

PROPOSED ACTION

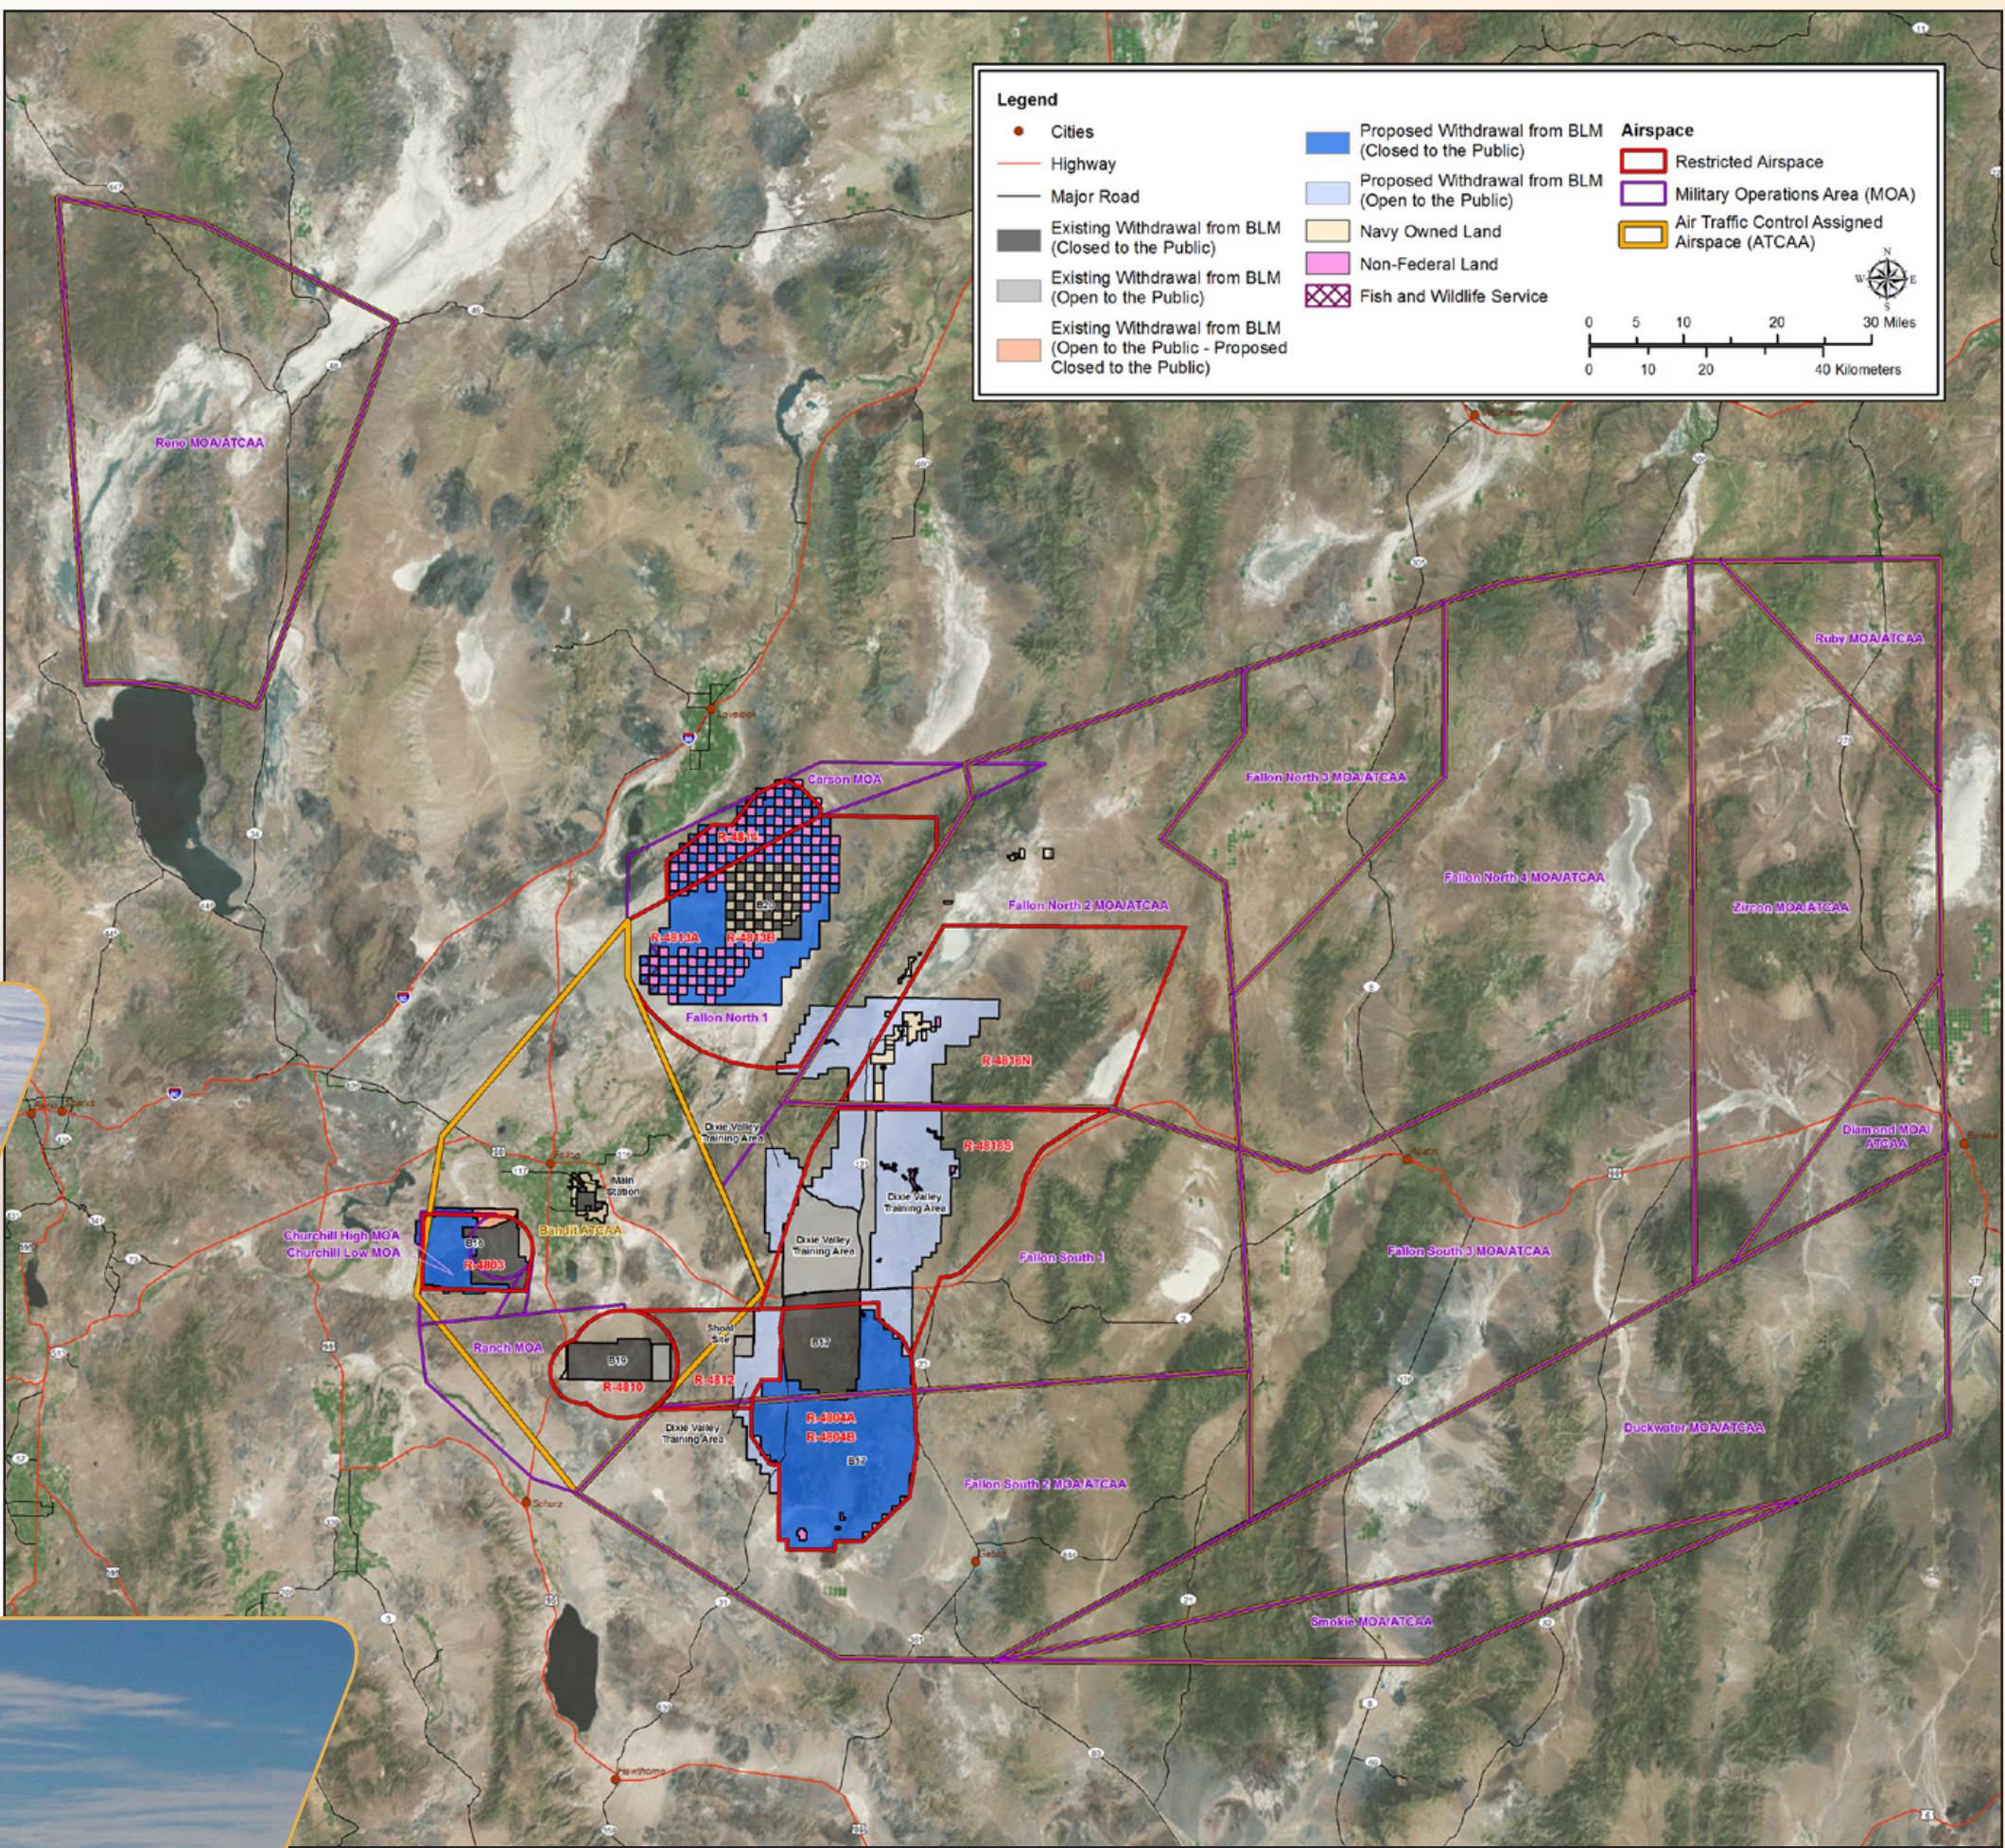

The Fallon Range Training Complex (FRTC) must be able to support how the Navy fights today so personnel are prepared for the conflicts of tomorrow.

PROPOSED ACTION
The Navy's Proposed Action would provide the realistic training capabilities needed to meet changing aviation and ground training requirements.

To modernize the FRTC, the Navy would:

- ▶ Renew current public land withdrawal of 202,859 acres expiring in November 2021
- ▶ Withdraw and reserve for military use approximately 604,789 acres of additional public land
- ▶ Acquire approximately 65,160 acres of non-federal land
- ▶ Expand associated special use airspace and reconfigure existing airspace
- ▶ Maintain operational tempo
- ▶ Upgrade range infrastructure to support modernization

During the scoping period, the public helps to identify environmental issues and potential viable alternatives.

NO ACTION ALTERNATIVE

- ▶ Land range expansion and airspace changes would not occur
- ▶ The Navy would reassess the military mission of Naval Air Station Fallon and consider disestablishing and ceasing use of the FRTC, as withdrawn public land would not be renewed
- ▶ The Navy would work with the Bureau of Land Management to prioritize and address any environmental remediation needed on lands relinquished back to them
