 50" E., a distance of 2,099.40 feet. Use map on file under 26254 for the EPOD.

8-10 CC

7. Proposed place of use (Describe by legal subdivisions. If for irrigation, state number of acres to be irrigated.)

See Exhibit A. Refer to sheet 3 of 3 map accompanying permit 76541 for the depiction of Churchill County's municipal place of use. Water under this change application will be used to satisfy the County Club Estates subdivision connected to the County municipal system.

8. Existing place of use (Describe by legal subdivisions. If changing place of use and/or manner of use of irrigation permit, describe acreage to be removed from irrigation.)

A portion of the N1/2 of the NW1/4 of Section 26, T.19N., R.28E., M.D.B.&M. See map filed under permit 26254 for the EPOU.

9. Proposed use will be from January 1 (Month and Day) to December 31 (Month and Day) of each year.

10. Existing use permitted from January 1 (Month and Day) to December 31 (Month and Day) of each year.

11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e., diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

Existing Churchill County Sandcreek municipal well, treatment system, tanks, pumps & distribution system.

12. Estimated cost of works Complete

13. Estimated time required to construct works Complete
(If well completed, describe well.)

14. Estimated time required to complete the application of water to beneficial use 3 years

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing )

The County Club Estates subdivision is currently being served by Churchill's municipal system and this application seeks to move the Country Club Estates Water Company underground permit 26254 into the County system.

16. Miscellaneous remarks:

An ROC, abstract of title and deeds have been submitted to NDWR seeking to update ownership from Ralph T. Plimpton to Churchill County. In consultation and recommendation by Mike Randall, this application is being filed in Churchill County's name.

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

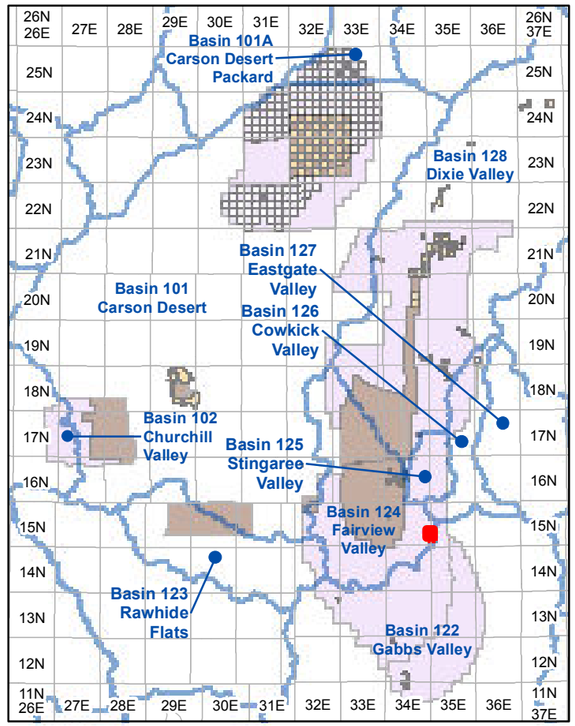

**Vested Right V02184**

The current owner of Vested Right V02184 is Geoge B. Williams Land & Livestock Co. The vested right was filed in the office of the State Engineer on March 30, 1928. It has a priority date of January 1, 1890 and a total duty of 26.88 acre-feet annually permitted for stock-watering purposes. The allowed period of use is from January 1 through December 31.

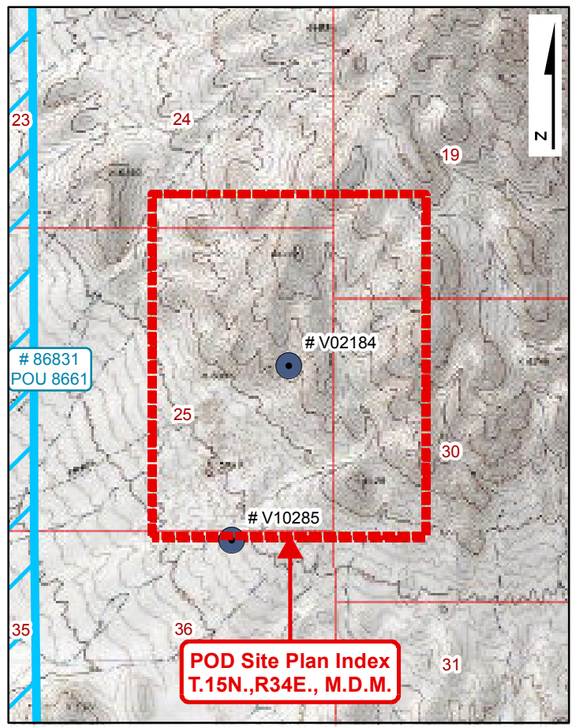

The point of diversion is located within the SE¼NE¼ Section 25, Township 15N, Range 34E, MDM. The permitted place of use is in the Fairview Valley Basin within Churchill County APN 002-311-02 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| SE | NE | 25 | 15N | 34E | 2000-6000 sheep |

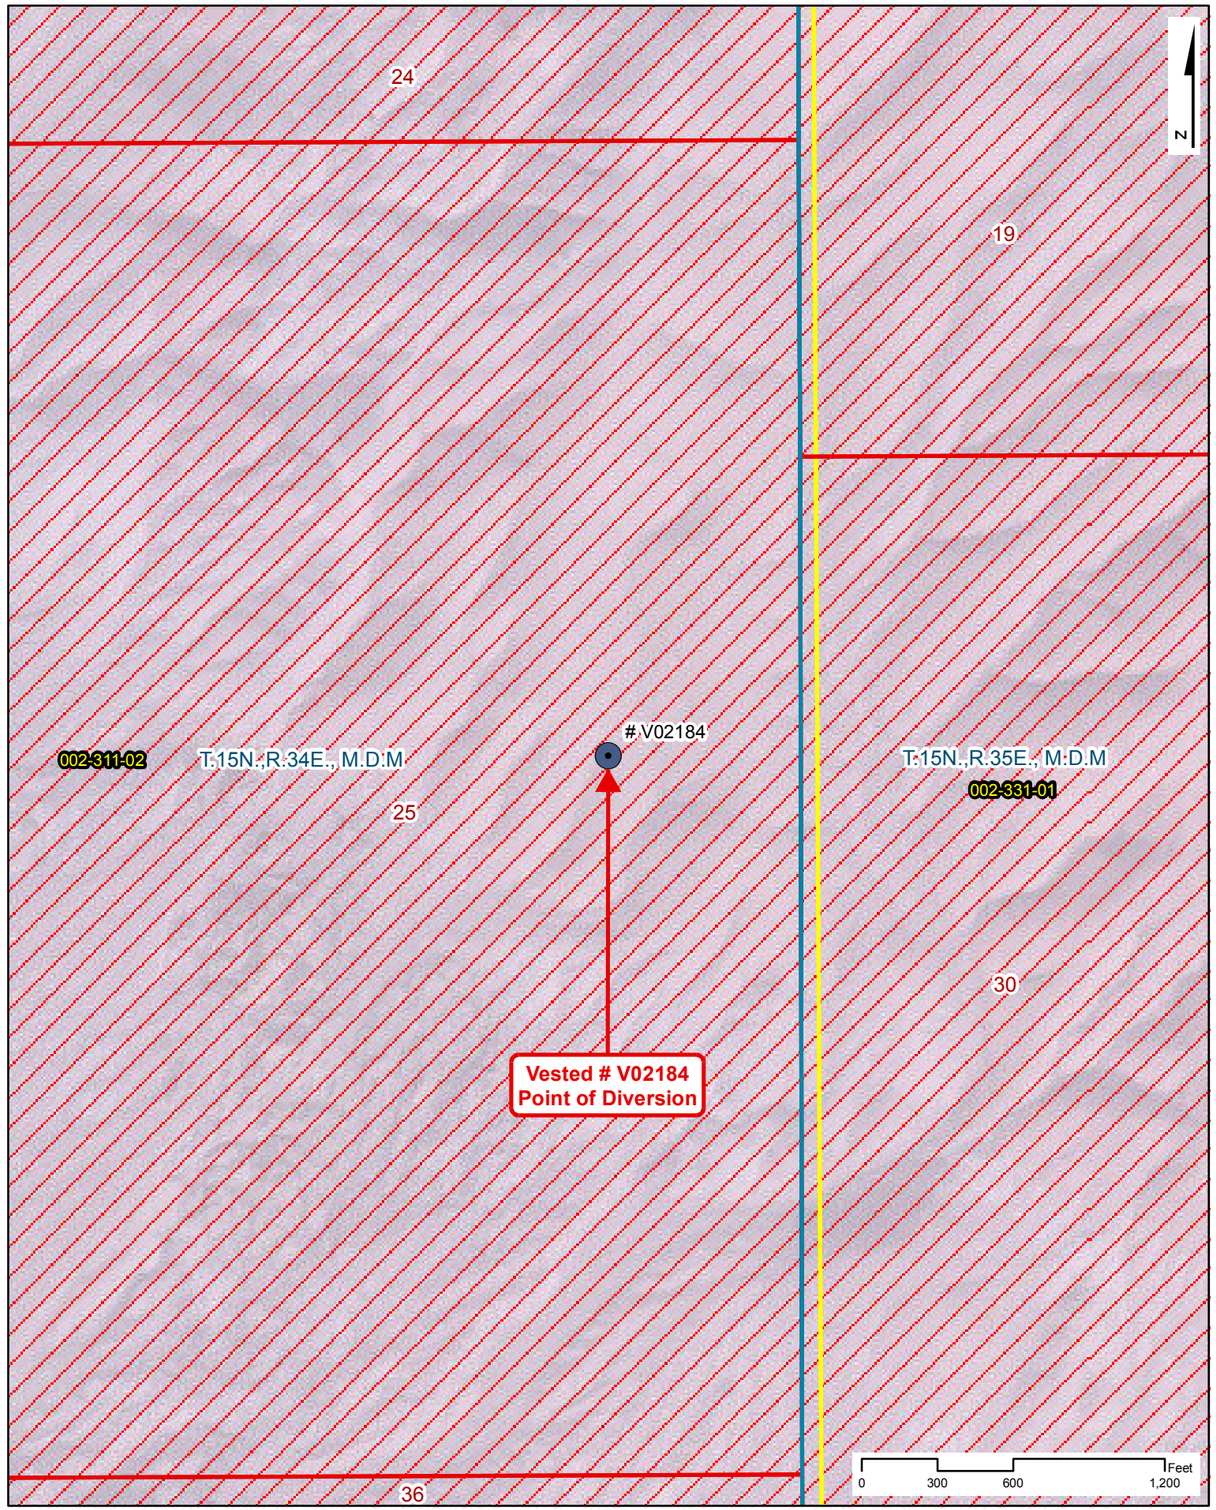

Vested Right V02184 is currently in good standing with the NDWR with no further action required.

# THE STATE OF NEVADA

## PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

From INDIAN SPRING
Name of natural water course

Through Natural Channel
Name of ditch, pipe line, etc.

GEORGE B. WILLIAMS, the undersigned, being first duly sworn, deposes and says that the statements herein contained relative to the appropriation of water by him are full and correct to the best of his knowledge and belief.

If proof is not made by claimant, deponent should state on this line by virtue of what authority he represents the claimant

(1) Name of claimant George B. Williams
Address Fallon, County of Churchill,
State of Nevada

(2) The means of diversion employed is Dam
Dam and ditch, pipe line, flume, etc.

(3) The water is impounded in Reservoir
Troughs, reservoirs, tanks, etc.

(4) The construction of the ditch or other works was begun 1890
and completed 1890

(5) The nature of the claimant's title to the land upon which the works are located is
Unsurveyed Public Land.

(6) The claimant's water right ~~was~~ (was not) recorded in the office of the County Recorder of
County, at Page of Book of

(7) The approximate number of animals watered by the claimant during the first year was,
and said watering was conducted for an approximate period of days during each of the following months. Since the year 1890, claimant has watered from 2000 to 6000 head of sheep at this source, and proposes to continue such watering.

(8) The approximate number of animals watered by claimant in subsequent years was as follows:

The number of livestock watered by claimant in the past and which he proposes to water in the future at this source, have been and will be in such numbers as to utilize substantially all that portion of the public range readily available to livestock watering at said source.

(9) The amount of water which it has been necessary to divert for the said purpose has been .....cubic feet per second.

40 miners inches equals 1 cubic foot per second

(10) The water is diverted from its source at As indicated under remarks. feet from
True bearing to nearest 5 minutes distance

the .....corner of Section....., T....., R.....E.,

Mount Diablo Base and Meridian.

NOTE—Information under (10) must invariably be given when a public corner is within 6 miles, unless the State Engineer consents to some other form of description.

(11) The works are located at Approximately SE¼NE¼ Sec.25,T15N.R34E.,M.D.B.& M.
Describe as within a 40-acre subdivision of public survey or by a tie in same manner as under (10)
Unsurveyed.

Remarks: The dam for impounding water is about 12 ft. high and 40 ft. long. The reservoir when full is about 100 ft. in diameter. The dam is of earth against a hand placed rock wall.

This dam is said to have been built by indians at an indefinite period, but since 1890 claimant has kept int in repair and has used the water impounded for watering his livestock. The spring is in the bed of the reservoir, but the principal supply of water comes from run-off of precipitation from the exposed bedrock drainage area above the dam.

The reservoir is located in some low rock buttes on the east edge of Bell Flat in Churchill County, Nevada.

Remarks: From a point on the dam, about its center:-

Serial No. 03204

THE STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

(1) Name of claimant Ira H. and Nina K. Kent

13333 Stillwater Road (Street and No. or P.O. Box No.) of FAllon (City or town)

Nevada 89406 (State and Zip Code No.)

(2) Source of water Burnt Cabin Spring (Name of natural water source.)

(3) The water is diverted by Spring Box with 75 feet of 1¼ inch pipe to one stock water trough (Dam, ditch, pipe line, natural channel, spring area, etc.)

(4) The water is diverted at the following point(s) NE¼ SW¼ Section 33, T19N, R33E, M.D.M. (unsurveyed) or at a point from which the northwest corner of Section 31, T19N, R34E, M.D.M., bears N 81° 16' E, 23,030 feet, distant. (Calculated from geological survey map.)

Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such reach.

(5) The water is impounded in stock water troughs (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun prior to 1905 (Date) and completed ..... (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is public domain with garzing permit (Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right ~~was~~ (was not) recorded in the office of the County Recorder of .....County, at Page.....of Book.....of.....

NOTE—Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

(9) The approximate number of animals watered by the claimant during the first year 1905 (Date), ± was 1000 cattle or ~~horses~~ 5000 sheep or ..... (Other). The watering was conducted during each of the following months

all year except the range is closed through part of October and November

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

1905 to 1918 1000 cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

1918 - 1941 5000 sheep 150 cattle

1941 - 1943 Range closed for aerial gunnery practice

1943 - 1979 600 to 900 cattle

(11) The amount of water which has been necessary to be diverted for this purpose has been

0.00223 cubic feet per second.

448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at Section 33, T19N, R33E, M.D.M. ( Unsurveyed )

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

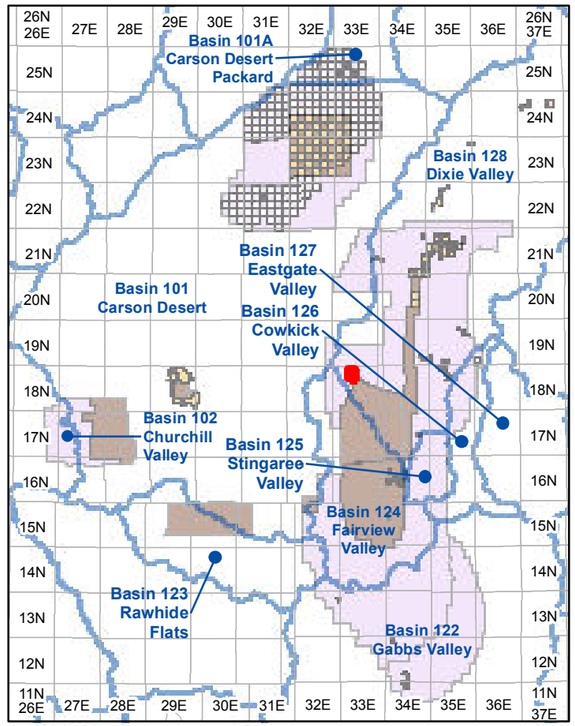

**Vested Right V03205**

The current owner of Vested Right V03205 is Ira H. and Nina K. Kent. The vested right was filed in the office of the State Engineer on August 7, 1979. It has a priority date of January 01, 1905 and a total duty of 6.44 acre-feet annually with an allowed diversion rate of 0.0089 CFS. The permitted manner of use is for stock-watering purposes. The allowed period of use is from January 1 through December 31.

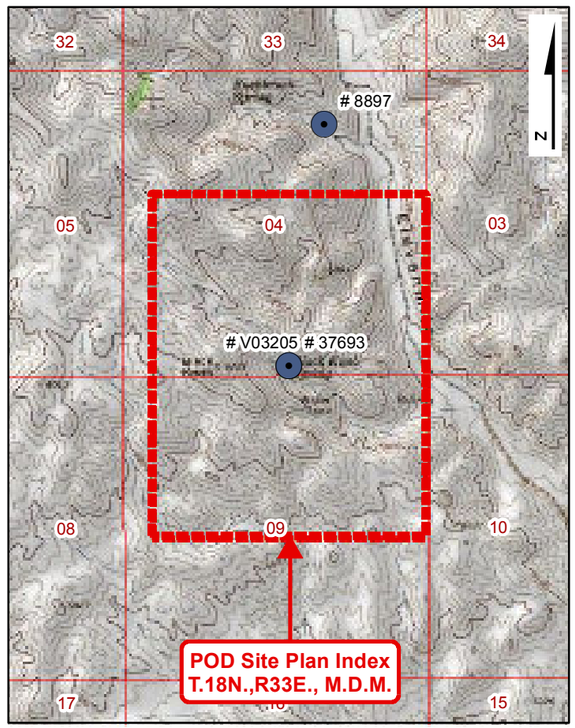

The point of diversion is located within the SW¼SE¼ Section 4, Township 18N, Range 33E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-071-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| | | 4 | 18N | 33E | 1000 cattle or 5000 sheep |

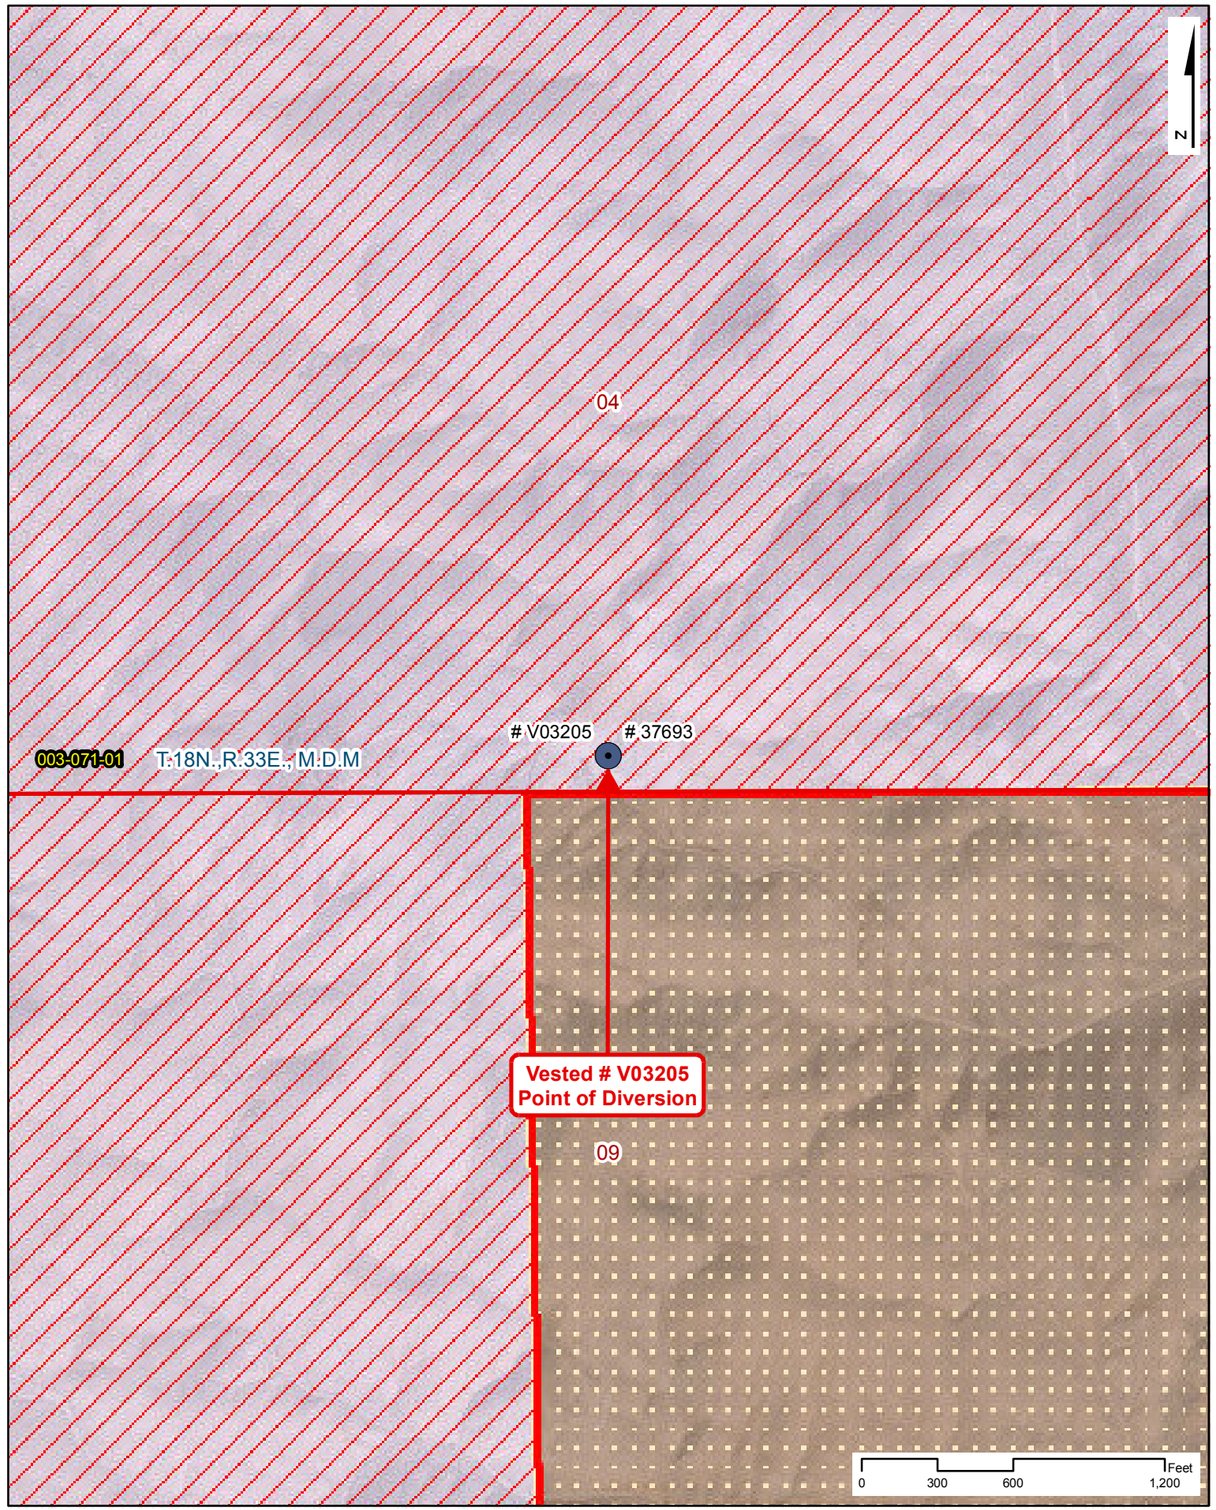

Vested Right V03205 is currently in good standing with the NDWR with no further action required.

Serial No. 03205

THE STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

(1) Name of claimant Ira H. and Nina K. Kent

13333 Stillwater Road (Street and No. or P.O. Box No.) of Fallon (City or town)

Nevada 89406 (State and Zip Code No.)

(2) Source of water Black Knob Spring (Name of natural water source.)

(3) The water is diverted by Spring box with 1000 feet pipe to one stock water trough (Dam, ditch, pipe line, natural channel, spring area, etc.)

(4) The water is diverted at the following point(s) SW¼ SE¼, Section 4, T18N, R33E, M.D.M. (unsurveyed) or at a point from which the southwest corner of Section 1 T18N, R33½E, M.D.M. bears S 88° 10' E, 18,310 feet, distant. (Calculated from geological survey map.)

Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such reach.

(5) The water is impounded in stock water troughs (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun prior to 1905 (Date) and completed ..... (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is public domain with grazing permit (Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right ~~was~~ (was not) recorded in the office of the County Recorder of .....County, at Page.....of Book.....of.....

NOTE—Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

(9) The approximate number of animals watered by the claimant during the first year 1905± (Date) was 1000 cattle or ~~horses~~ 5000 sheep or ..... (Other) The watering was conducted during each of the following months

all year except the range is closed through part of October and November

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

1905 - 1918 1000 cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

1918 - 1941 5000 sheep 150 cattle

1941 - 1943 Range closed for aerial gunnery practice

1943 - 1979 600 to 900 cattle

(11) The amount of water which has been necessary to be diverted for this purpose has been.....

0.00892 cubic feet per second.

448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at Section 4, T18N, R33E, M.D.M. (unsurveyed)

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

Remarks

Remarks.....

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by.....

are full and correct to the best of his knowledge and belief.

If proof is not made by claimant, deponent should state on this line by virtue of what authority he represents the claimant.

Serial No. 03206

THE STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

(1) Name of claimant Ira H. and Nina K. Kent

13333 Stillwater Road (Street and No. or P.O. Box No.) of Fallon (City or town)

Nevada 89406 (State and Zip Code No.)

(2) Source of water Lower Mullholand Spring (Name of natural water source.)

(3) The water is diverted by Springbox with 100 feet 1¼ inch pipe to one stock water trough (Dam, ditch, pipe line, natural channel, spring area, etc.)

(4) The water is diverted at the following point(s) NW¼ SW¼ Section 31, T19N, R33E, M.D.M. (unsurveyed) or at a point from which the northwest corner of Section 31, T19N, R34E, M.D.M. bears N 82° 40' E, 35,040 feet, distant. (Calculated from geological survey map.)

Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such reach.

(5) The water is impounded in stock water troughs (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun prior to 1905 (Date) and completed ..... (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is public domain with grazing permit (Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right was (was not) recorded in the office of the County Recorder of ..... County, at Page ..... of Book ..... of .....

NOTE—Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

FILED
Aug. 7, 1979
STATE ENGINEER'S OFFICE

(9) The approximate number of animals watered by the claimant during the first year 1905± (Date);

was 1000 cattle or ~~horses~~ 5000 sheep or ..... (Other) The watering

was conducted during each of the following months.....

all year except the range is closed through part of October and

NOvember

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

1905 - 1918 1000 cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

1918- 1941 5000 sheep 150 cattle

1941 - 1943 Range closed for aerial gunnery practice

1943 - 1979 600 to 900 cattle

(11) The amount of water which has been necessary to be diverted for this purpose has been.....

0.00669 cubic feet per second.

448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at Section 31, T19N, R33E, M.D.M. (unsurveyed)

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

Remarks.....

Remarks.....

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by.....

are full and correct to the best of his knowledge and belief.

If proof is not made by claimant, deponent should state on this line by virtue of what authority he represents the claimant.

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

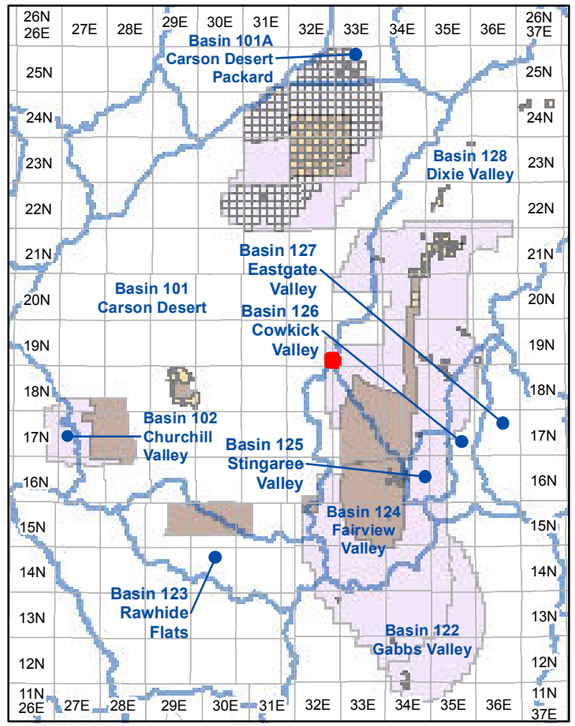

**Vested Right V03207**

The current owner of Vested Right V03207 is Ira H. and Nina K. Kent. The vested right was filed in the office of the State Engineer on August 7, 1979. It has a priority date of January 01, 1905 and a total duty of 4.85 acre-feet annually with an allowed diversion rate of 0.007 CFS. The permitted manner of use is for stock-watering purposes. The allowed period of use is from January 1 through December 31.

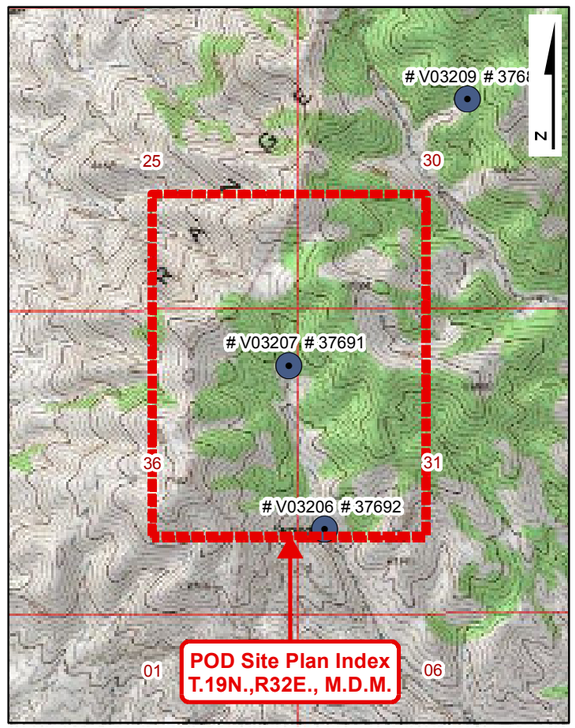

The point of diversion is located within the NE¼NE¼ Section 36, Township 19N, Range 32E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-211-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| NE | NE | 36 | 19N | 32E | 1000 cattle or 5000 sheep |

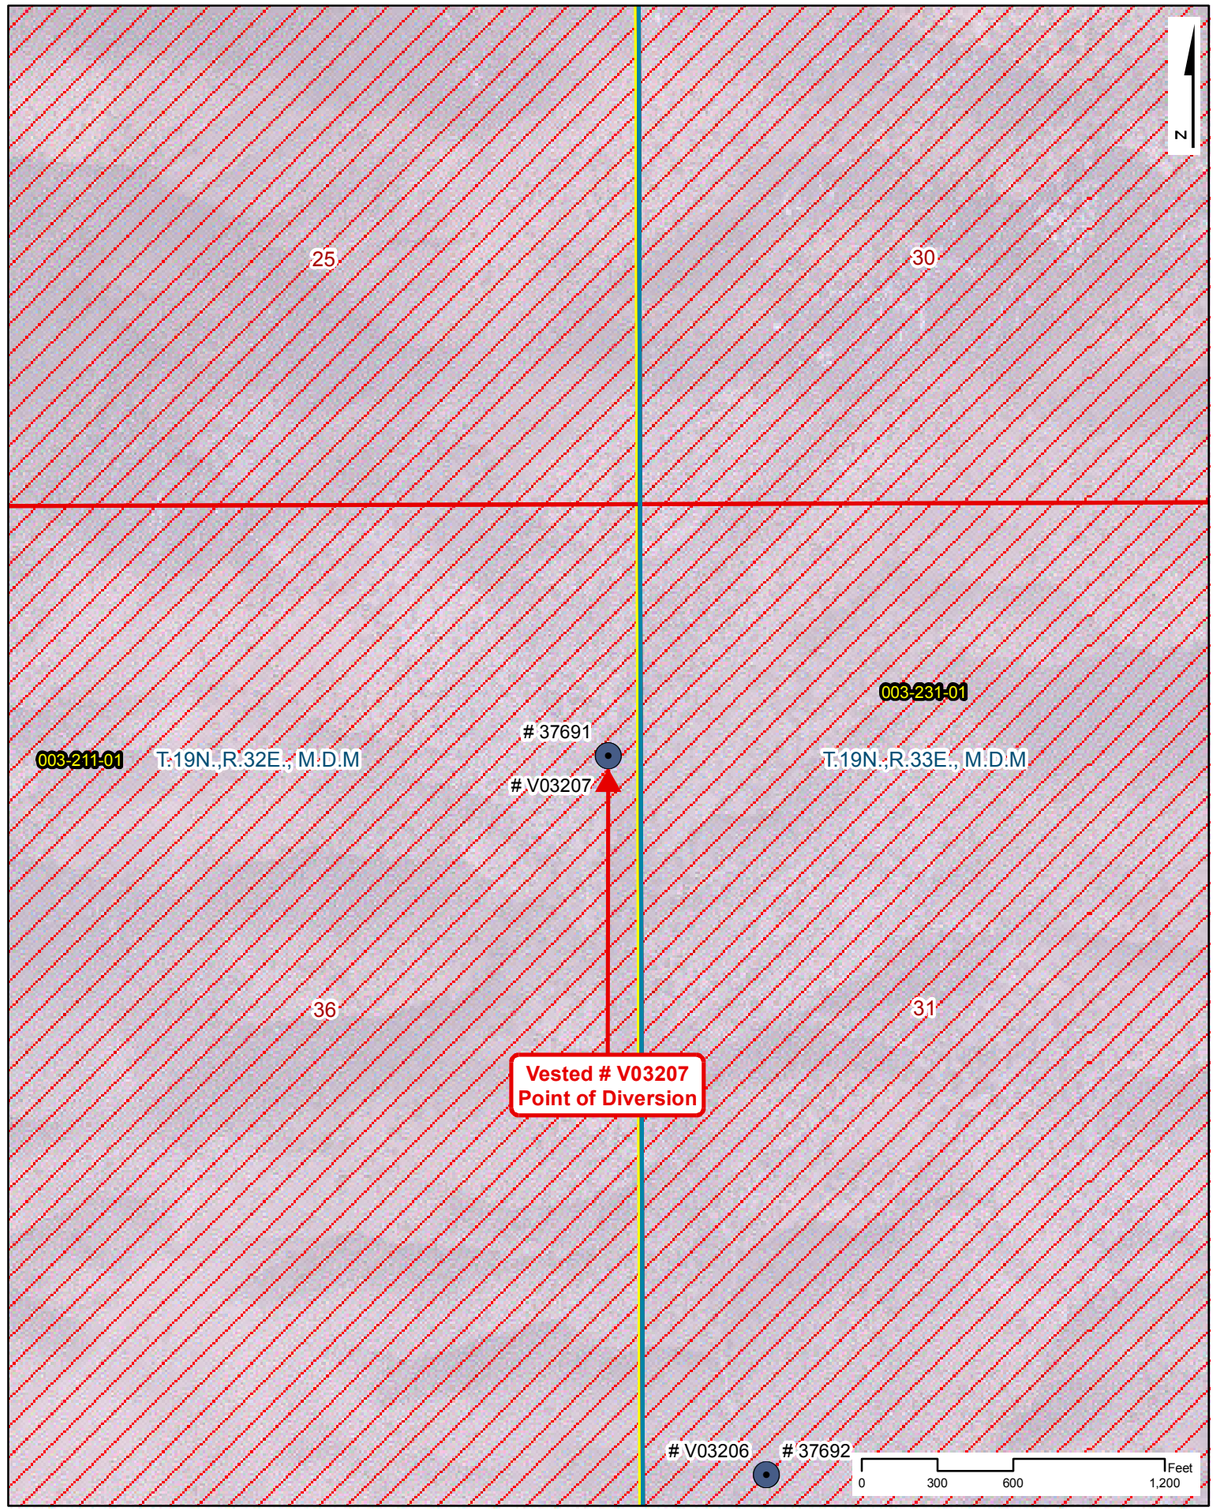

Vested Right V03207 is currently in good standing with the NDWR with no further action required.

Serial No. 0 3207

THE STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

(1) Name of claimant Ira H. and Nina K. Kent

13333 Stillwater Road (Street and No. or P.O. Box No.) of Fallon (City or town)

Nevada 89406 (State and Zip Code No.)

(2) Source of water "Upper Mullholand" Spring (Name of natural water source.)

(3) The water is diverted by spring box with 100 feet 1¼ inch pipe to one stock water trough (Dam, ditch, pipe line, natural channel, spring area, etc.)

(4) The water is diverted at the following point(s) NE¼ NE¼ Section 36, T19N, R32E, M.D.M. (unsurveyed) or at a point from which the NW corner of Section 31, T19N, R34E, M.D.M. bears N 87° 25' E, 35340 feet, distant. (Calculated from geological survey map.)

Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such reach.

(5) The water is impounded in stock water troughs (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun prior to 1905 (Date) and completed ..... (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is public domain with grazing permit (Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right ~~was~~ (was not) recorded in the office of the County Recorder of ..... County, at Page ..... of Book ..... of .....

NOTE—Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

1905±

(9) The approximate number of animals watered by the claimant during the first year (Date), was 1000 cattle or ~~horses~~ 5000 sheep or (Other). The watering was conducted during each of the following months all year except the range is closed through part of October and November.

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

1905 to 1918 - 1000 cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

1918 to 1941 - 5000 sheep 150 cattle

1941 to 1943 - Range closed for aerial gunnery practice

1943 to 1979 - 600 to 900 cattle

(11) The amount of water which has been necessary to be diverted for this purpose has been

0.00669 cubic feet per second.

448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at NE¼ NE¼ Section 36, T19N, R32E, M.D.M. (unsurveye

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

**Vested Right V03208**

The current owner of Vested Right V03208 is Ira H. and Nina K. Kent. The vested right was filed in the office of the State Engineer on August 7, 1979. It has a priority date of January 01, 1905 and a total duty of 4.84 acre-feet annually with an allowed diversion rate of 0.007 CFS. The permitted manner of use is for stock-watering purposes. The allowed period of use is from January 1 through December 31.

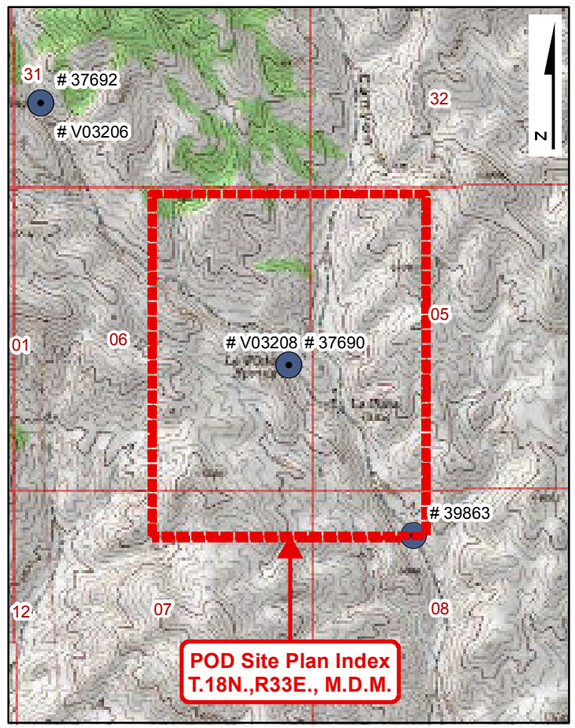

The point of diversion is located within the NE¼SE¼ Section 6, Township 18N, Range 33E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-071-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| NE | SE | 6 | 18N | 33E | 1000 cattle or 5000 sheep |

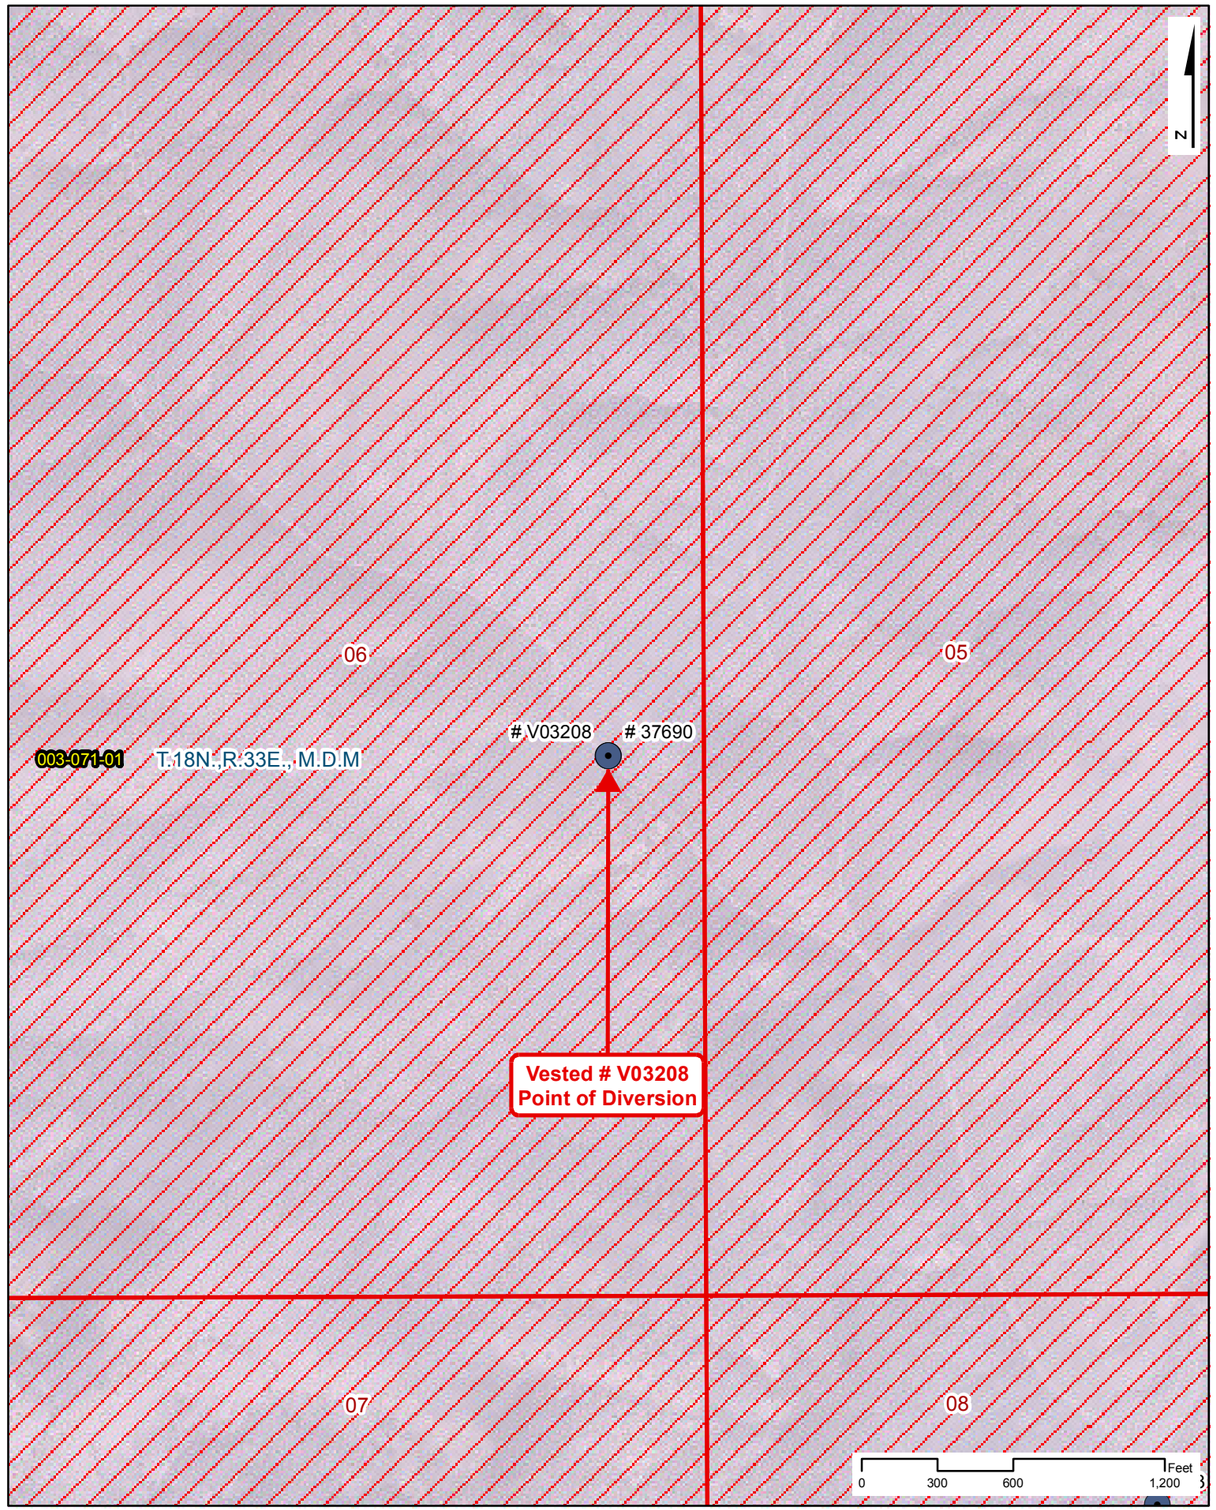

Vested Right V03208 is currently in good standing with the NDWR with no further action required.

Serial No. 03208

THE STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

(1) Name of claimant Ira H. and Nina K. Kent

13333 Stillwater Road (Street and No. or P.O. Box No.) of Fallon (City or town)

Nevada 89406 (State and Zip Code No.)

(2) Source of water "LaPlata" Spring (Name of natural water source.)

(3) The water is diverted by spring box with 200 feet 1¼ inch pipe to stock water trough (Dam, ditch, pipe line, natural channel, spring area, etc.)

(4) The water is diverted at the following point(s) NE¼ SE¼ Section 6, T18N, R33E, M.D.M. (unsurveyed) or at a point from which the southwest corner of Section 1, T18N, R33½E M.D.M. bears S 86° 40' E, 26815 feet, distant. (Calculated from geological survey map.)

Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such reach.

(5) The water is impounded in stock water trough (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun prior to 1905 (Date) and completed ..... (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is public domain with grazing permit (Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right [redacted] (was not) recorded in the office of the County Recorder of .....County, at Page.....of Book.....of.....

NOTE—Failure to record in the county in no way invalidates a water right, but if water right was so recorded, ~~supply full information under (8).~~

FILED
Aug. 7, 1979
STATE ENGINEER'S OFFICE

(9) The approximate number of animals watered by the claimant during the first year 1905± (Date)
was 1000 cattle or ~~horses~~ 5000 sheep or ..... (Other) The watering
was conducted during each of the following months all year except the range
is closed through part of October and November

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

1905 to 1918 - 1000 cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

1918 to 1941 - 5000 sheep 150 cattle

1941 to 1943 - range closed for aerial gunnery practice

1943 to 1979 - 600 to 900 cattle

(11) The amount of water which has been necessary to be diverted for this purpose has been
0.00669 cubic feet per second.
448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at NE¼ SE¼ Section 6, T18N., R33E., M.D.M. (unsurveye
Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

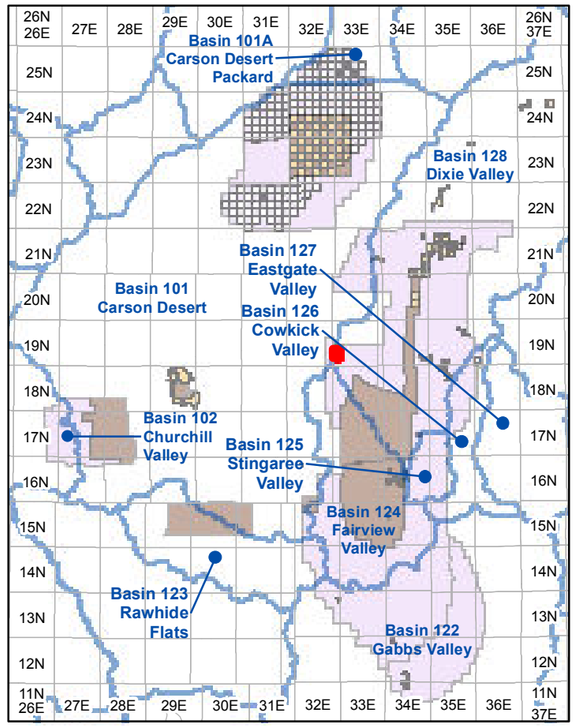

**Vested Right V03209**

The current owner of Vested Right V03209 is Ira H. and Nina K. Kent. The vested right was filed in the office of the State Engineer on August 7, 1979. It has a priority date of January 01, 1905 and a total duty of 1.63 acre-feet annually with an allowed diversion rate of 0.002 CFS. The permitted manner of use is for stock-watering purposes. The allowed period of use is from January 1 through December 31.

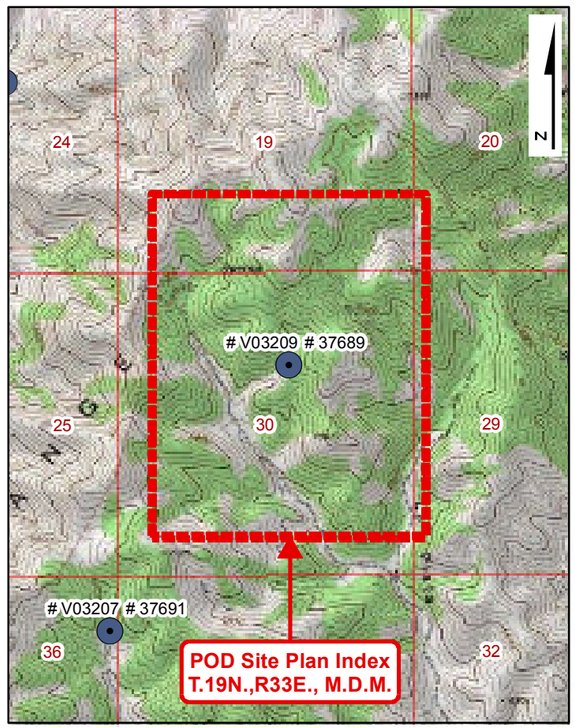

The point of diversion is located within the SW¼NE¼ Section 30, Township 19N, Range 33E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-231-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| SW | NE | 30 | 19N | 33E | 1000 cattle or 5000 sheep |

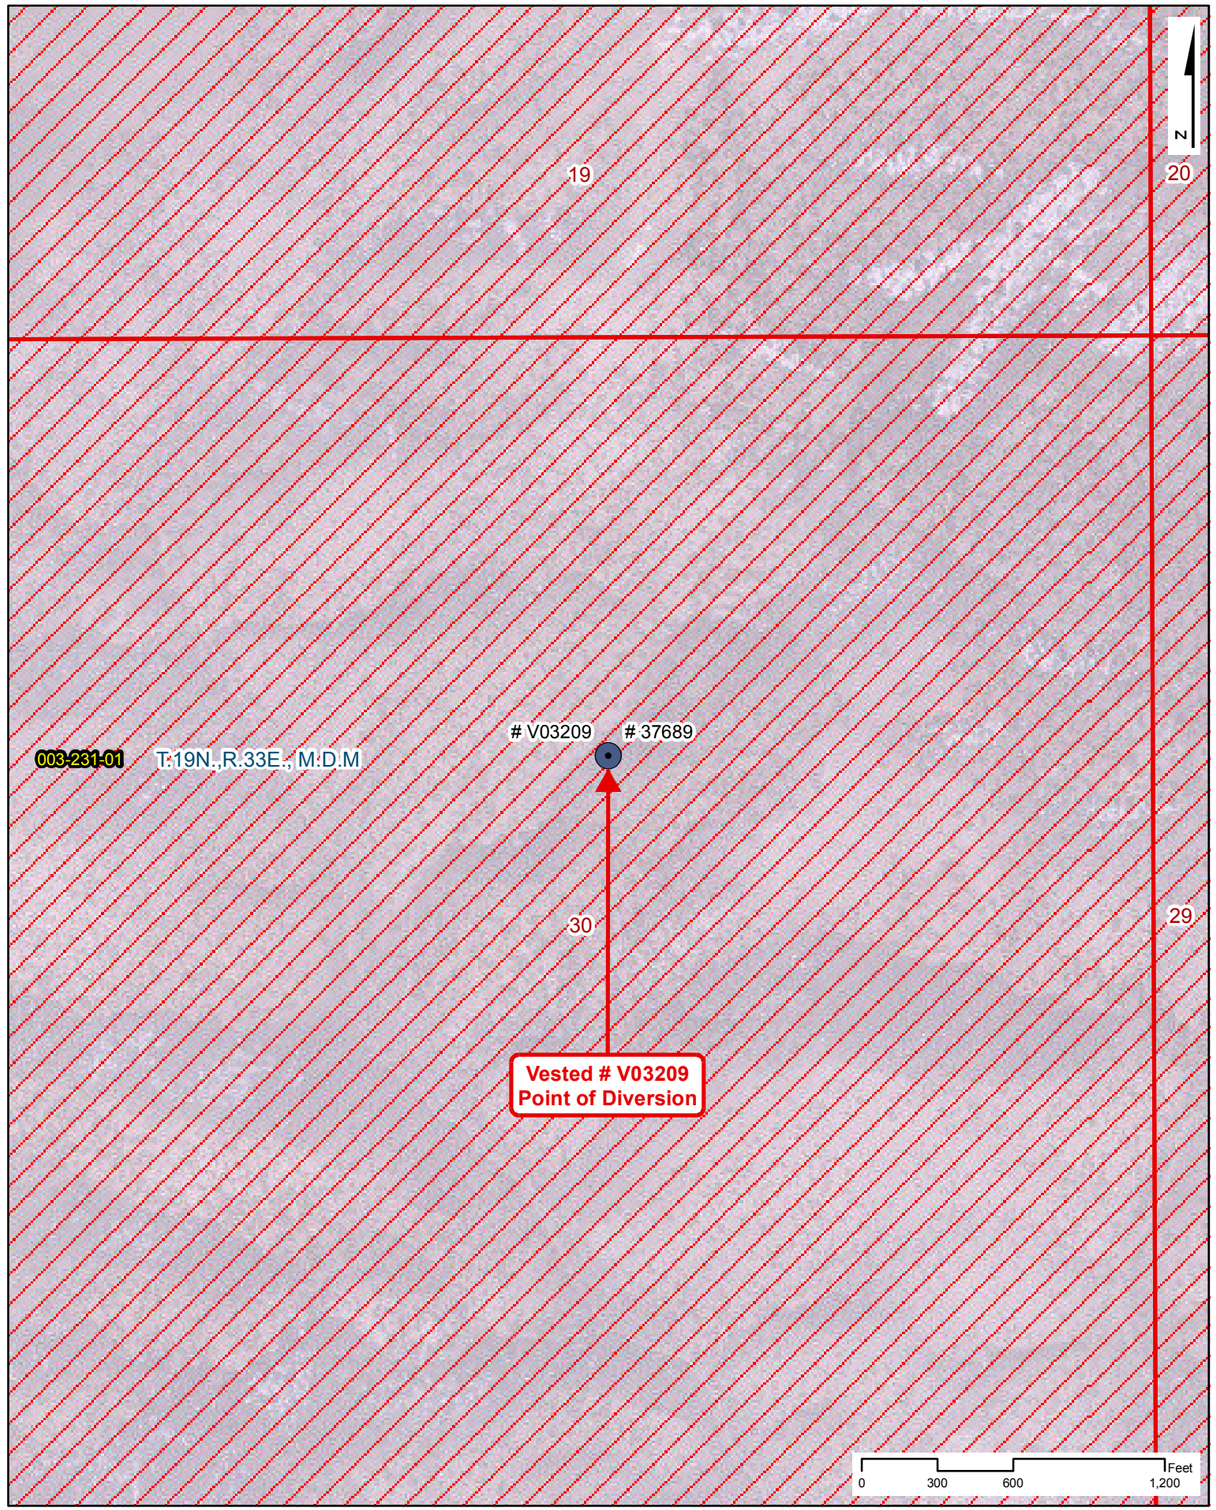

Vested Right V03209 is currently in good standing with the NDWR with no further action required.

Serial No. 03209

THE STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

(1) Name of claimant Ira H. and Nina K. Kent

13333 Stillwater Road (Street and No. or P.O. Box No.) of Fallon (City or town)

Nevada 89406 (State and Zip Code No.)

(2) Source of water Head LaPlata Spring (Name of natural water source.)

(3) The water is diverted by spring box with 1000 feet pipe to two stock water troughs (Dam, ditch, pipe line, natural channel, spring area, etc.)

(4) The water is diverted at the following point(s) SW¼ NE¼ Section 30, T19N, R33E, M.D.M. (unsurveyed) or at a point from which the southwest corner of Section 30, T19N, R34E, M.D.M. bears S 84° 40' E, 32,340 feet, distant. (Calculated from geological survey map)

Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such reach.

(5) The water is impounded in stock water troughs (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun prior to 1905 (Date) and completed ..... (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is public domain with grazing permit (Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right ~~was~~ (was not) recorded in the office of the County Recorder of ..... County, at Page ..... of Book ..... of .....

NOTE—Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

FILED
Aug 7 1979
STATE ENGINEER'S OFFICE

(9) The approximate number of animals watered by the claimant during the first year 1905± (Date), was 1000 cattle or ~~horses~~ 5000 sheep or ..... (Other). The watering was conducted during each of the following months

All year except the range is closed through part of October and November.

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

1905 to 1918 - 1000 cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

1918 to 1941 - 5000 sheep 150 cattle

1942 to 1943 - Range was closed for aerial gunnery practice

1943 to 1979 - 600 to 900 cattle

(11) The amount of water which has been necessary to be diverted for this purpose has been

0.00223 cubic feet per second.

448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at SW¼ NE¼ Section 30, T19N, R33E, M.D.M. (Unsurveyed)

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

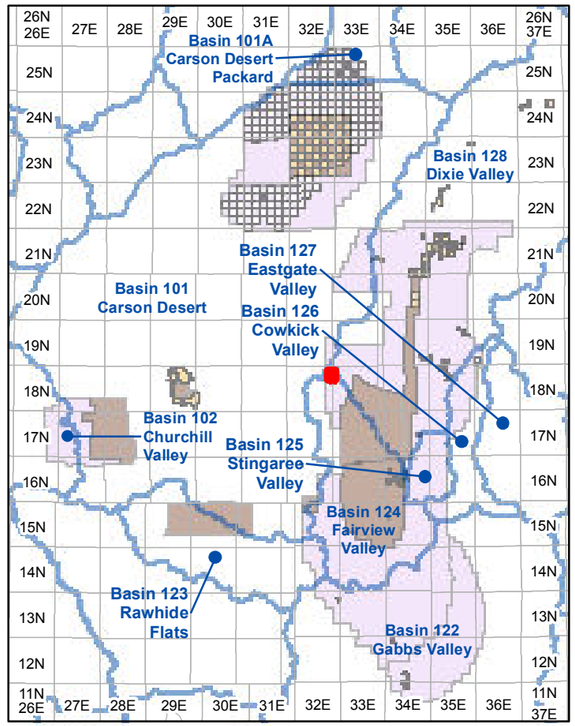

**Vested Right V03210**

The current owner of Vested Right V03210 is Ira H. and Nina K. Kent. The vested right was filed in the office of the State Engineer on August 7, 1979. It has a priority date of January 01, 1905 and an allowed diversion rate of 0.002 CFS. The permitted manner of use is for stock-watering purposes. The allowed period of use is from January 1 through December 31.

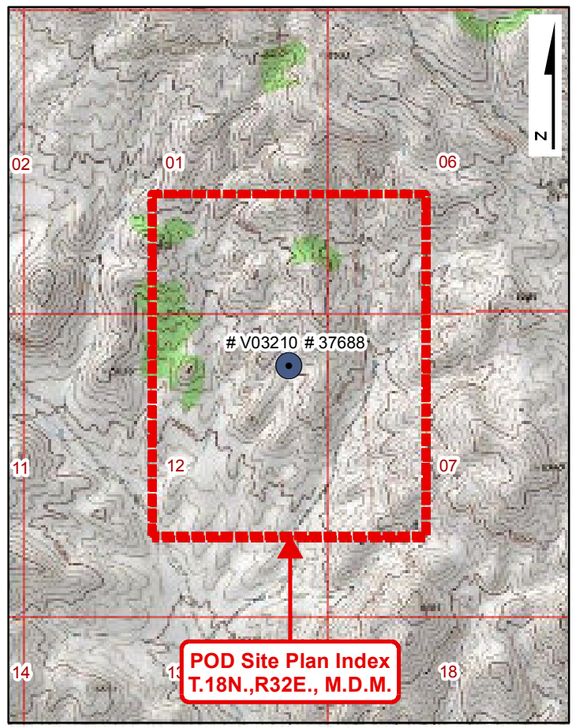

The point of diversion is located within the NE¼NE¼ Section 12, Township 18N, Range 32E, MDM. The permitted place of use is in the Fairview Valley Basin within Churchill County APN 003-051-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| NE | NE | 12 | 18N | 32E | 1000 cattle or 5000 sheep |

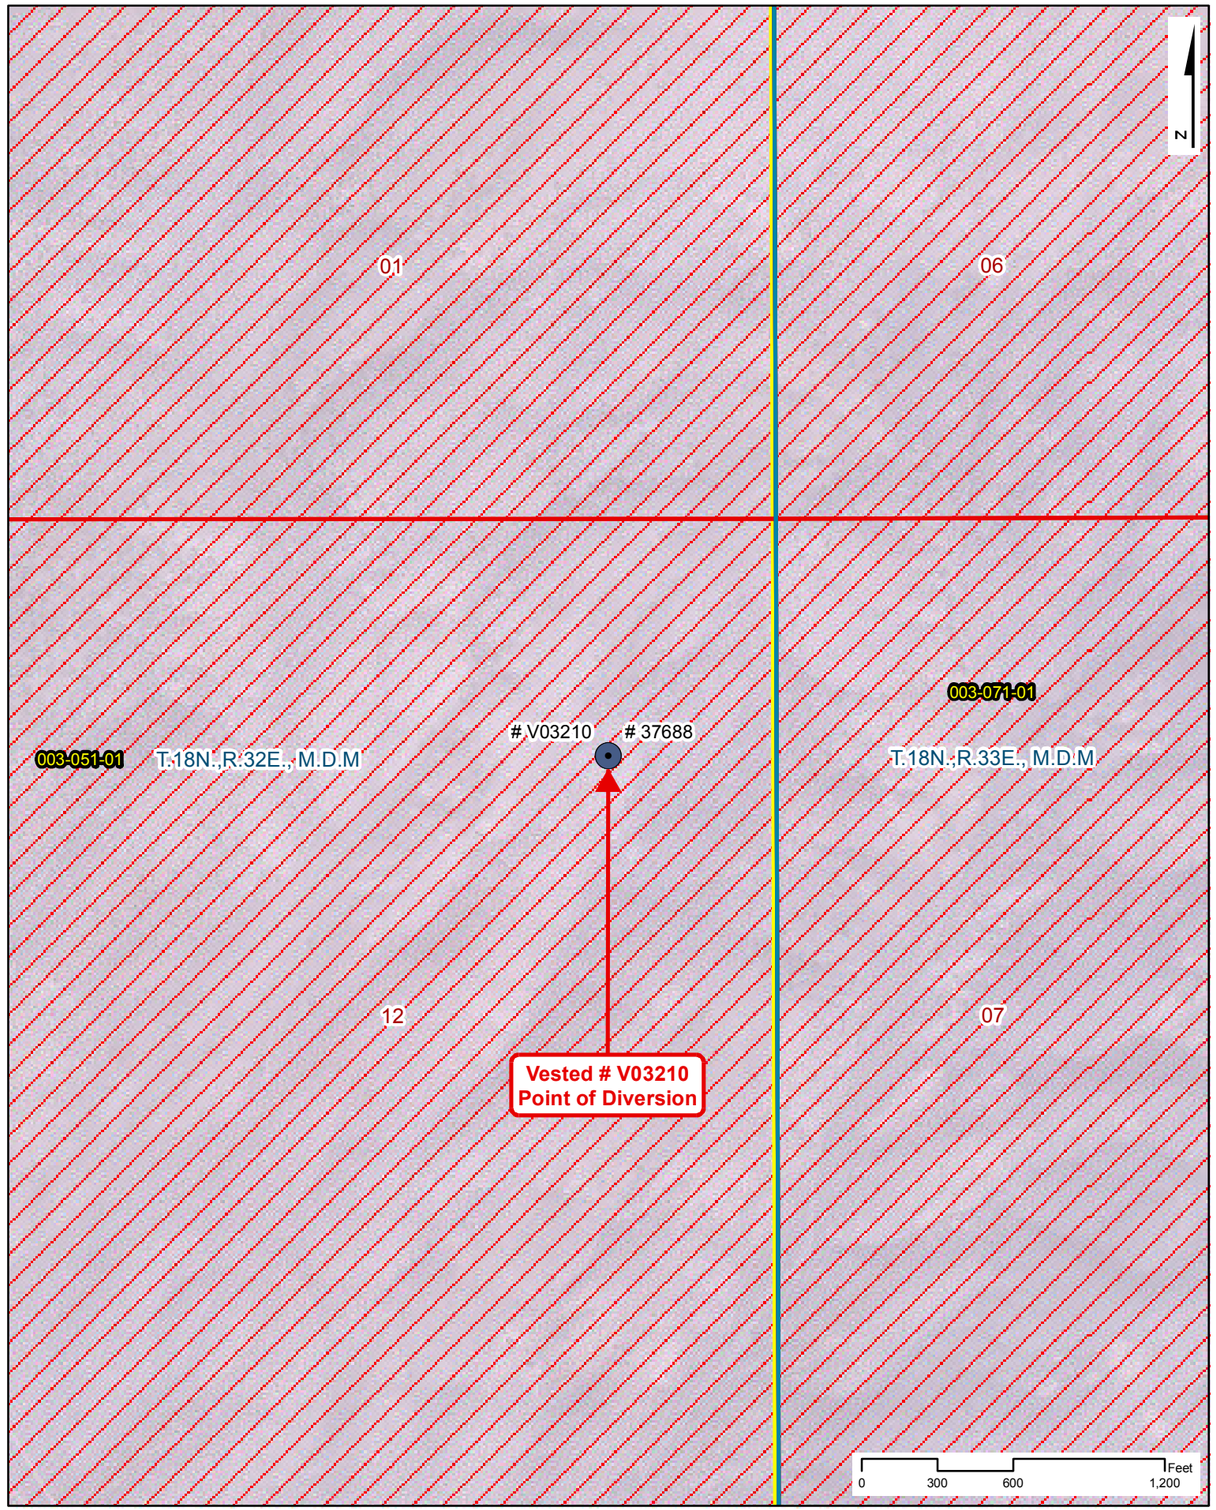

Vested Right V03210 is currently in good standing with the NDWR with no further action required.

Serial No. 03210

THE STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

(1) Name of claimant Ira H. and Nina K. Kent

13333 Stillwater Road (Street and No. or P.O. Box No.) of Fallon (City or town)

Nevada 89406 (State and Zip Code No.)

(2) Source of water Fitzcorral Spring (Name of natural water source.)

(3) The water is diverted by spring box with 100 feet pipe to stock water trough (Dam, ditch, pipe line, natural channel, spring area, etc.)

(4) The water is diverted at the following point(s) NE¼ NE¼ Section 12, T18N, R32E, M.D.M. (unsurveyed) or at a point from which the southwest corner of Section 1, T18N, R33½E, M.D.M., bears N 87° 20' E, 32370 feet, distant. (Calculated from geological survey map.)

Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such reach.

(5) The water is impounded in stock water trough (Troughs; tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun prior to 1905 (Date) and completed ..... (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is public domain with grazing permit (Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right ~~was~~ (was not) recorded in the office of the County Recorder of ..... County, at Page ..... of Book ..... of .....

NOTE—Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

FILED
Aug. 7, 1979
STATE ENGINEER'S OFFICE

(9) The approximate number of animals watered by the claimant during the first year 1905± (Date) was 1000 cattle or ~~horses~~ 5000 sheep or ..... (Other) The watering was conducted during each of the following months all year except the range is closed through part of October and November

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

1905 to 1918 - 1000± cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

1918 to 1941 - 5000 sheep 150 cattle

1942 to 1943 - Range closed for aerial gunnery practice

1943 to 1979 - 600 to 900 cattle

(11) The amount of water which has been necessary to be diverted for this purpose has been.....

0.00223 cubic feet per second.

448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at NE¼ NE¼ Section 12, T18N, R32E, M.D.M. (Unsurveyed)

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

**Vested Right V03215**

The current owner of Vested Right V03215 is Ira H. and Nina K. Kent, and Silver Range Ranch. The vested right was filed in the office of the State Engineer on August 7, 1979. It has a priority date of January 01, 1905 and a total duty of 4.85 acre-feet annually with an allowed diversion rate of 0.007 CFS. The permitted manner of use is for stock-watering purposes. The allowed period of use is from January 1 through December 31.

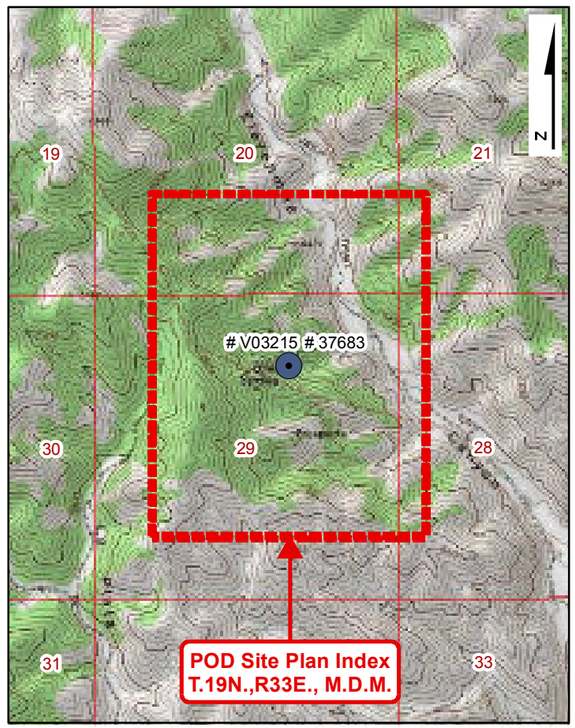

The point of diversion is located within the NW¼NE¼ Section 29, Township 19N, Range 33E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-231-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| NW | NE | 29 | 19N | 33E | 1000 cattle or 5000 sheep |

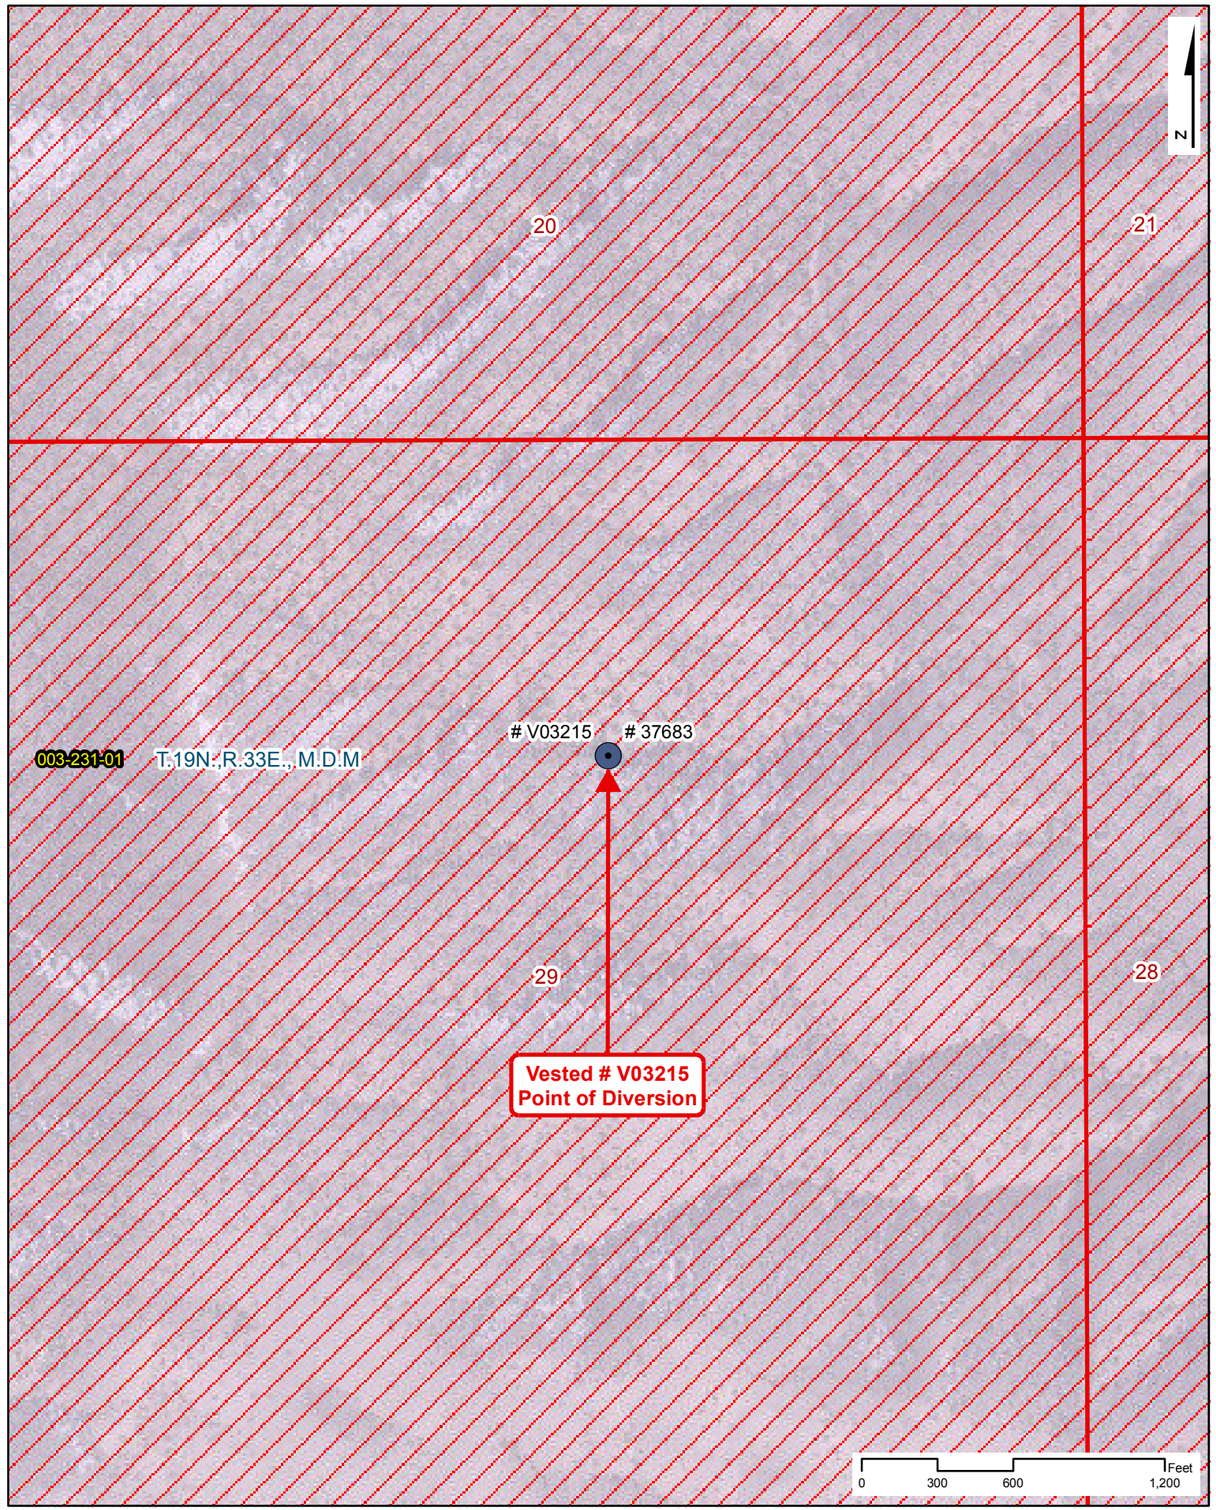

Vested Right V03215 is currently in good standing with the NDWR with no further action required.

Serial No. 03215

THE STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

(1) Name of claimant Ira H. and Nina K. Kent and Silver Range Ranch

13333 Stillwater Road (Street and No. or P.O. Box No.) of Fallon (City or town)

Nevada 89406 (State and Zip Code No.)

(2) Source of water Hike Spring (Name of natural water source.)

(3) The water is diverted by spring box with 1/4 mile of pipe to seven (Dam, ditch, pipe line, natural channel, spring area, etc.)

stock water troughs

(4) The water is diverted at the following point(s) NW¼ NE¼ Section 29, T19N, R33E, (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such reach.)

M.D.M. (unsurveyed) or at a point from which the southwest corner of Section 30 T19N, R34E, M.D.M. bears S 82° 35' E, 26840 feet, distant ( Calculated form geological survey map.)

(5) The water is impounded in stock water troughs (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun Prior to 1905 (Date)

and completed ..... (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is public domain with grazing permit (Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right ~~was~~ (was not) recorded in the office of the County Recorder of .....County, at Page.....of Book.....of.....

NOTE—Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

FILED
Aug 7, 1979
STATE ENGINEER'S OFFICE

(9) The approximate number of animals watered by the claimant during the first year 1905± (Date);

was 1000 cattle or ~~horses~~ 5000 sheep or ..... (Other). The watering

was conducted during each of the following months .....

All year except the range is closed through part of October and

November

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

1905 - 1918 1000 cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

1918 - 1941 5000 sheep 150 cattle

1941 - 1943 Range closed for aerial gunnery practice

1943 - 1979 600 to 900 cattle

(11) The amount of water which has been necessary to be diverted for this purpose has been.....

0.00669 cubic feet per second.

448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at NW¼ NE¼ Section 29, T19N R33E, M.D.M. (unsurveyed)

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

## SURVEYOR'S CERTIFICATE:

I, E. P. Osgood, Jr., being first duly sworn, depose and say that this map, consisting of one sheet, has been correctly drawn to the designated scale from field notes of a survey made by me on July 25, 1979; that it truly and correctly represents the location and extent of the works used to divert water from named springs, in Churchill County, by Ira H. and Nina K. Kent for stockwatering purposes; that the point of diversion, the location and size of the diverting channel or other conduit, the place and manner of use, and the location and names of all other works or streams which are crossed by or connected with the said works, are fully and correctly designated thereon.

E. P. Osgood Jr.

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

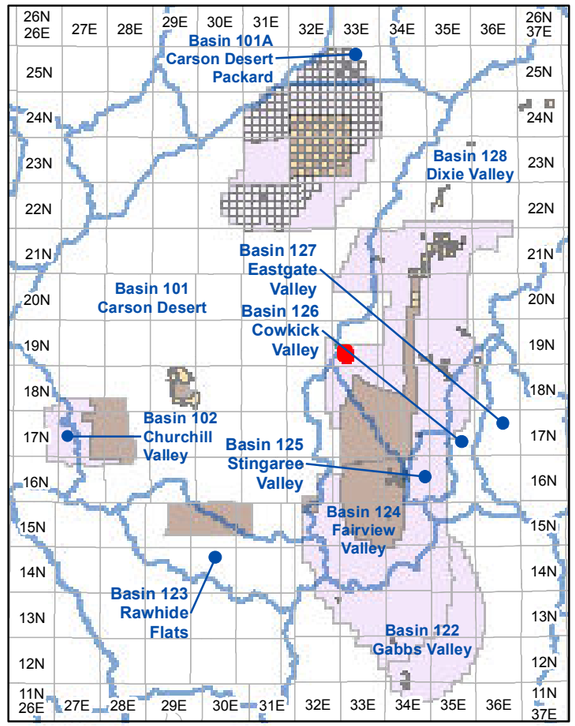

**Vested Right V03215**

The current owner of Vested Right V03215 is Ira H. and Nina K. Kent, and Silver Range Ranch. The vested right was filed in the office of the State Engineer on August 7, 1979. It has a priority date of January 01, 1905 and a total duty of 4.85 acre-feet annually with an allowed diversion rate of 0.007 CFS. The permitted manner of use is for stock-watering purposes. The allowed period of use is from January 1 through December 31.

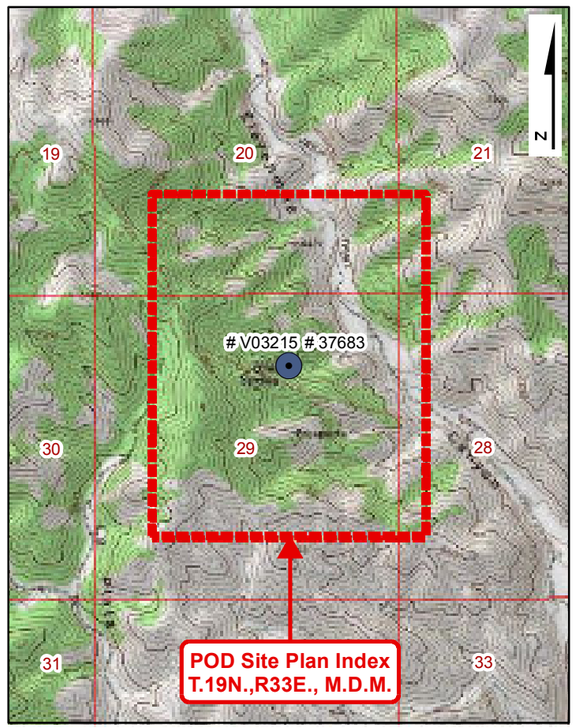

The point of diversion is located within the NW¼NE¼ Section 29, Township 19N, Range 33E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-231-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| NW | NE | 29 | 19N | 33E | 1000 cattle or 5000 sheep |

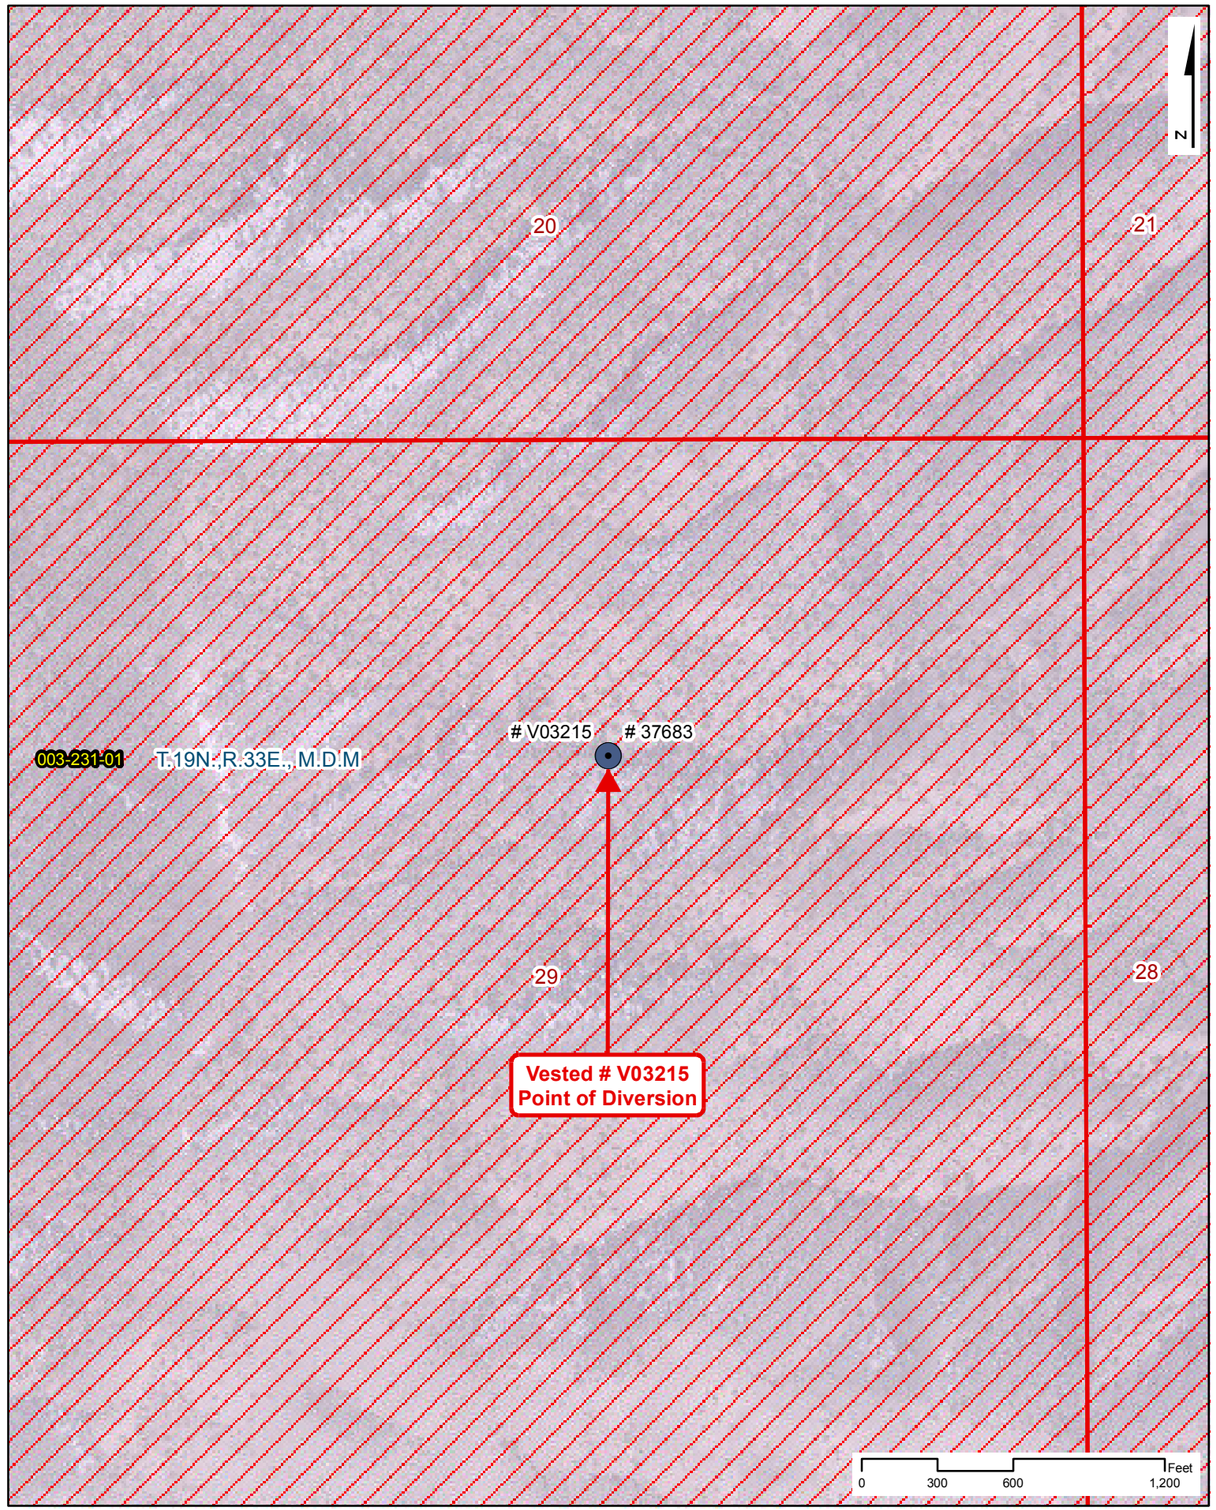

Vested Right V03215 is currently in good standing with the NDWR with no further action required.

Serial No. 03215

THE STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

(1) Name of claimant Ira H. and Nina K. Kent and Silver Range Ranch

13333 Stillwater Road (Street and No. or P.O. Box No.) of Fallon (City or town)

Nevada 89406 (State and Zip Code No.)

(2) Source of water Hike Spring (Name of natural water source.)

(3) The water is diverted by spring box with 1/4 mile of pipe to seven (Dam, ditch, pipe line, natural channel, spring area, etc.)

stock water troughs

(4) The water is diverted at the following point(s) NW¼ NE¼ Section 29, T19N, R33E, (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such reach.)

M.D.M. (unsurveyed) or at a point from which the southwest corner of Section 30 T19N, R34E, M.D.M. bears S 82° 35' E, 26840 feet, distant ( Calculated form geological survey map.)

(5) The water is impounded in stock water troughs (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun Prior to 1905 (Date)

and completed ..... (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is public domain with grazing permit (Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right ~~was~~ (was not) recorded in the office of the County Recorder of .....County, at Page.....of Book.....of.....

NOTE—Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

FILED
Aug 7, 1979
STATE ENGINEER'S OFFICE

(9) The approximate number of animals watered by the claimant during the first year 1905± (Date);

was 1000 cattle or ~~horses~~ 5000 sheep or ..... (Other). The watering

was conducted during each of the following months .....

All year except the range is closed through part of October and

November

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

1905 - 1918 1000 cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

1918 - 1941 5000 sheep 150 cattle

1941 - 1943 Range closed for aerial gunnery practice

1943 - 1979 600 to 900 cattle

(11) The amount of water which has been necessary to be diverted for this purpose has been.....

0.00669 cubic feet per second.

448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at NW¼ NE¼ Section 29, T19N R33E, M.D.M. (unsurveyed)

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

Remarks

Remarks.....

.....

.....

.....

.....

.....

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by.....

are full and correct to the best of his knowledge and belief.

.....

If proof is not made by claimant, deponent should state on this line by virtue of what authority he represents the claimant.

Serial No. 03219

THE STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

(1) Name of claimant Ira H. and Nina K. Kent and Silver Range Ranch

13333 Stillwater Road (Street and No. or P.O. Box No.) of Fallon (City or town)

Nevada 89406 (State and Zip Code No.)

(2) Source of water South Fork Freeman Creek Spring (Name of natural water source.)

(3) The water is diverted by Spring box and five foot pipe to water trough (Dam, ditch, pipe line, natural channel, spring area, etc.)

(4) The water is diverted at the following point(s) SE¼ NE¼ Section 12, T20N, R33E, (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such reach.)

M.D.M. unsurveyed; or at a point from which the SW corner of Section 9 T20N, R34E, M.D.M. bears S 79° 30' E, 15680 feet, distant. (calculated from Geological Survey Map)

(5) The water is impounded in water trough (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun prior to 1905± (Date)

and completed ..... (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is public domain with grazing permit. (Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right ~~was~~ (was not) recorded in the office of the County Recorder of ..... County, at Page ..... of Book ..... of .....

NOTE—Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

FILED
Aug. 7, 1979
STATE ENGINEER'S OFFICE

(9) The approximate number of animals watered by the claimant during the first year 1905‡
Date
was 1000 cattle or ~~horses~~ 5000 sheep or ..... Other The watering was conducted during each of the following months all year except the range is closed through part of October and November.

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

1905 to 1918 - 1000 cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

1918 to 1941 - 5000 sheep 150 cattle

1941 to 1943 - range closed for aerial gunnery practice

1943 to 1979 - 600 to 900 cattle

(11) The amount of water which has been necessary to be diverted for this purpose has been

0.00982 cubic feet per second.

448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at SE¼ NE¼ Section 12, T20N, R33E, M.D.M. (unsurveyed)

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

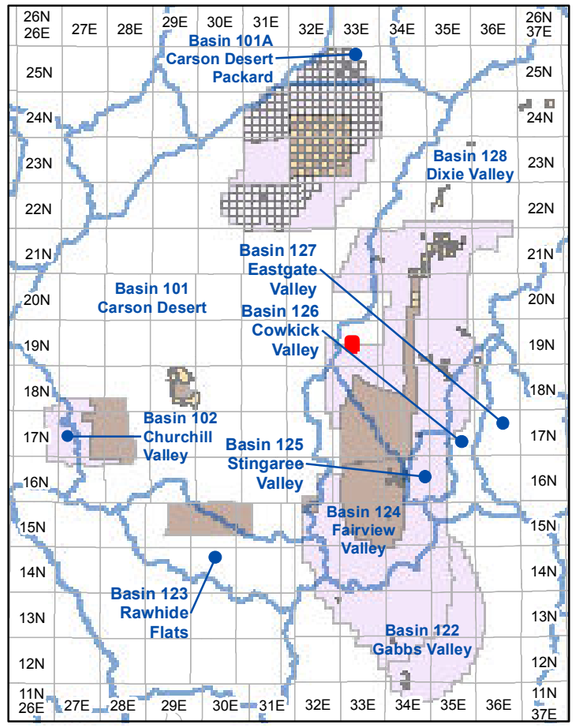

**Vested Right V03221**

The current owner of Vested Right V03221 is Ira H. and Nina K. Kent and Silver Sage Ranch. The vested right was filed in the office of the State Engineer on August 7, 1979. It has a priority date of January 01, 1905 and a total duty of 3.22 acre-feet annually with an allowed diversion rate of 0.004 CFS. The permitted manner of use is for stock-watering purposes. The allowed period of use is from January 1 through December 31.

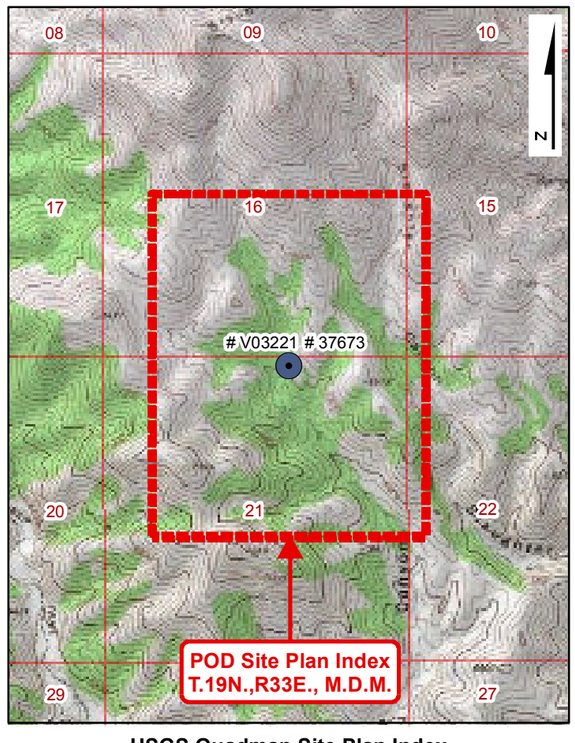

The point of diversion is located within the NW¼NE¼ Section 21, Township 19N, Range 33E, MDM. The permitted place of use is in the Dixie Valley Basin within Churchill County APN 003-231-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| NW | NE | 21 | 19N | 33E | 1000 cattle or 5000 sheep |

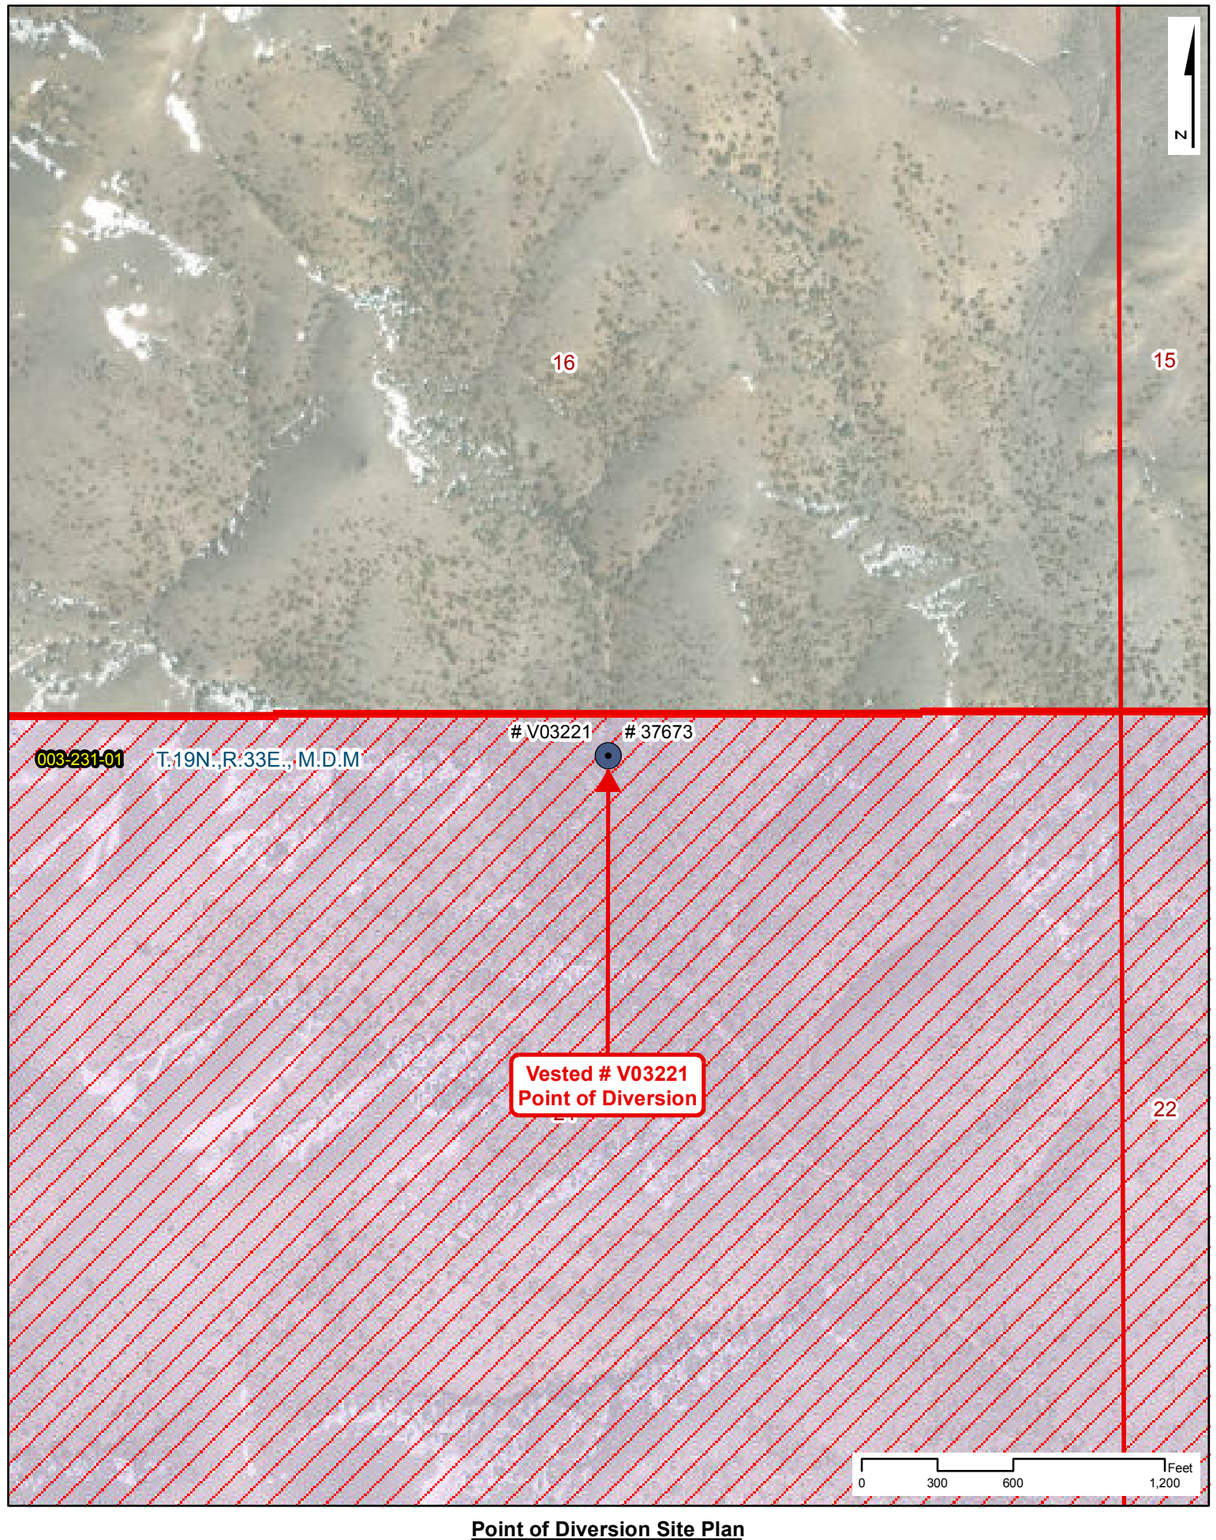

Vested Right V03221 is currently in good standing with the NDWR with no further action required.

Serial No. 03221

THE STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

(1) Name of claimant Ira H. and Nina K. Kent and Silver Range Ranch

13333 Stillwater Road (Street and No. or P.O. Box No.) of Fallon (City or town)

Nevada 89406 (State and Zip Code No.)

(2) Source of water Wildhorse Spring (Name of natural water source.)

(3) The water is diverted by spring box with 500 feet 1¼ inch pipe to three water troughs (Dam, ditch, pipe line, natural channel, spring area, etc.)

(4) The water is diverted at the following point(s) NW¼ NE¼ Section 21, T19N, R33E, M.D.M. or at a point from which the SW corner of Section 18 T19N, R34 E, M.D.M. bears N 87° 40' E, 21470 feet distant. (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such reach.)

(Calculated from Geological Survey Map)

(5) The water is impounded in water troughs (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun Prior to 1905 (Date) and completed ..... (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is public domain with grazing permit (Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right ~~was~~ (was not) recorded in the office of the County Recorder of .....County, at Page.....of Book.....of.....

NOTE—Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

FILED
August 7, 1979

(9) The approximate number of animals watered by the claimant during the first year 1905± (Date), was 1000 cattle or ~~horses~~ 5000 sheep or ..... (Other). The watering was conducted during each of the following months all year except the range is closed through part of October and November

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

1905 - 1918 1000 Cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

1918 - 1941 5000 sheep 150 cattle

1941 - 1943 Range closed for aerial gunnery practice

1943 - 1979 600 to 900 cattle

(11) The amount of water which has been necessary to be diverted for this purpose has been 0.00446 cubic feet per second.

448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at NW¼ NE¼ Section 21, T19N, R33E, M.D.M. (unsurveyed)

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

Remarks

Remarks.....

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by.....

are full and correct to the best of his knowledge and belief.

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

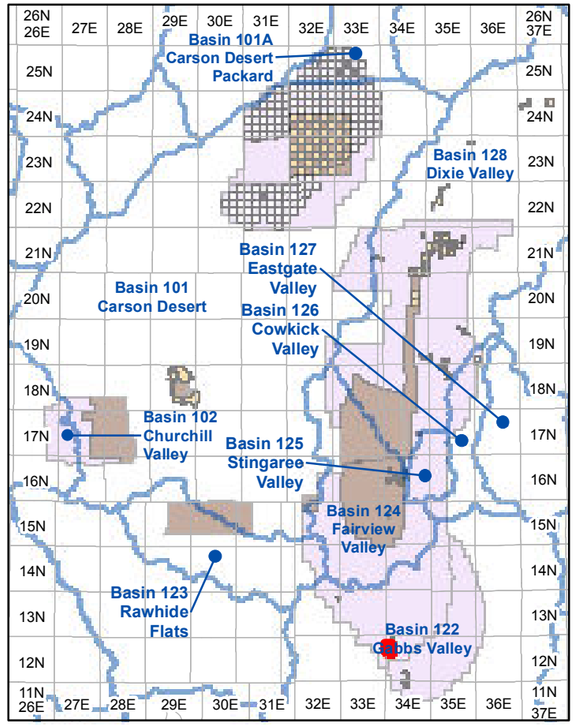

**Vested Right V08909**

The current owner of Vested Right V08909 is Ron Greenfield. The vested right was filed in the office of the State Engineer on November 13, 1996. It has a priority date of March 01, 1905 and a total duty of 195.57 acre-feet annually with an allowed diversion rate of 0.268 CFS. The permitted manner of use is for irrigation purposes. The allowed period of use is from January 1 through December 31.

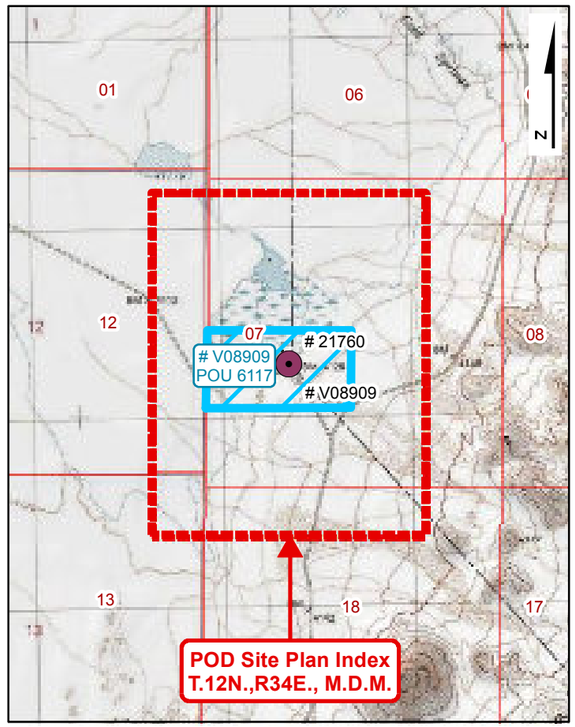

The point of diversion is located within the NE¼SW¼ Section 7, Township 12N, Range 34E, MDM. The permitted place of use is in the Gabbs Valley Basin within Mineral County APN 005-340-01 under the ownership of Bureau of Land Management and is more specifically listed in the table below.

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| N2 | SW | 7 | 12N | 34E | 40 acres |

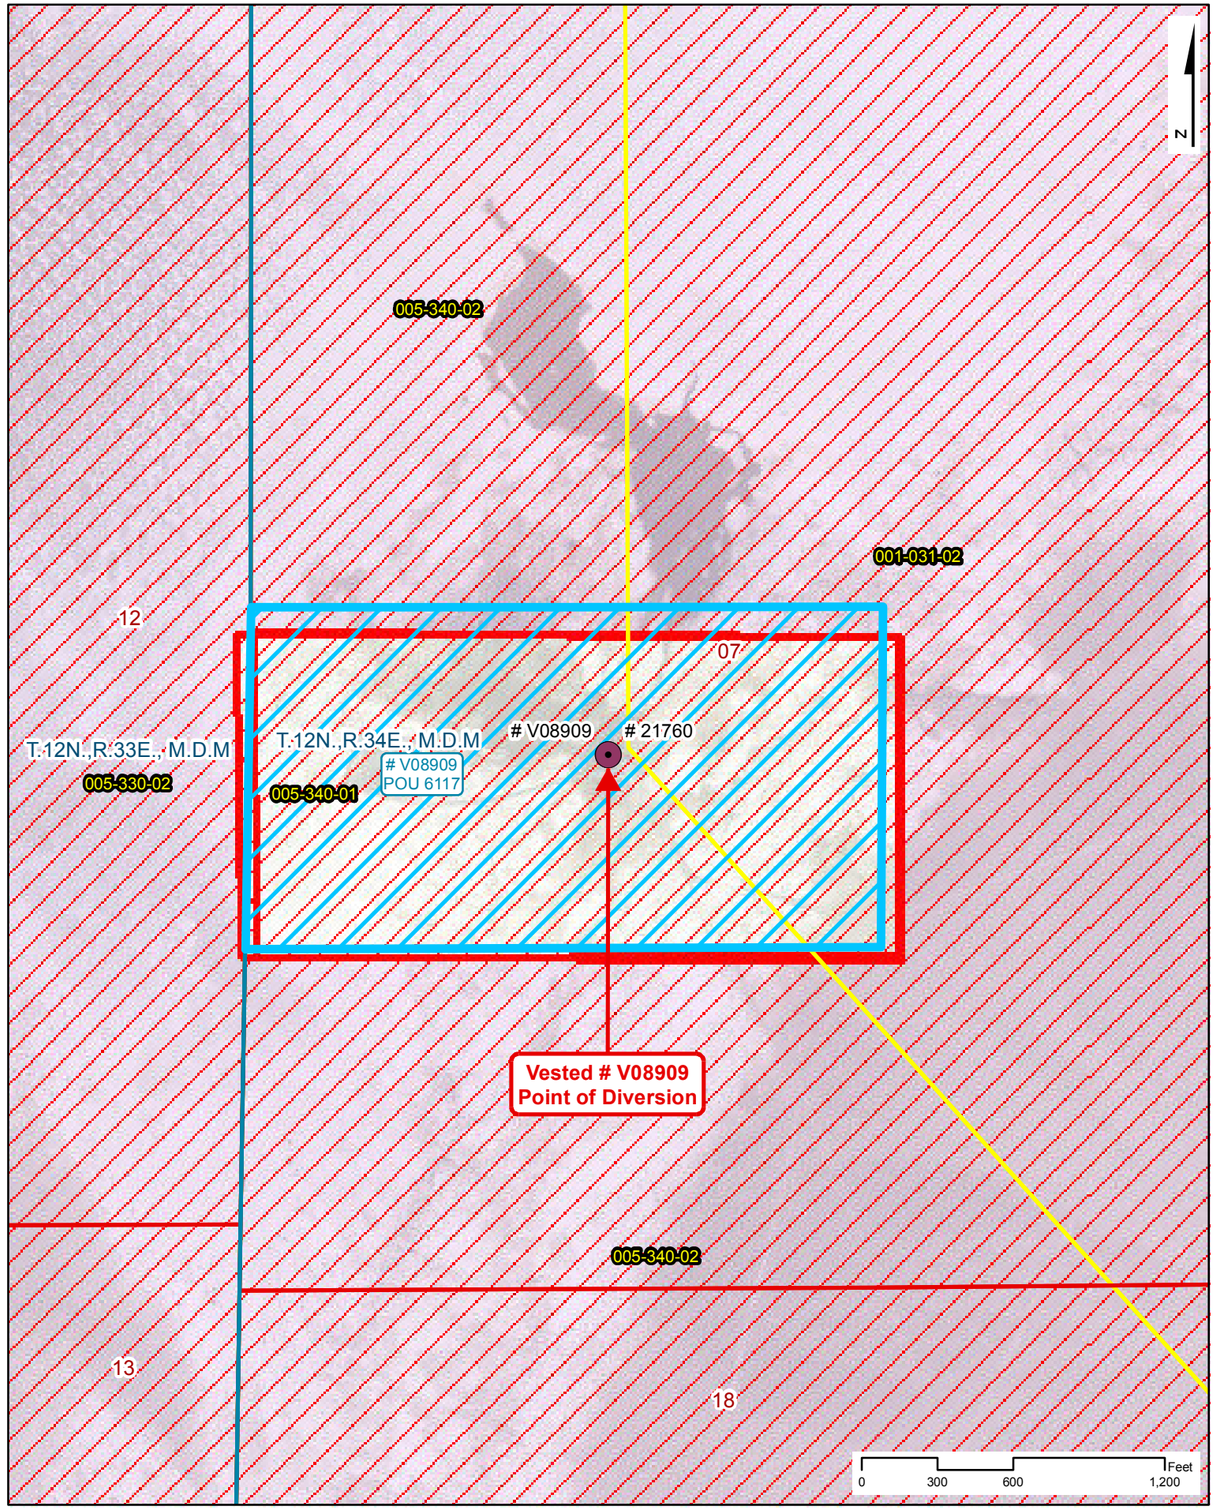

Vested Right V08909 is currently in good standing with the NDWR with no further action required.

Filing Serial No. 08909

STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR IRRIGATION

ALSO INCLUDES STOCKWATER, DOMESTIC AND COMMERCIAL USES

Source RAWHIDE HOT SPRINGS aka GABBS VALLEY HOT SPRINGS
Name of natural water source (use separate proofs for each major source)

The water is diverted from its source SPRING, POND AND DITCHES
Name of ditch, flume or pipe line

at the following point(s) NE¼ of SW¼, SECTION 7, T12N, R34E, M.D.M.
List all points of diversion from this source, appending a sheet if necessary

Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land, it should be stated

(1) Name of claimant RON GREENFIELD

Address 3917 LIBERTY ROAD, SOUTH GATE, County of

State of CALIFORNIA 90280 Telephone No. (213) 567-0814

(2) The means of diversion employed DAMS AND DITCHES
Dam and ditch, pipe line, flume, etc.

(3) The date of the survey of ditch, canal, or pipe line was UNSURVEYED

(4) The construction of the ditch or other works was begun 1864

and completed PRIOR TO 1905

(5) The dimensions of the ditch or canal as originally constructed were: Width on bottom unknown feet, width on top -- feet, depth -- feet, on a grade of -- feet per thousand feet.

(6) The conduit has (has not) been enlarged. UNKNOWN
NOTE—If enlargement or extension of ditch was made, supply information under (7) and (8)

(7) The work of enlargement of the ditch or canal was begun -- and completed --.

(8) The dimensions of the ditch or canal as enlarged are: Width on bottom 2 feet, width on top 4 feet, depth 3 feet, on a grade of 1 feet per thousand feet.

(9) The claimant is ~~(is not)~~ an owner in the above-described conduit.

If claimant is an owner in the conduit, state interest held on this line

12-A1

(10) The nature of the title to the land for which the water right is claimed is FEE SIMPLE

(11) Crops of HAY, MEADOW AND PASTURE have been grown upon the land irrigated. (e.g. alfalfa, native hay, grain, orchard, meadow or diversified pasture)

(12) The water has been used for irrigation from JANUARY 1 (Day of month) to DECEMBER 31 (Day of month) of each year.

(13) List the year of priority for acreages irrigated prior to March 1, 1905, from all points of diversion previously described, with corresponding subdivisions, appending extra sheets if necessary.

PRIOR TO 1905 (Year), 40 acres in the $N\frac{1}{2}$ of the $SW\frac{1}{4}$ of Sec. 7, T. 12N, R. 34E. E.

....., ..... acres in the ..... of Sec. ....., T. ....., R. ..... E.

(14) The maximum acreage irrigated in any year was FORTY acres.

(15) The water claimed has (~~has not~~) been used for irrigation each and every year since the right was initiated.

(16) The years during which no water was used for irrigation or during which the full water right was not used were NONE

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given, appending a sheet if necessary

(17) The claimant's water right [redacted] (was not) recorded in the office of the County Recorder of MINERAL County, said record being at page N/A of Book N/A of , and being a claim for of water for the irrigation of acres of land in the following legal subdivisions:

--

NOTE—Failure to record in the county in no way invalidates a water right, but if ditch or right was so recorded, supply full information under (17)

(18) Water from the source given and through the works described is also used for the following purposes other than irrigation:

DOMESTIC, STOCKWATER AND COMMERCIAL (HOT SPRINGS - SPA)

(19) The character of the soil is LOAM (Sandy, gravelly, loam). A continuous flow of .2679 cubic feet of water per second has been used to irrigate 40 acres of land and 195.567 acre-feet per acre per annum have been used to irrigate the crops, and all other uses combined.

(20) Remarks THIS WATER HAS BEEN USED FOR THE FOLLOWING PURPOSES SINCE 1864:

(1) IRRIGATION

(2) STOCKWATER

(3) DOMESTIC

(4) COMMERCIAL USE AS A SPA OR MINERAL BATH HOT SPRINGS

THE TEMPERATURE AT THE SOURCE IS APPROXIMATELY +/- 130° FAHRENHEIT, AND UPON COOLING IS USED FOR THE OTHER STATED PURPOSES.

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by RON GREENFIELD are full and correct to the best of his knowledge and belief.

THE UNDERSIGNED IS AN AGENT FOR RON GREENFIELD, THE OWNER (SEE ATTACHED LETTER).

If proof is not made by claimant, deponent should state on this line by virtue of what authority he represents the claimant

## WATER RIGHTS RESEARCH AND INVENTORYING SERVICES– Information Sheet

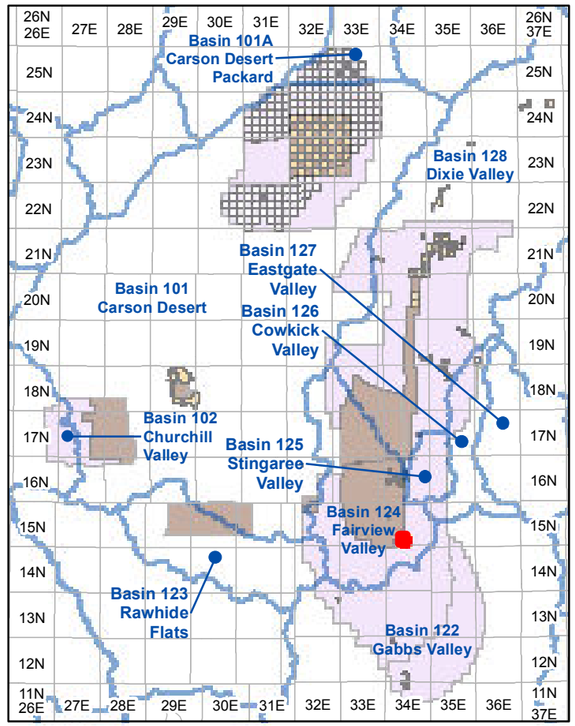

**Vested Right V10070**

The current owner of Vested Right V10070 is Michael A. and Claudia C. Casey. The vested right was filed in the office of the State Engineer on July 29, 2011. It has a priority date of July 29, 2011 and an allowed diversion rate of 0.031 CFS. The permitted manner of use is for stock-watering purposes. The allowed period of use is from January 1 through December 31.

The point of diversion is located within the SE¼NW¼ Section 33, Township 15N, Range 34E, MDM. The permitted place of use is in the Fairview Valley Basin within Churchill County APN 002-311-02 under the ownership of the Bureau of Land Management and is more specifically listed in the table below.

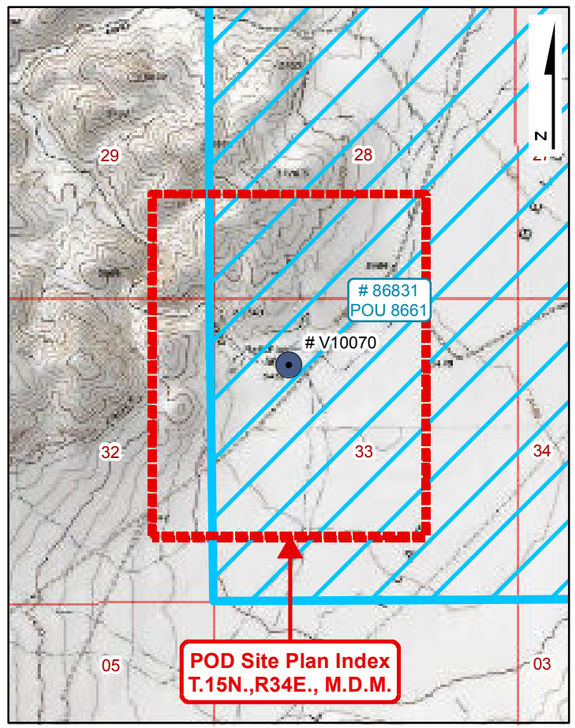

| QQ | Q | Section | Township | Range | Units |
|---|---|---|---|---|---|
| SE | NW | 33 | 15N | 34E | 1000 cattle |

Vested Right V10070 is currently in good standing with the NDWR with no further action required.

Application No. 010070

STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING OR WILDLIFE PURPOSES

(1) Name of claimant Michael A. & Claudia C. Casey

53603 Austin HWY (Street Address or PO Box) of Fallon (City or Town)

Nevada 89406 (State and ZIP Code)

(2) Source of water Bell Flat Well (Name of natural water source)

(3) The water is diverted by: well (Dam, ditch, pipe line, natural channel, spring area, etc.)

(4) The water is diverted at the following point(s): T15N, R34E, MDBM, Approx Section 33, (township is unsurveyed) or at a point from which the SE corner of Section 34, T16N R34E, MDBM, bears N 17° 43' 52.5" E, a distance of 26,907.05 feet.

Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such.

(5) The water is impounded in Trough 1,900 gallons (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun 1878 (Date) and completed unknown (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is: Patent Lands, Range Allotments, 1878 tax assessment records in Churchill County.

(Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right was recorded in the office of the County Recorder of Churchill County, at Page 38 of Book 15 of ____

NOTE - Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

(9) The approximate number of animals watered by the claimant during the first year 1878 (Date) was — cattle — horses 6,000 sheep or wildlife (describe) Prong 02184, Approx 4 miles east.

The watering was conducted during each of the following months:
1/1 to 12/31

124-44

010070

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:
1000 head of cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

(11) The amount of water which has been necessary to be diverted for this purpose has been

0.031 cubic feet per second.

448.83 gallons per minute equals 1 cubic foot per second

(12) The works are located at: Township unsurveyed. Protraction indicates location is Sec. 33, T15N R 34E, MDBM

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

Remarks

Warren W. Williams was located in Edwards Creek Valley prior to 1878. His house/ranch was located on the E 1/2 of E, Section 5, T19N R37E, MDBM, and named on the General Land Office Survey Map, approved 11/28/1879. Assessor's records of 1883 state W.W. Williams had 4,000 head of sheep.

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by _____ are full and correct to the best of his/her knowledge and belief.

If proof is not made by claimant, deponent should state on this line by virtue of what authority he/she represents the claimant.

Application No. 010286

STATE OF NEVADA

# PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING OR WILDLIFE PURPOSES

(1) Name of claimant Michael A. & Claudia C. Casey

53603 Austin HWY (Street Address or PO Box) of Fallon (City or Town)

Nevada 89406 (State and ZIP Code)

(2) Source of water Slate Spring (Name of natural water source)

(3) The water is diverted by: Natural Channel (Dam, ditch, pipe line, natural channel, spring area, etc.)

(4) The water is diverted at the following point(s): NE NW, Sec. 6, T14N R34E, MDBM; or at a point from which the SW corner of Sec. 35, T16N R34E, MDBM, bears North 30° 46' 33.9" E, a distance of 35,635.9 feet.

Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land it should be stated. Diversion over a channel reach must be described by course and distance to a section corner for both the beginning and end of such.

(5) The water is impounded in Natural Channel (Troughs, tanks, pools, reservoir, natural channel, etc.)

(6) The construction of the ditch or other works was begun 1890 (Date) and completed 1890 (Date)

(7) The nature of the claimant's title to the land upon which the source of water and place of use are located is: Patent Lands, Range Allotments, 1878 tax assessment records in Churchill County.

(Patented, deeded, public domain with grazing permit, etc.)

(8) The claimant's water right was recorded in the office of the County Recorder of Churchill County, at Page 38 of Book 15 of _____

NOTE - Failure to record in the county in no way invalidates a water right, but if water right was so recorded, supply full information under (8).

(9) The approximate number of animals watered by the claimant during the first year 1878 (Date)

was _____ cattle _____ horses 2000 sheep or wildlife (describe) _____

The watering was conducted during each of the following months: 1-1 to 12-31

RECEIVED
2008 MAY 21 PM 2:41
STATE ENGINEERS OFFICE

Revised 07/09 - POA

124-CH

010286

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

927 head of cattle

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given.

(11) The amount of water which has been necessary to be diverted for this purpose has been

0.0267 cubic feet per second.

448.83 gallons per minute equals 1 cubic foot per second

(12) The works are located at: NE NW, Sec. 6, T14N R34E, MDBM.

Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.

Remarks

Warren W. Williams was located in Edwards Creek Valley prior to 1878. His house/ranch was located on the E 1/2 of SE, Section 5, T19N R37E, MDBM, and named on the General Land Office Survey Map, approved 11/28/1879. Assessor's records of 1883 state W.W. Williams had 4,000 head of sheep.

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by Michael A. Casey are full and correct to the best of his/her knowledge and belief.

If proof is not made by claimant, deponent should state on this line by virtue of what authority he/she represents the claimant.

Michael A Casey
