

FALLON RANGE TRAINING COMPLEX MODERNIZATION EIS

RECORD OF DECISION

The U.S. Navy has announced its decision to select Alternative 3, the Navy's preferred alternative, from the Fallon Range Training Complex Modernization Final Environmental Impact Statement (EIS), dated January 2020.

This alternative will support the Navy's request for a legislative proposal for Congressional action and Presidential approval for renewal of the current federal land withdrawal and withdrawal of additional federal land to expand the range. It also includes the acquisition of non-federal land.

The Navy selected Alternative 3 because it best balances the Navy's operational needs while minimizing environmental impacts.

The Record of Decision and Final EIS are available online at www.FRTCModernization.com or view copies at the Austin, Carson City, Churchill County, Crescent Valley, Downtown Reno, Eureka, Fernley, Gabbs Community, Mineral County, Pershing County, and Yerington public libraries.

RECORD OF DECISION

The Record of Decision documents the Navy's decision to modernize the Fallon Range Training Complex. With the implementation of the modernization, the Fallon Range Training Complex significantly enhances aviation and ground training for a wide range of mission capabilities into the foreseeable future.

In making this decision, the Navy carefully weighed:

- ▶ Its strategic and operational needs.
- ▶ Potential impacts on the human, natural, and cultural environment.
- ▶ Comments from government officials and agencies, Tribes, and the public on the proposal and environmental analysis.

The Navy will implement management practices, monitoring, and mitigation measures to reduce potential adverse effects on the public and the environment.
